EXPERIENCE

2024 - present **Founder & Freelance Developer**
LOVIZ

Founded LOVIZ specializing in interactive web experiences. Freelance web developer and 3D artist creating custom solutions that combine cutting-edge web development with immersive 3D visualization for clients across various industries.

2021 - 2024 **Core Developer of Govie Editor**
3DIT LDT, Dresden

As one of the core developers, I contributed to building and shaping the platform. I created the official website to present the product effectively. In addition, I led marketing efforts to support growth and user adoption.

2016 - 2021 **Co-Founder & Technial Artist**
3DIT LDT, Dresden

Co-founded and led product development for innovative 3D visualization solutions. Managed programming, marketing, and strategic direction while creating and integrating real-time 3D content for interactive applications across multiple platforms.

Developments

GLB Optimizer

Blender add-on to reduce filesize and improve performance of 3D Models

Govie Editor

A web-based platform for creating interactive 3D presentations that combine slides, media, and CAD/GLB models without requiring coding or 3D expertise.

InLinked

A SaaS platform that automates LinkedIn outreach by combining profile data, AI personalization, and workflow orchestration for scalable, authentic networking.

EXPERIENCE CONTINUED

2015 - 2013

3D Developer

Incedure LDT, Leipzig

Built advanced 3D furniture configurator using Unity, seamlessly integrating it with Magento webshop. Enabled real-time product customization and streamlined purchase workflow, delivering complete e-commerce solution with interactive 3D visualization.

2010 - 2011

Technical Assistant

Magix AG (Public Limited Company)

Provided technical assistance via email and phone, helping users troubleshoot software issues. Also contributed to software testing, identifying bugs and ensuring product quality.

2015 - 2017

Student assistant at Architecture Institute

TU Dresden

At the Architecture Institute of TU Dresden, I supported research and administrative tasks as a student assistant. My responsibilities included automating data acquisition processes and developing spreadsheet analyses using macro scripting, improving workflow efficiency and data accuracy.
