

Invoice Xtract

AI-Powered Invoice OCR & Process Automation
Built on SAP BTP

Streamline, Automate, and Optimize Invoice Management

Manual invoice processing is both time-consuming and prone to errors, leading to decreased efficiency and critical oversights. **bneXt Invoice Xtract** leverages AI-powered OCR and automated workflows to extract key data from scanned invoices, thereby eliminating manual entry, and accelerating approvals—ensuring accuracy, efficient, and cost savings.

Automate Invoice Processing for Faster Approvals and Improved Accuracy

SAP S/4HANA

Why Choose Invoice Xtract?

Intelligent Invoice Processing, Powered by AI

The solution allows for seamless integration with SAP S/4HANA and other ERP systems, ensuring real-time data validation, approval routing, and regular compliance checks. The automation of invoice reconciliation and approvals also accelerate financial operations while improving accuracy and efficiency.

Faster Processing

Reduce invoice cycle times with automated data extraction and approval workflows.

Greater Accuracy

AI-powered OCR minimizes errors from manual entry and improves data integrity.

Seamless Integration

Built on SAP BTP, ensuring smooth connectivity with SAP and other ERP systems.

Cost Savings

Cut operational costs by reducing manual effort and optimizing resources.

Scalable & Secure

Cloud-based and adaptable to growing business needs.
