

PROJECT PROFILE

AMBULANCE VICTORIA MORWELL DEPOT

CLIENT

> Victorian Health Building Authority

LOCATION

> Morwell, Victoria

ARCHITECT / DESIGNER

> Guymer Bailey Architects

VALUE

> \$5.22m

SUMMARY

> The entire site spans over 1500 sqm and the project scope included civil works including car parking, curbing and landscaping. After the initial site cut and slab was poured, the precast building walls were lowered into position over 100 x 2.0m dowels. This was complex work which required exceptional accuracy. The brick administration rooms provide staff a training facility, office space, sleeping quarters for 8 paramedics, and associated kitchen, toilets and showers. Kubale Constructions provided the entire joinery package from our in-house joinery team.

CONSTRUCTION HIGHLIGHTS AND TECHNIQUES

- > Precast panels with structural steel and brickwork
- > Complex dowelling between slab and precast panels
- > Epoxy flooring with line marking
- > Civil works including car parks and curbing
