Germany

The **Training Automotive SPICE® Observed Observation** means: An experienced Automotive SPICE Principal Assessor observes that you are able to conduct an Automotive SPICE Assessment. With this practical examination, you complete the training as an Automotive SPICE Competent Assessor. This observation is itself observed by an independent inspector from Saphire Certification.

A particularly experienced lead assessor is the lead assessor, i.e. he observes the activities and evaluates them on the basis of defined criteria. We carry out the observations in accordance with intacs guidelines, methodology and evaluation criteria. In order to achieve a more detailed evaluation and a higher value of the observation, we use more detailed evaluation criteria and have the observation itself observed by an independent expert.

After passing the examination, the candidate receives two reports — one for intacs and one from the external inspector.

## 5-days interview assessment

- Online or onsite
- Prices, offer and registration on [www.knuevenermackert.com](http://www.knuevenermackert.com)

After registration, we will find the best opportunity with the participant to take part in an assessment. Time, language, location and customer must fit.

## Why with Knüvener Mackert?

✓ **Trainer expertise:** Highly qualified, intacs® certified, with decades of practical experience.

✓ **Trainer competence:** We explain difficult topics using understandable examples and solutions.

✓ **Trainers' eagerness:** We explain the topics and connections until the why and how are really clear.

✓ **SPICE booklet:** During training, you will work with our best-in-class SPICE booklet.
