

Floor plan

The Alamo 710 features two fully separate bedrooms and a spacious open-plan living area designed for comfortable everyday living. This ADU combines a clean, low-sloped roofline with expansive windows and a thoughtful layout that creates a bright, open feeling throughout the home.

Premium finishes, generous natural light, and a warm, modern aesthetic make the Alamo 710 a versatile option for family living, guests, or a fully independent rental unit.

Water heater	Hybrid 40 gallon water heater

* Subject to change without notice. Contact Wellmade for most current product information. Holds 5-year limited warranty if installed by Wellmade.

Step 1 – Initial call and virtual site visit

After an introductory call with our team, we'll do a Virtual Site Visit to verify your site conditions, talk about placement of the Shed onsite and discuss any logistical considerations.

Step 2 – Feasibility

We'll put our team to work to discover any potential show-stoppers for the project. We'll verify that your ADU project is reasonably feasible.

Step 3 – Pricing

Wellmade has a fixed-price policy. As such, we're going to put in the work to fully understand all of the necessary aspects of the project and their costs before sending you a contract. This pricing exercise costs \$700 and will be deducted from your purchase if you decide to move forward.

Step 4 – Contract Signed and Permit Started

As soon as the contract is signed, we'll start working on a building permit package for you. During the permit work, we'll also work with you to finalize design details like color, materials, and appliance selections.

* Usually, any county is obligated to issue ADU building permit within 8 weeks.

Step 5 – Fabrication and Installation

When we get an approved building permit, we'll start fabricating your ADU. We will make all structural panels and other components in our facility, which will significantly reduce the amount of construction time onsite.

Process timeline:

Building permit	Fabrication at our facility	Installation on-site
8 - 16 weeks		6 - 10 weeks
	10 - 18 weeks	
● Sending all documents to the local authorities to obtain building permit, and addressing all comments from the city if needed.	● Manufacturing all panels at our facility ● Ordering custom elements ● Preparing for installation onsite	● Preparing site ● Doing concrete work for foundation ● Installing structural panels ● Finishing interior ● Installing appliances and fixtures * Timeline depends on site conditions and local inspections.
