Sanitation

Keep Our Loads Clean!

Proper sorting and preventing contamination is a must! Strict contaminant thresholds have been applied to the **recycling** and **organic** material we collect.

What Do We Do Now?

- **Continue to recycle!**

Our program takes: metal cans, aluminum cans, glass bottles and jars, plastic bottles, jugs, and tubs labeled #1 to #7, as well as office paper and cardboard.

- **Remember to use your green bin!** You can throw away all food scraps, soiled paper, and yard waste in it. We'll pick it up and turn it into compost.

See proper sorting and reduction tips inside!

Thank you!

The Cleanest & Most Efficient Sorting Starts With You!

SUPPORT THE SORT!

Please place only **compostable** materials directly into your green **organics** cart or bin.

IF IT ROTS, GREEN IS THE SPOT!

In our program we accept food, food soiled papers, as well as any yard waste/landscaping materials, all of which is collected for composting.

KEEP IT CLEAN!

Keep it clean and avoid a **contamination fee**.

NO Styrofoam®, Plastic, Black Bags, Biobags, Glass, or Metal.

WHEN IN DOUBT... FIND OUT!

For downloadable posters, guides, and more scan QR or please visit:

Let's Keep It Clean: Only Approved Bags in Green Bins!

ORGANIC waste must be placed only in approved (**clear plastic**) bags. Using the correct bags is essential for effective processing and protecting environmental sustainability.

THE ISSUE WITH NON - CLEAR BAGS

- The composting facility where we take our **organic** material does not accept or open non-approved bags due to potential contaminants.
- Contaminants in bags could ruin an entire truck load.
- When non-approved bags are in an **organics** bin, they are sent to the landfill instead.
- Extra fees are charged for the garbage removed from the **organics** load, and these additional costs affect our rates and, ultimately, your rates.

Visit our website or contact us if you have a question.
