

The Prey platform: A 4-tier security approach

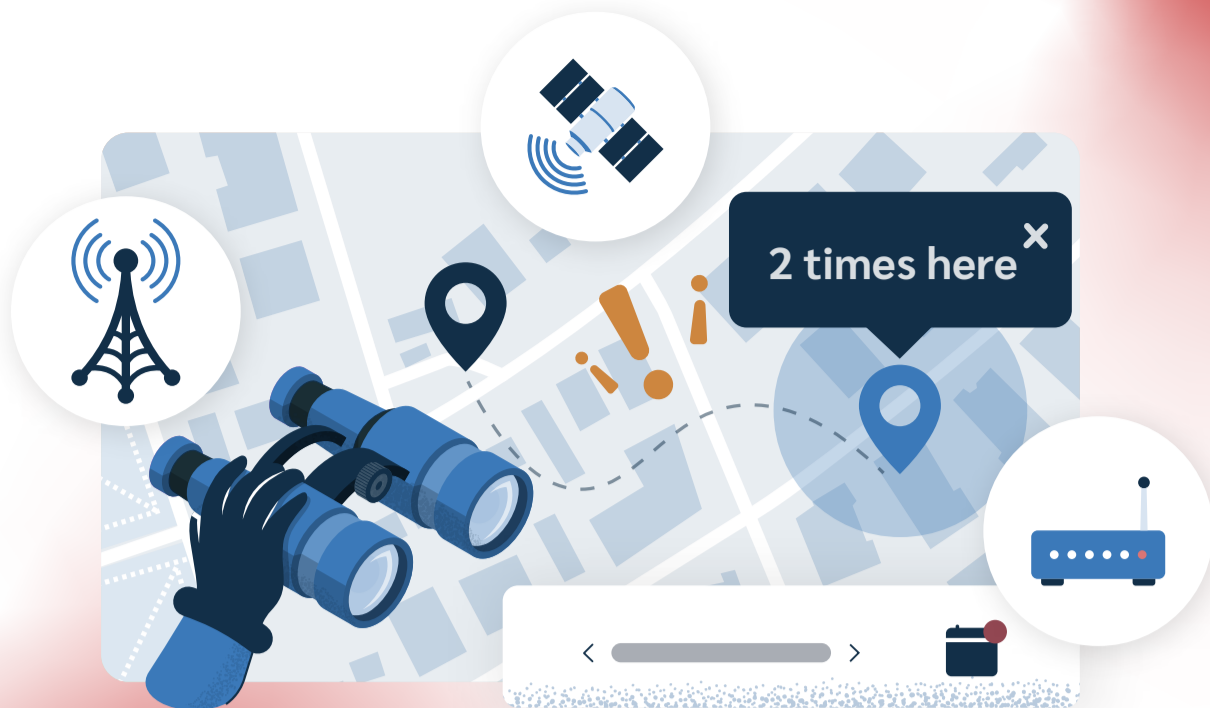

1. Tracking

Locate & Monitor: Active location tracking, geofencing, and activity logs.

Visibility: Track remote workforce locations and stay in control.

Key Features: Always-on GPS tracking, Geofences, Missing reports (camera & screenshot).

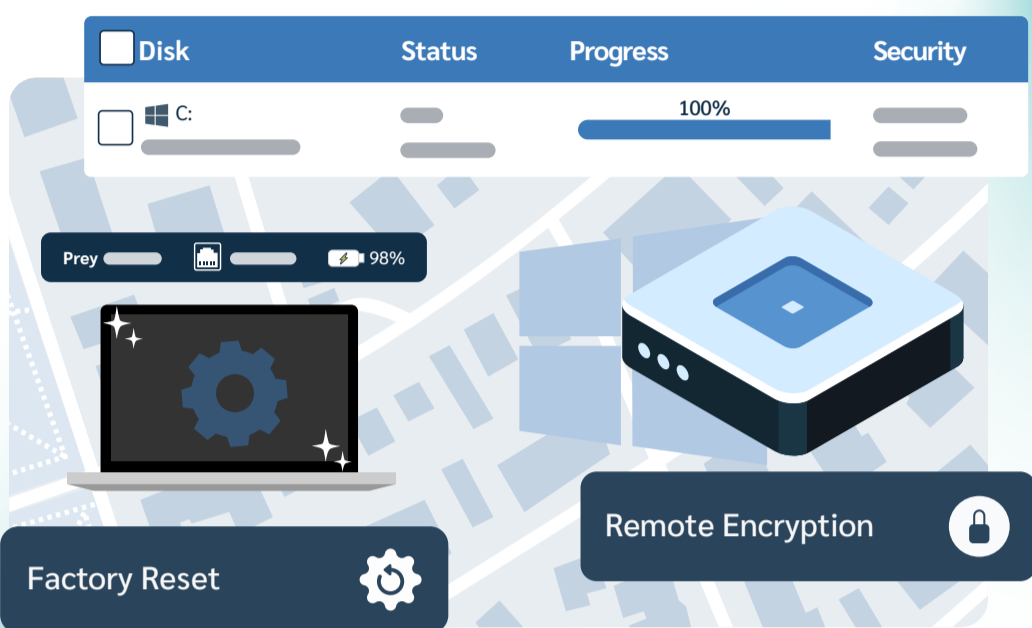

2. Protection

Secure and recover: Remotely lock, wipe, and encrypt lost or stolen devices.

Prevent data leaks: Mitigate insider threats, user error and ensure compliance.

Key Features: Remote lock, Factory reset, Remote wipe, Data encryption.

3. Management

Automate and streamline: Automate security actions and manage users.

Asset control: Track assigned devices, assignments, inventory hardware/software.

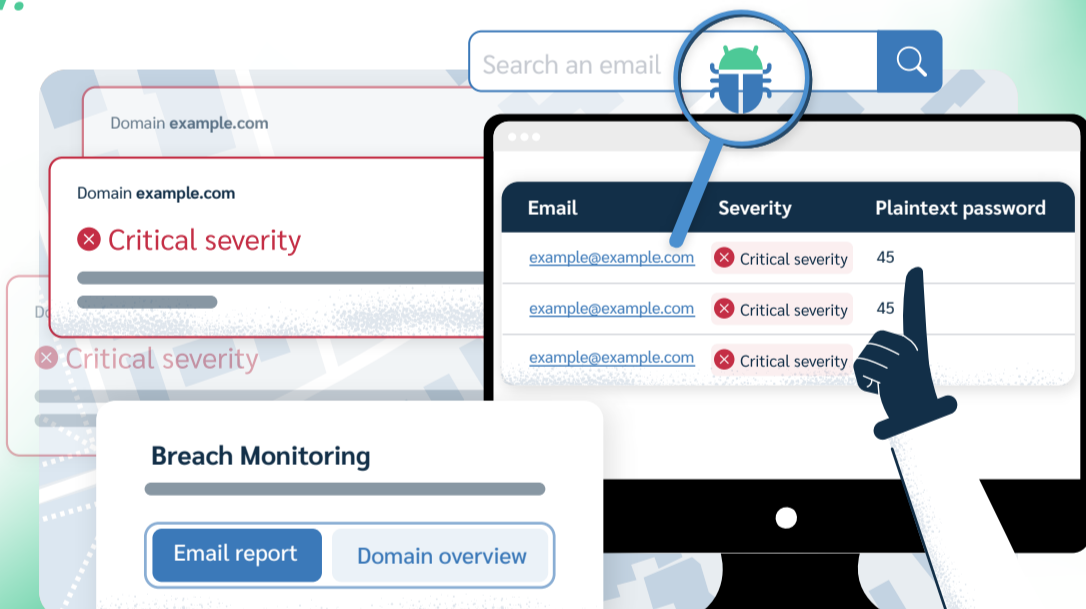

Key features: Automations, HW/SW inventory, Mass actions, Asset inventory.

4. Breach Monitoring *NEW!*

Proactive credential protection: Detects leaked corporate credentials on the dark web before exploitation.

Alerts and insights: Weekly reports on data health, severity scores (Low/High/Critical), and detailed insights on compromised accounts.

Why Prey? Your trusted partner

With **15+ years of experience** and **8.9+ million devices protected across 170+ countries**, Prey offers:

- **A Smarter security approach:** Unified control, powerful automation, and real-time insights from a single platform.
- **Preventive stolen credential breaches:** Unique dark web scanning to monitor compromised business accounts and credentials.
- **Affordable enterprise security:** Scalable pricing without enterprise-level costs.
- **Intuitive monitoring:** Simple, powerful dashboard with real-time alerts.
- **Prey concierge:** Premium support, white-glove onboarding, and security advisory.

What our customers have to say

Set-it and forget-it device security.

"Quick to set up and easy to use. It adds a level of security that just lets me sleep at night."

Tim P.

Quality, reliability, and exceptional support.

"What I appreciate most is the consistency in meeting our needs."

Sara D.
