Prey is a cross-platform Device Tracking & Security tool to stay in control of remote assets.
It's a service that protects over 8 million devices and their data every day, all around the world.

Prey started in 2009 as a small tech company with a sole purpose: helping people keep track of their devices.
15 years later, our service evolved into a trusted multi-tool for both people and businesses. We are experts at tracking,
protecting and managing your work and play tech tools. And a proud team of people willing to support you.
