### EMPLOYMENT HISTORY

2025 to Present      Solis Marine, Singapore  
Marine Surveyor

Marine surveyor providing local representation for owners and insurers in relation to various shipping incidents and marine casualties in Indonesia. Work includes attendance on site and onboard vessels for damage assessment surveys and coordination of necessary response.

Salvage and wreck removal work includes liaison with local authorities and contractors, management of on-site operations, container and cargo recovery, and pollution response coordination.

For oil removal operations, he has worked closely with salvage contractors to monitor and oversee hot-tapping operations, continuously monitoring the fuel oil extraction process to mitigate any pollution risks.

Afri has also recently managed a self-heating coal cargo case, ensuring compliance with IMSBC Code regulations. Flammable gases were detected inside the cargo holds during loading operations, he advised on the implementation of controlled ventilation and safety measures to bring conditions back within safe condition before cargo loading resumed.

2009 to 2025

Minton Treharne & Davies Pte Ltd, Singapore  
Marine Surveyor, Laboratory Manager

Solid bulk cargo consultant specialising in self-heating coal and cargoes liable to liquefy. Experience with the quality of nickel ore, iron ore fines, bauxite, and mineral concentrates. Work involved attending at site, sampling, and testing.

As MTD Singapore Laboratory Manager, he was responsible for equipment calibration and bulk solid cargo testing for Transportable Moisture Limit, liquid limit, particle size distribution, and density.

He gained further experience as a marine surveyor in a diverse range of cases including distressed cargo management and inspection of damaged containers and containerised cargo. He attended grain and food cargo inspections and sampling of cargo. He also conducted sampling of oil, petroleum, and chemical cargoes and witnessed sample analysis at independent laboratories.

2005 to 2008

PT. Probe Marine Inspection, Indonesia  
Marine Surveyor

Marine surveyor conducting general survey work on behalf of P&I and H&M insurers, shipowners, charterers, and cargo underwriters. Performed vessel inspection, pre-purchase surveys, and collision and grounding investigations. Extensive experience conducting general dry bulk cargo cases, on/off hire and draught surveys, and inspection/investigation of damaged containers and containerised cargoes.

2006 to 2007

PT. Bontuni Shipyard, Kendari, Indonesia  
Shipyard Engineer

Supervising ship repair, maintenance, and new vessel construction, ensuring compliance with international maritime standards. Also responsible for improving shipyard safety and operations, and ensuring that projects were completed on time.
