

Theory of Change

○ Safe Passage Fund

Vision

A world where everyone can self-determine and live with dignity and justice.

Mission

BUILD the collective power of migrant, refugee, asylum-seeking and diaspora communities across Europe by resourcing organising and leadership capacity.

BRIDGE the needs of grassroots organisers to funding and civil society sectors, ensuring that lived experience and local expertise drive meaningful investment and alliances for migrant justice.

Values

Systemic Justice

Care & Resilience

Solidarity

Self-Determination

How we make change

Grantmaking

Provide flexible general operating grants to shift power and trust to those most affected by migration systems, who are best placed to develop solutions rooted in dignity and justice.

Advancing Wider Change

Engage with funding, humanitarian, and civil society actors to advocate for institutional transformation that ensures power is redistributed and conditions are created for impacted communities to organise, lead, and sustain long-term campaigns for justice.

Support that Sustains

Offer tailored support to partners including accompaniment, organi-sational development, cofunding and peer-led learning opportunities. By connecting and conven-ing partners, we help build the skills, relations, and infrastructure that grassroots groups need to thrive.

Learning and Accountability

Use iterative and participatory learning approaches across our programming to ensure that we can be agile, adaptable, and accountable to the communities we serve and uplift.

Core Outcomes

Empowered Communities

Migrant, refugee, asylum-seeking and diaspora communities across Europe have increased resources, capital, and leadership capacity to advocate for their rights and shape their own futures.

Connected Ecosystems

The grassroots migrant justice ecosystem across Europe is increasingly connected, skilled, and resourced, grounded in trans-national solidarity and capable of united action that centers migrant justice as part of a broader commitment to systemic change.
