

WERKSTUDENT VENTURE CAPITAL ANALYST

DIGITAL ECONOMY · EARLY STAGE · MUNICH OFFICE

START · SEPTEMBER 2026

12 MONTHS MINIMUM

20-25 HRS / WEEK

GERMAN & ENGLISH

THE FIRM

Ventech is a founder-led global venture capital firm launched in 1998 in Paris. We invest early in founders who reimagine our society — not just with capital, but with ideas and conviction. Since inception we have backed more than 200 entrepreneurs who have created over \$6bn in enterprise value.

We invest across the digital economy from Paris, Munich, Berlin, Helsinki, Stockholm, Shanghai and Hong Kong. Local intimacy, global scale. Having grown ourselves, we know an entrepreneurial and agile mindset is what lasts. We value teamwork over individual intelligence, and patience and conviction over noise.

MISSION

As an analyst inside our investment team, your responsibilities will include:

- | | |
|--|---|
| 01 Active sourcing of new investment opportunities | 02 Handling of incoming dealflow from the DACH region |
| 03 Occasional support on due diligence | 04 Research on the latest trends in technology, new markets and investing |

05 · AGENTIC DEVELOPMENT

Sit inside the firm, watch how our work really gets done, then build the agents that do it better. You will identify a high-value bottleneck in sourcing, screening or portfolio monitoring, design an agentic AI workflow for it, and ship it into daily use by the team. Not a research project — a tool we run on. No prior engineering track record required; curiosity, taste and a builder's stubbornness are.

WE ARE LOOKING FOR

An innovation financing enthusiast	Prior work experience	Hands-on mindset, fluent with AI tools	Fluent in German and English
------------------------------------	-----------------------	--	------------------------------

Our analyst works closely with the whole investment team, in an international and entrepreneurial setting.
