

Boost Export Profitability With ...

## The Brewery Plastics Transit Layer Board system

Low cost transit packaging for exporting full beer  
containers and long-term empty keg storage

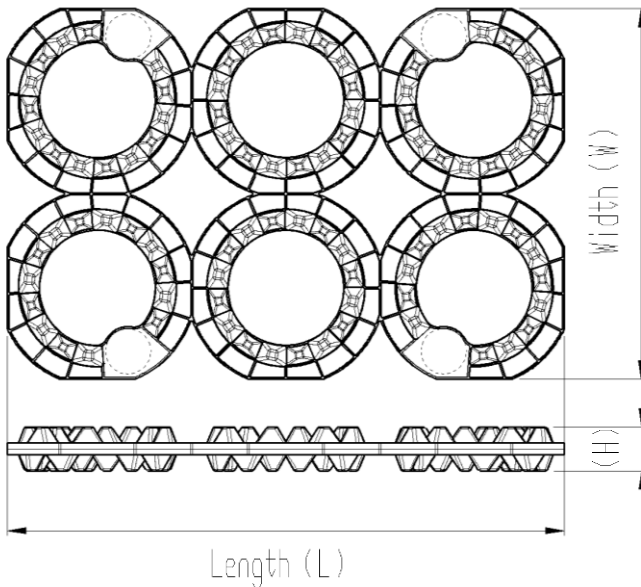

**More containers in less space**

- ❖ Massively increases trucking vehicle payload – up to 30%
- ❖ Save 30% on warehouse floor space
- ❖ Eliminates pallet purchase and maintenance costs
- ❖ Reduces container damage
- ❖ Reduces vehicle turn round time
- ❖ Significantly improves load safety
- ❖ System reduces manual handling and aids health and safety compliance
- ❖ Eliminates shrink-wrapping process

Manufactured from high quality thermoplastic, colour coded if required. Field trials with a mix of mechanical handling systems plus drop and crush tests have proved the durability of the Transit Layer Board system to be far in excess of traditional wooden separators.

# The Brewery Plastics Transit Layer Board system

## Specifications for the GMA footprint TLB:

### Nominal Dimensions (mm)

L	W	H	Load*
48"	40"	3 1/4"	550 Lbs

\*Max load at any one container position

### **3 – 2 – 3 Layout**

For kegs with 15.55" Chimb OD

### **4 – 3 – 4 – 3 Layout**

For kegs with 10.94" Chimb OD

### **4 x 5 Layout**

For kegs with 9.25" Chimb OD

TLB008	3-2-3 Layout	US 1/2 bbl & 1/4 bbl (Pony). EURO 50L & 30L
TLB014	4-3-4-3 Layout	US 1/4 bbl Slim. EURO 30L Slim
TLB020	3 x 5 Layout	US 1/6 bbl Slim. EURO 20L Slim

**Handling:** All current mechanical handling equipment applies

**All Brewery Plastics designs are protected worldwide under CypherCo patents**
