Precisely replicates patient anatomy for accurate diagnosis and predictable custom appliances.

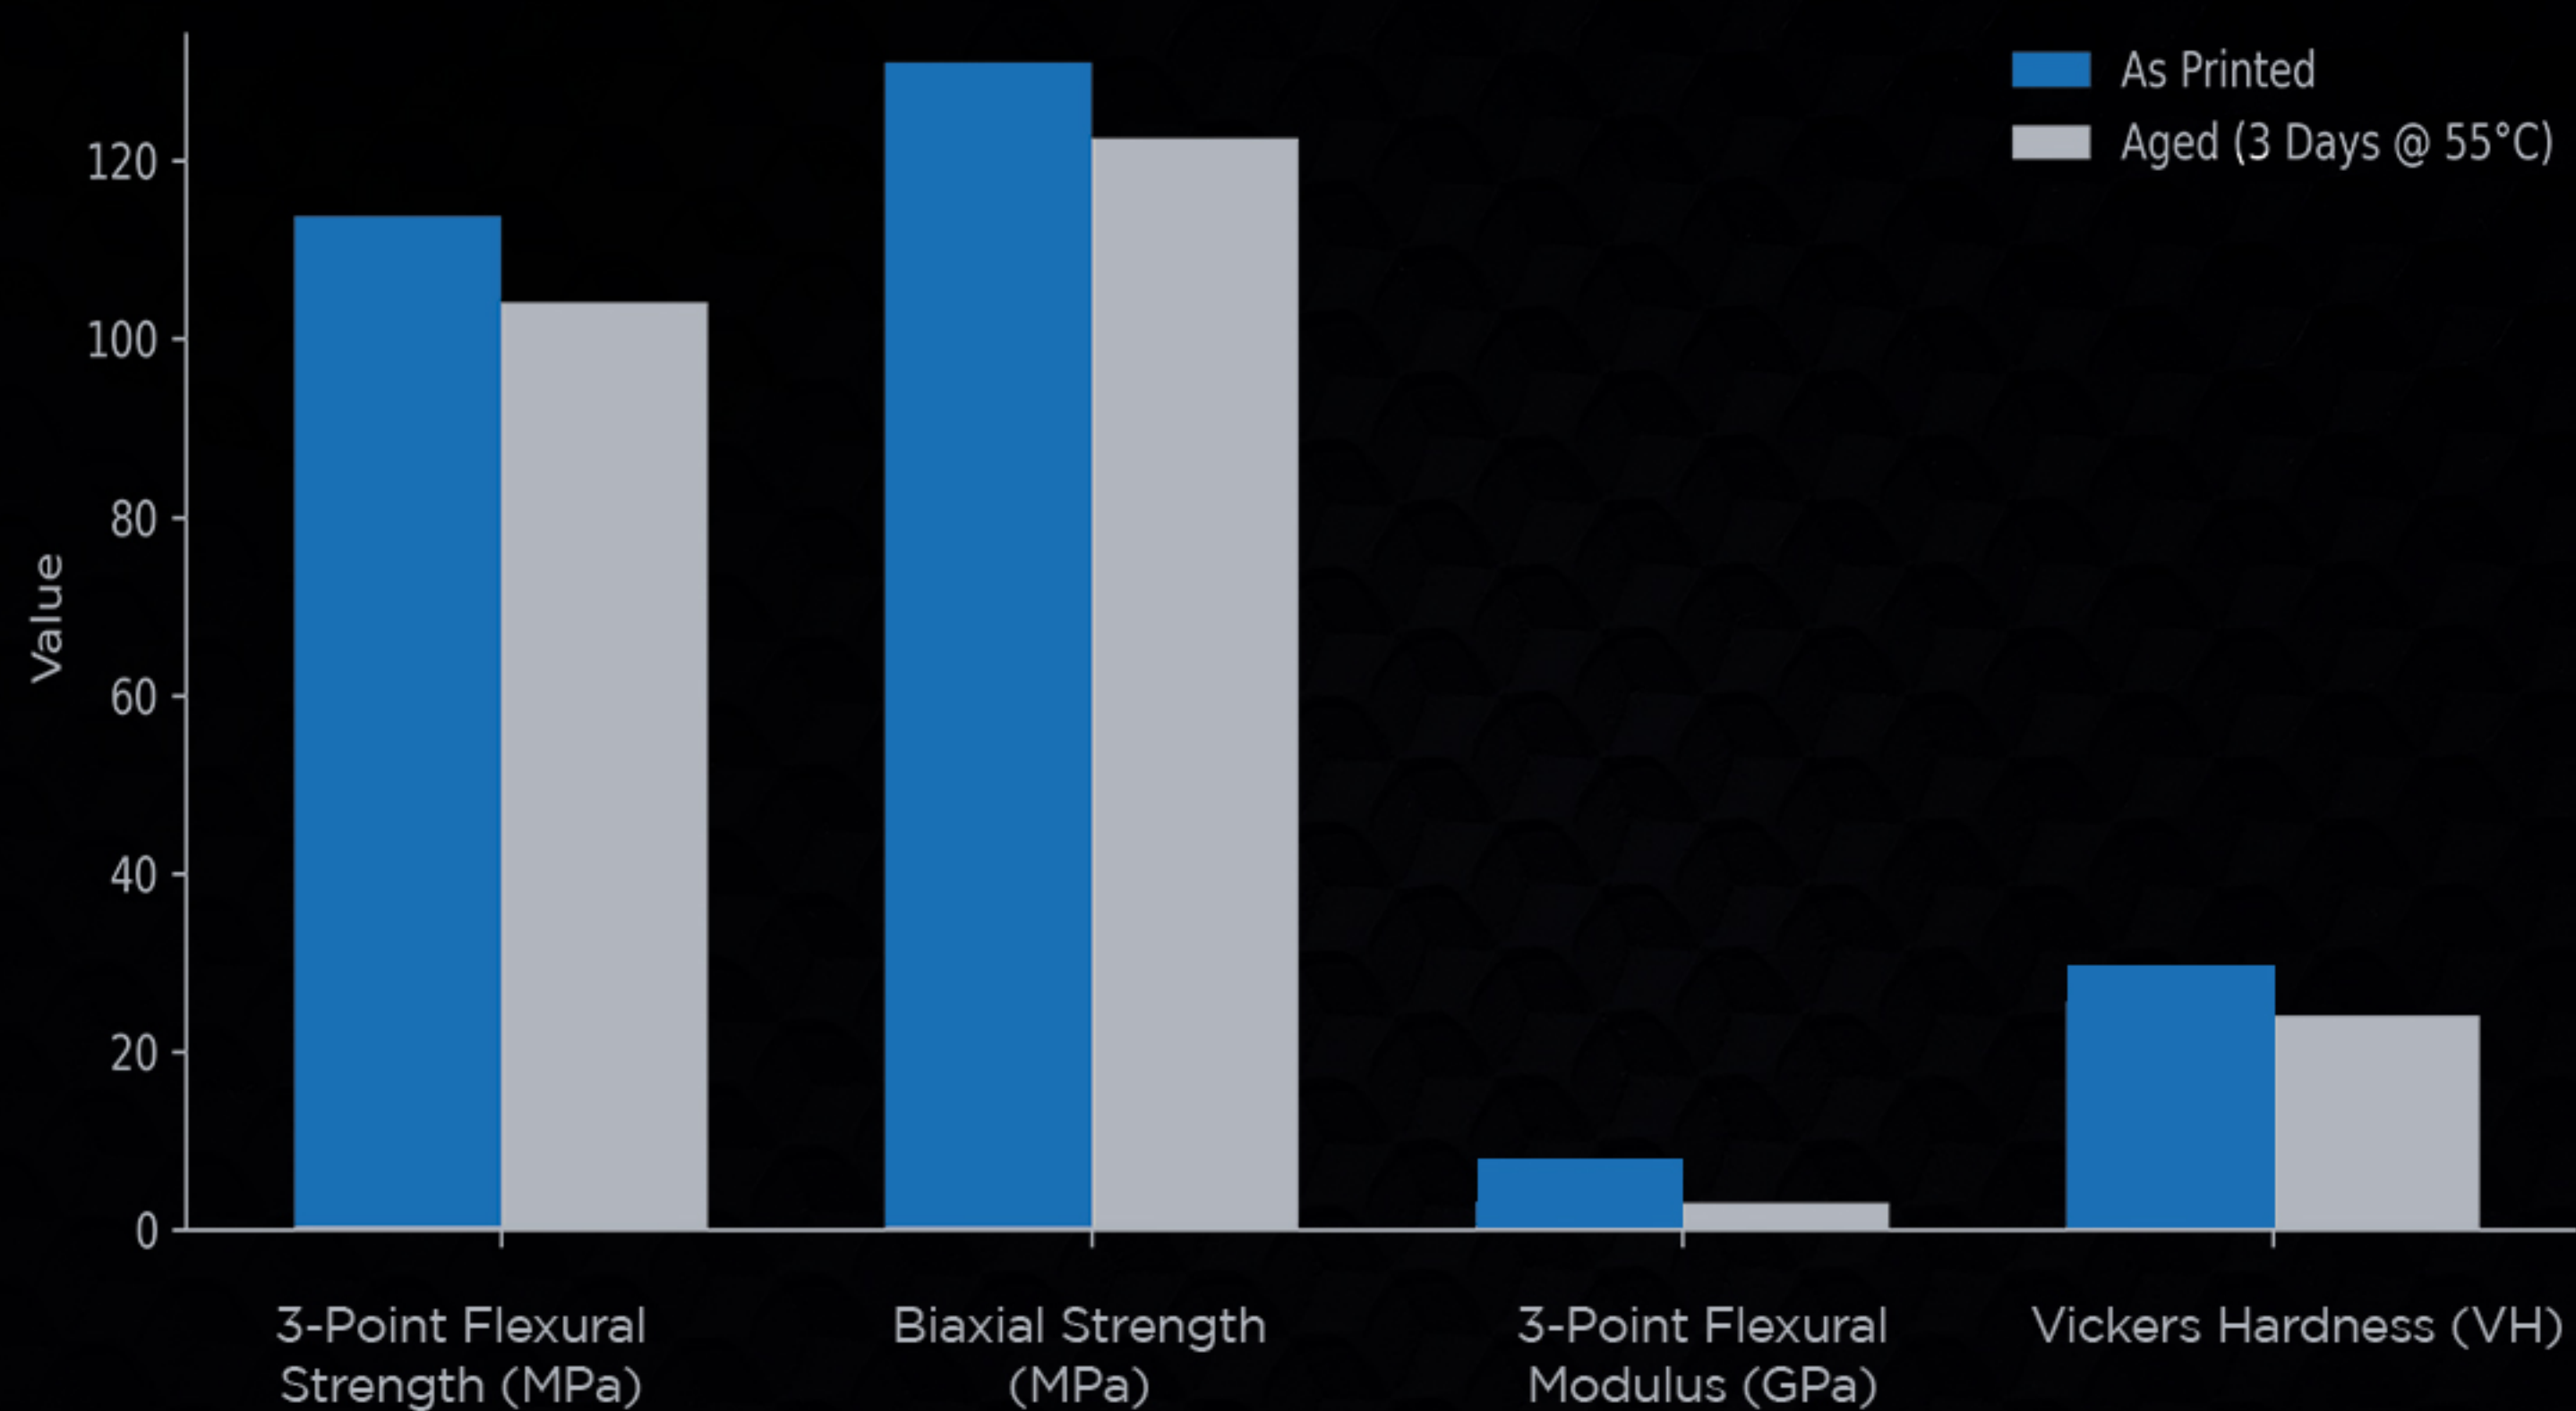

Why TruModel™ Delivers Better Results

- **Efficiency for the Lab:** Streamlined steps reduce handling time while maintaining consistent, repeatable outcomes.
- **Reliability for the Clinician:** Controlled materials and processes support predictable fit, strength, and esthetics.
- **Confidence in Production:** Validated equipment and materials work together to minimize errors, rework, and variability.

TruModel - Material Comparison

Mechanical Performance of TruModel Resin Before and After Aging

Technical Specifications

3-Point Flexural Strength (MPa)	113.78 ± 16.57
3-Point Flexural Modulus (MPa)	3.1 ± 0.6
Vickers Hardness (VH)	25.59 ± 0.23
Shelf Life	3 years

Order Information

Shades	Prime	Gray	Sand
1 kg Bottle	24067	24066	24065
