[Secret Guild of Body Swappers - Chapter 26](#) [ST](#) [HTML](#) by: [tfes8](#) (178) [Details](#)

Added: 06/29/2025 Rating: **R** Complete: **no** File Size: **23.7 kB** Age: [College Age 19-26](#)

Synopsis: All college sophomore Daniel wanted was to stay in his dorm and read a good book, but when his friends ask him to drive them out for a night on the town, he meets a group of women who are not at all what they appear. Suddenly Daniel is recruited for a very exclusive, very secret club of Body Swappers. It might be all fun and games, but what happens when the members start getting greedy and careless? Inspired by Morpheus's The Club.

Resources

Medical and Other Resources for Transsexual Women (Male-to-Female)

Our Purpose Here: This site is designed to empower transsexual women by providing factual information, informed opinion, and personal narrative. I hope these resources will help transsexual women make decisions which will best serve their individual needs.

About the Author: I'm Anne Lawrence, M.D., webmistress of this site. I'm a member of the Harry Benjamin International Gender Dysphoria Association (HBIGDA), where I serve on the Standards of Care Committee. I'm currently a doctoral student at the Institute for Advanced Study of Human Sexuality.

Questions: I am usually unable to answer individual questions by e-mail. (Two exceptions: questions from transsexual teens, and from helping professionals.) If you decide to send a question anyway, please do not take it personally if you do not receive a reply. You may wish to check the [Frequently-Asked Questions](#) page -- the answer to your question may be there.

Telephone Consultations: I am once again offering [telephone consultations](#); this link provides additional information.

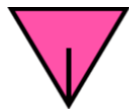

Broken links? Bugs? Outdated information? Other resources to suggest? Please [tell me](#) about them.

Last update: September 13, 1999.

Modern expressions of autogynephilia

- Many reddit communities have been created with growing membership
 - r/autogynephilia (5.6k members): 2010 - present
 - r/askAGP (5.7k members): 2019 - present
 - r/sissyhypno (478k members): 2013 - present
 - r/egg_irl (343k members): 2017- present

Modern expressions of autogynephilia

- Many Twitter/X discussions happening with many self-aware AGPs (mostly informed) and many gender criticals (mostly not as informed)
- Discord servers have also been created, mostly with self-aware AGPs
- Meme culture and terminology slowly developing

Róisín Michaux · 12h

Young AGPs' worship of the IKEA Blahaj stuffed shark has not gone unnoticed by the marketing department.

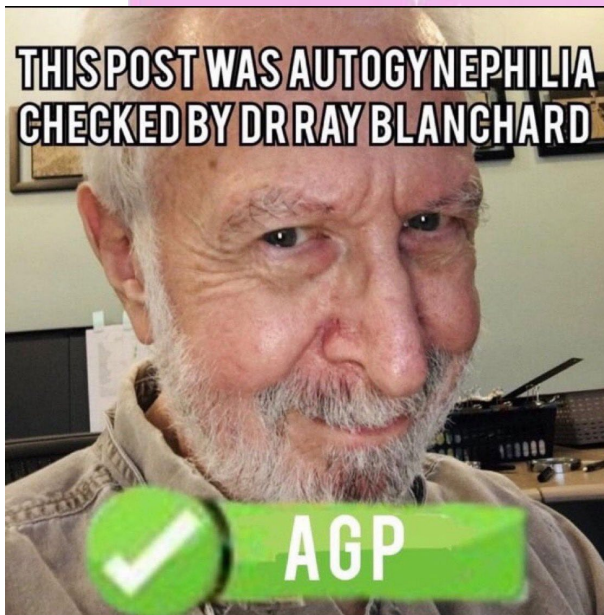

anna !!! :j @frogs4g... · 23h
oh so they know.

The idea of autogynephilia has been widely discredited.

By whom?

Autogynephiles.

GIGAPASSOID

Top 0.1% of trans girls

The crown jewel of trans girls. Began transitioning before puberty and looks gorgeous even by cis girl standards due to perfect runway model genetics. Has likely forgotten they're trans at this point. Does not interact with other trans girls in the hierarchy due to their godlike social status.

YOUNGSHIT PASSOID

Top 5% of trans girls

Transitioned before or during puberty. In rare cases, after. If so, had a weak puberty likely caused by combination of malnutrition and twink genetics. Even then, transitioned at 16 latest.

Might have some traits of androgyny, but is otherwise completely indistinguishable from cis women and gets treated as such. Likely abandoned the trans community a long time ago having grown accustomed to an extravagant cis lifestyle.

PASSOID

Top 15% of trans girls

Could have transitioned at any point in life. Occasionally might have a twink-like male frame due to years of being exposed to testosterone but other than that passes flawlessly.

Is not clockable to cis people who aren't hyper-fixated on passing. You could line up pictures of passoids next to regular cis girls and most people would have a hard time telling one apart from the other.

BOYMODER [SUBCLASS OF PASSOID]

Top 15% of trans girls

Delusionally believes they could never pass despite their appearance. Could ascend to passoidhood at any point, but mental blockage caused by autism prevents this from happening.

Despite having put little to no effort into passing they get mistaken as girls all the time. Still ranks above hons who spend thousands of dollars in surgeries to pass.

TWINKHON

Top 30% of trans girls

Passes most of the time, but still gets clocked. Has a clear twink-like frame that becomes more apparent once you get exposed to the fact they're trans.

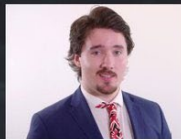

Could ascend to passoidhood with surgeries and weight cycling, especially if transitions at a relatively young age before the ossification of the iliac crest.

HON

Top 70% of trans girls

Sometimes passes to old people who associate long hair with womanhood, but other than that they can easily be clocked even by cis people. Has a male-like frame and a male-like skull. In rare cases their face might pass after facial feminization surgery, but their body most definitely won't.

MAMMODER [SUBCLASS OF HON]

Top 70% of trans girls

Unlike boymoders, it's unlikely mammoders will ever pass, at least not completely. They're no different from hons other than choosing to present themselves as males to the world.

Sometimes boymoders with extreme BPD or other antisocial personality disorders will refer to themselves as mammoders despite their obvious capability to pass.

HECATON

Top 90% of trans girls

Looks like a man in a wig despite their best attempts at passing. Has naturally bulky frame consisting of linebacker shoulders, thranos jaw and a caveman brow ridge. Typically over 6 feet tall. No hips to speak of.

The odds of passing even with facial feminization surgery are extremely low. Will never be referred to as shelter by a stranger. Very likely to hero.

DECE/MONSTERMODER

Top 100% of trans girls

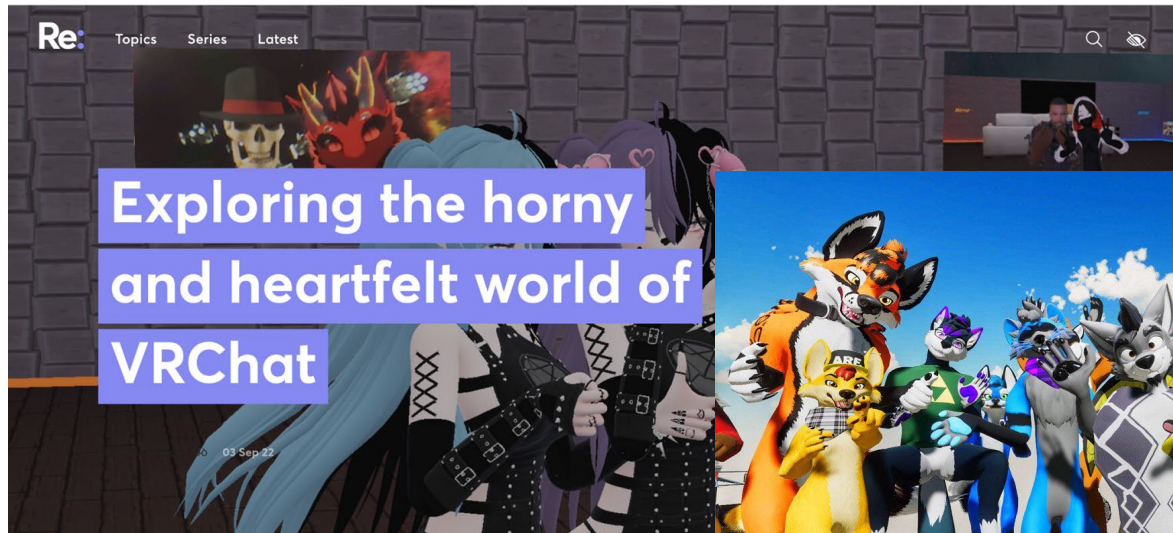

Extremely prominent and masculine features. Could beat most adult men in a cage fight despite sub-50 ng/ml testosterone levels from years of HRT. Has palms the size of a passoid skull. Has all the features of a hon amplified tenfold.

No redemption exists for people in this category. Their existence is despised even by other trans girls due to "bad optics". Will either hero or develop early alzheimer's due to amount of dysphoria-induced stress in their every day life.

Conclusions

- Autogynephilic males have historically expressed themselves through cross-dressing (pre-1990s), and with the advent of the Internet, erotic fiction and other dedicated websites (1990s-2000s)
- Autogynephilic males have more recently expressed themselves through online communities on common social media platforms like Reddit, Twitter/X, and Discord (post-2000s), especially within the last 5 years
- Autogynephilic males have become more creative with their expressions, with technology like virtual reality, artificial intelligence, etc
- Because there are more explicit, varied, and socially accepted ways to express autogynephilia these days, perhaps cross-dressing will slowly be replaced?
- Possible causal pathway: AGP → cross-dressing/cross-gender fantasy → cross-gender identity → cross-gender acceptance → medical/social transition?
