Flow Capital Corp. Management's Discussion and Analysis For the Three Months Ended March 31, 2026

This management's discussion and analysis ("MD&A") of the financial condition and results of operation of Flow Capital Corp. ("Flow", "Flow Capital", or the "Company") should be read in conjunction with Flow's unaudited consolidated financial statements and notes thereto as at and for the three months ended March 31, 2026.

Except as otherwise indicated (see "Non-IFRS Financial Measures"), all financial data in this MD&A has been prepared, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

All dollar amounts in this MD&A are reported in Canadian dollars.

Some of the risks, uncertainties and other factors which could cause results to differ materially from those expressed in this MD&A include, but are not limited to: the nature of the Company's investments; the concentration of its investments in certain industries and sectors; the Company's dependence on its management team; risks affecting the Company's investments; Global, political and economic conditions; issuer-specific events that affect a company's market value; and other risks and factors discussed elsewhere in this MD&A under the heading "Risk Factors". These risk factors are unpredictable and outside the Company's control and may affect the future value of the Company's investment portfolio as well as the prices at which investments may be disposed of. Adverse changes in these conditions would negatively impact the Company's ability to remain in compliance with its contractual obligations and generate working capital to fund its ongoing requirements.

Non-IFRS Measures

This MD&A includes certain measures which have not been prepared in accordance with IFRS Accounting Standards such as recurring free cash flow available to shareholders (rFCF) and book value per share (BVPS). Recurring free cash flow available to shareholders refers to loan interest income less loan amortization income, salaries, benefits and staffing costs, professional fees, office and general administrative and financing expenses. We believe that rFCF is useful supplemental information as it provides an indication of the uncommitted cash flow that is available to shareholders if we do not repay any debts. While we could use the rFCF to pay dividends or repurchase shares, our objective is to use the majority of our rFCF to invest in new investments which meet our hurdle rate and contribute to the continued growth of the business.

rFCF is not a recognized measure under IFRS Accounting Standards and may not be comparable to similar financial measures disclosed by other issuers. Accordingly, readers are cautioned that rFCF should not be construed as an alternative to net cash flows from operating activities. See "Results of Operations — Recurring free cash flow available to shareholders" for a reconciliation of rFCF to loan interest income.

About Flow Capital

Flow Capital provides growth capital primarily to digital businesses with strong management teams, compelling unit economics, rapid growth and high levels of recurring revenue. One of Flow's primary products is venture debt. Venture debt is a form of capital provided to high growth companies, that enables them to finance their growth and avoid the dilutive effect of an equity issue or the personal guarantees, restrictive covenants, and need for amortization payments usually associated with traditional lenders, such as banks. Generally, companies that use venture debt are private and have venture capital backers. They may be profitable or near profitable but choose to delay substantial near-term profitability in order to maximize growth and thus long-term profitability.

Venture debt is an established asset class that is widely used by high-growth borrowers and has seen increasing adoption by retail and institutional investors seeking to diversify their portfolios with a high yielding asset class that is not correlated with the public bond and equity markets.

Flow Capital specializes in Growth Venture Debt as opposed to Traditional Venture Debt. Growth Venture Debt loans are structured with warrants, options, and success fees in addition to interest payments. This contrasts with Traditional Venture Debt where lenders receive only interest payments on a loan.

Flow finances companies in Canada, the U.S., and the U.K. Flow Capital's typical borrower is a profitable or near-profitable technology, or technology enabled company, experiencing rapid expansion, and requiring immediate capital to continue its growth.

Flow generally provides borrowers with funding of \$2 to \$8 million. Flow will invest up to \$10 million in a borrower which can be delivered up front or in a series of tranches, with each tranche subject to additional due diligence and strong borrower performance.

Each investment Flow makes will be structured differently and have conditions particular to the borrower and Flow Capital's assessment of the risk associated with the borrower. However, the general terms of Flow Capital's loans are: senior secured/first lien, a three-year term, non-amortizing, cash interest payments in the mid-teens, and including warrants, options, or a success fee upon the successful sale or IPO of the business.

Warrants issued with a loan usually represent 1% to 3% of the equity value of the borrower.

Flow's loans generate immediate stable and predictable returns, since they pay immediate cash interest at a set rate which exceeds Flow's cost of capital. This creates stable and predictable positive free cash flow for Flow after operating expenses and interest payments on debentures and other debt. This positive free cash flow can be invested in additional loans or used toward other corporate initiatives which build shareholder value.

Flow's loans also generate long term returns via the warrant, and success fees associated with each loan. However, unlike cash interest, the conversion of these elements into cash is long term and unpredictable. Therefore, Flow manages its business based on the recurring revenue it earns from the immediate cash interest payments on its loan portfolio. Flow does not engage in any activities or initiatives whose execution is dependent on the unrealized returns on its equity, warrant, option, and success fee portfolio. Although these returns can be substantial, the unpredictable nature of their realization demands that they be managed in a conservative manner.

Flow aims to grow its business each year. Difficult equity markets create an excellent opportunity for Flow to deploy capital. Flow funds its investments through a combination of the sale of debentures to individual and institutional investors and the reinvestment of its Recurring free cash flow available to shareholders (rFCF) into new investments. Given the attractive interest rate the Company can charge on its loans plus the potential returns from warrants and success fees, the Company expects that rFCF per share and book value per share should continue to grow.

As with any portfolio of loans in a high return asset class, there is expected to be occasional credit losses on certain loans. To account for these potential losses Flow Capital presents its loans receivable, at amortized cost, net of expected credit losses. However, it is the Company's expectation that any loan losses should be more than offset by gains on equity, warrants, and success fees associated with each loan such that Flow should deliver a superior overall portfolio return in the long run.

In addition, management believes that as the business grows operating expenses as a percentage of assets under management should decline and the Company should achieve a lower cost of debt and equity, both trends increasing the profitability of its operations which reinforce the growth of rFCF per share and book value per share.

Overall Performance for the Three Months Ended March 31, 2026

Three months ended March 31, 2026, compared to three months ended March 31, 2025:

- 21% increase in loan interest and royalty income to \$3.5 million from \$2.9 million
- 4% increase in Recurring free cash flow to \$880,759 from \$847,111
- 8% increase in Recurring free cash flow per share to \$0.0300 from \$0.0277
- \$6.5 million in new investments compared to \$3.2 million

Summary of Factors Affecting our Performance

We believe that the growth and future success of our business depends on many factors, including those described below. While each of these factors presents significant opportunities for our business, they also pose important challenges, which are discussed below and in the "Risk Factors" section of this MD&A.

Loan origination and marketing team

Our ability to achieve significant growth in future revenue will largely depend upon the effectiveness of our loan origination and marketing team efforts and success in identifying new loan clients and pricing those loans properly in partnership with our credit analysis team. We continue to evolve our loan origination and marketing team to widen their reach and to embrace new tools made available from artificial intelligence. The goal is to increase the number of new investments we review and to increase the speed and accuracy of our review of their appropriateness to our lending and investment solutions.

Credit analysis and loan monitoring team

Our ability to achieve and maintain significant profitability will largely depend upon the effectiveness of our credit analysis and loan monitoring teams' ability to complete accurate due diligence investigation into new loans, appropriately structure them, and to monitor active loans in order to properly price new loans and minimize credit losses. We will continue to evolve our credit analysis and loan monitoring team and embrace new tools made available from artificial intelligence.

Foreign currency

Our functional and presentation currency is the Canadian dollar. A significant amount of the Company's revenue is in U.S. dollars and a significant portion of the Company's assets are denominated in U.S. dollars. Our U.S. dollar revenues and assets are converted from U.S. dollars to Canadian dollars. As a result, our revenues and assets will be adversely impacted by a decrease in the value of the U.S. dollar relative to the Canadian dollar. See the "Risk Factors" section of this MD&A for a discussion on exchange rate fluctuations and their potential negative effect on our results of operations.

Key Components of Results of Operations

Revenue

Flow's operations generate two sources of revenue from its financial assets: loan interest and royalty revenue.

Loan interest income is largely cash revenue that is contracted by the terms of our loans and is therefore recurring and predictable. The non-cash portion of loan interest revenue consists of amortization over the life of each loan of the value of set-up fees, warrants or other equity received as part of the loan upon closing, and payment-in-kind interest.

In the three months ended March 31, 2026 the non-cash element of loan interest income was \$521,643 of the \$3.5 million in total revenue. Flow calculates rFCF to present its results on a cash only basis.

Financial royalty income is from a single legacy royalty investment. The revenue from this royalty investment represents approximately 5.4% of the total revenues. Flow does not intend to make any future royalty investments.

Operating Expenses

Our operating expenses are:

- Salaries, benefits and staffing costs. These costs are the salaries, cash bonuses, and benefits expenses for our employees and directors. With growth in the Company's revenues and assets, we expect these costs to increase. However, we expect that these costs will decrease as a percentage of revenue and assets.
- Share-based compensation. These costs are comprised of the value of stock options and performance share units granted to employees and directors expensed over the vesting period of the options and units.
- Professional fees. These fees consist of professional fees, listing and filing fees, AGM expenses, legal fees, and consulting fees. With growth in the Company's revenues and assets, we expect these costs to increase. However, we expect that these costs will decrease as a percentage of revenue and assets.
- Office and general administrative. General and administrative expenses are comprised of marketing expenses, membership and subscriptions, business fees and licenses, office expenses and supplies, and rent. With growth in the Company's revenues and assets, we expect these costs to increase. However, we expect that these costs will decrease as a percentage of revenue and assets.
- Expected credit losses. Expected credit losses ("ECL") is the allocation we have made for expected credit losses. ECL increase when a new loan is issued and its associated ECL is added to the Company's total ECL or when a loan declines in credit quality and management decides to increase the ECL associated with that loan. Conversely, when a loan is paid off in full, the loan's associated ECL is removed, and the Company shows a recovery in ECL. ECL changes are non-cash until such time as a loan matures and an actual credit loss, if any, is recorded and is then reconciled with the ECL carried.
- Financing expense. The interest expense of the Company's bank debt and debentures and the dividends on its preferred shares. With growth in the Company's revenues and assets and the Company maintaining or increasing its leverage, these expenses will continue to increase.

Gains/losses and Other Income Items

- *Gains (losses) from changes in the value of financial assets.* Gain and losses on financial assets is the non-cash change in the fair market value of the loans, warrants, success fees, common shares and preferred shares, and equity related assets that Flow holds. Generally, gains and losses on financial assets are driven by the Company's equity portfolio. Since the equity portfolio is mostly in the warrants and equity of high growth technology companies, the fair market value of Flow's equity portfolio tends to be more volatile than broad market equity indices.
- *Foreign exchange gains and losses.* As at March 31, 2026, \$64.7 million, representing 72%, of the Company's assets are denominated in U.S. dollars and approximately \$36.9 million, representing 70% of the Company's debt is denominated in U.S. dollars. Therefore, the Company may report material gains and losses in foreign exchange at each reporting period because of changes in the U.S. Canadian dollar exchange rate. However, this is largely a non-cash expense. A foreign exchange gain or loss is only realized upon the maturity or sale of a U.S. denominated asset, or upon the repayment of U.S. denominated debt.

Results of Operations

The following table outlines our consolidated statements of comprehensive income (loss) for the three months ended March 31, 2026 and March 31, 2025.

Results of Operations (Unaudited)	Three months ended Mar 31, 2026	Three months ended Mar 31, 2025	Period-over- period Change (\$)	Period-over- period Change %

Review of the Three Month and 12 Months Ended March 31, 2026, and 2025

Revenue

Revenue Analysis	Three Months Ended March 31st			
	2026	2025	Change \$	Change %
Loan interest income	\$ 3,328,807	\$ 2,628,499	\$ 700,308	27%
Financial royalty income	188,436	275,642	(87,206)	-32%
	3,517,243	2,904,141	613,102	21%
Fair Value gains/(losses) from changes in the value of financial assets	(395,953)	(90,570)	(305,383)	
Total Revenue and net investment gains	\$ 3,121,290	\$ 2,813,571	\$ 307,719	11%

Loan interest income and royalty income increased 21% to \$3.5 million from \$2.9 million in the three months ended March 31, 2026, compared to the three months ended March 31, 2025.

Total revenue increase was driven primarily from a 28% increase in Flow's loan and royalty investments to \$73.6 million on March 31, 2026, from \$57.7 million on March 31, 2025, and secondarily by a positive movement in the U.S. Canada dollar exchange rate.

Flow experienced volatility in the valuation of its financial assets which are largely warrants and equity securities in high growth technology companies. In the three months ended March 31, 2026 these assets declined \$395,953 compared to a decline of \$90,570 in the prior period. Such valuations changes are not unusual given the nature of these assets.

	Three Months Ended							
	June 30, 2024	September 30, 2024	December 31, 2024	March 31, 2025	June 30, 2025	September 30, 2025	December 31, 2025	March 31, 2026
Investments: loans and royalty	\$ 45,451,832	\$ 54,470,586	\$ 57,678,923	\$ 57,678,923	\$ 66,385,760	\$ 69,284,896	\$ 66,904,231	\$ 73,612,779
Average Investments: loans and royalty	\$ 44,560,004	\$ 49,961,209	\$ 56,074,755	\$ 57,678,923	\$ 62,032,342	\$ 67,835,328	\$ 68,094,564	\$ 70,258,505
Gross revenue from financial assets	\$ 2,112,885	\$ 2,484,110	\$ 2,703,077	\$ 2,904,141	\$ 3,244,233	\$ 3,426,270	\$ 3,583,694	\$ 3,517,243
Change from previous quarter	5.4%	17.6%	8.8%	7.4%	11.7%	5.6%	4.6%	-1.9%
Annualized yield on average investment	14.6%	15.9%	15.7%	15.1%	19.2%	18.6%	16.3%	15.6%

Over the last seven quarters Flow's loan interest income and royalty income have grown to \$3.5 million from \$2.1 million, a compound annual growth rate (CAGR) of 30%.

This growth was a result of Flow's loan and royalty assets growing to \$73.6 million on March 31, 2026 from \$45.5 million on June 30, 2024, a CAGR of 29%.

From June 30, 2024 through March 31, 2026, Flow has maintained an annualized yield on average loan and royalty assets of between 14.6% to 19.2%.

Operating Expenses

Operating Expenses Analysis	Three months ended March 31, 2026	Three months ended March 31, 2025	Change \$	Change %
	2026	2025		
Total investments	\$ 80,337,229	\$ 63,359,983	\$ 16,977,246	26.8%

Operating Expenses	Three Months Ended March 31st			
	2026	2025	Change \$	Change %
Expected credit losses (recovery)	\$ 384,528	\$ (41,236)	\$ 425,764	NA
Financing expense	1,055,813	820,238	235,575	29%
Salaries, benefits, and staffing costs	626,444	606,399	20,045	3%
Restructuring cost	-	-	-	
(Gain) on loan modification	-	310,986	(310,986)	NA
Share-based compensation	32,810	52,804	(19,994)	-38%
Professional fees	200,064	169,685	30,379	18%
Office and general administrative	281,874	219,691	62,183	28%
Total Operating Expenses	\$ 2,581,532	\$ 2,138,567	\$ 442,965	21%

Flow's total investment assets grew 27% during the three months ended March 31, 2026 to \$80.3 million from \$63.4 million.

Operating expenses for the three months ended March 31, 2026, compared to the three months ended March 31, 2025, increased by 21% to \$2.6 million. This increase was primarily driven by higher financing expenses associated with the growth in the Company's investment portfolio, as well as an increase in expected credit losses, which were \$384,528 in the current period compared to a recovery in the prior year period. Professional fees increased in line with the growth in assets, while office and general administrative expenses increased as the Company made additional investments in technology and data services.

Operating Expenses as a Percentage of Investments	Three months ended March 31, 2026	Three months ended March 31, 2025
Total investments	\$ 80,337,229	\$ 63,359,983
Expected credit losses (recovery)	0.5%	-0.1%
Financing expense	1.3%	1.3%
Salaries, benefits, and staffing costs	0.8%	1.0%
(Gain) on loan modification	0.0%	0.5%
Share-based compensation	0.0%	0.1%
Professional fees	0.2%	0.3%
Office and general administrative	0.4%	0.3%
Total operating expenses	3.2%	3.4%

Overall, as a percentage of Flow's investment portfolio, total operating expenses were lower at 3.2% of investment assets down from 3.4% in the prior year period, reflecting operating leverage.

While most operating costs will increase over time as the Company's investment portfolio grows, management expects that operating costs will continue to drop as a percentage of its investment assets.

	Three months ended March 31, 2026	Three months ended March 31, 2025	Change \$	Change %
Financing Expense	\$ 1,055,813	\$ 820,238	\$ 235,575	29%
Preferred shares outstanding	\$ 1,100,001	\$ 1,100,001	-	
Revolving credit facility outstanding	17,617,911	4,312,800	13,305,111	
Redeemable debt outstanding	32,639,934	29,922,949	2,716,985	
Total obligations	\$ 51,357,846	\$ 35,335,750	\$ 16,022,096	45%

Financing expense for the three months ended March 31, 2026 compared to the three months ended March 31, 2025 was up 29% to \$1.06 million which was consistent with the Company's use of additional leverage to make additional investments during the 12-month period.

Gains/losses and Other Income

	Three months ended March 31,		Three months ended March 31,		
Gains/losses and Other Income	2026		2025		Change \$
Other interest, fee income, and gains	\$	3,182	\$	7,408	\$ (4,226)
Foreign exchange gains (losses)	\$	489,816	\$	(89,376)	\$ 579,192
Total Gains/(losses) and Other Income	\$	492,998	\$	(81,968)	\$ 574,966

Most of Flow's investments are in U.S. denominated loans and equity securities, therefore the company is subject to non-cash foreign exchange gains and losses each reporting period based on the conversion of the carrying value of the Company's U.S. dollar denominated financial assets into Canadian dollars.

Income Taxes

The Company recognized deferred tax expense of \$211,581 for the three months ended March 31, 2026, versus \$159,155 in 2025.

Net Income and Earnings per Share

For the three months ended March 31, 2026 earnings per share was \$0.028 compared to \$0.014 in the three months ended March 31, 2025.

Recurring Free Cash Flow per Share

	Three months ended March 31,		Three months ended March 31,			
	2026		2025		Change \$	Change %
Recurring Free Cash Flow (rFCF)	\$	880,759	\$	847,111	\$ 33,649	4%
rFCF per share	\$	0.0300	\$	0.0277	\$ 0.0024	9%

Recurring free cash flow ("rFCF") and rFCF per share for the three months ended March 31, 2026, were \$880,759 million and \$0.0300, respectively, compared to the three months ended March 31, 2025, of rFCF and rFCF per share of \$847,111 million and \$0.0277, respectively.

Recurring Free Cash Flow Available to Shareholders (“rFCF”) Reconciliation

The following table reconciles rFCF to loan interest and royalty revenue.

Reconciliation of recurring free cash flow to loan interest revenue	Three months ended March 31, 2026	Three months ended March 31, 2025
Loan interest and Financial Royalty Income	\$ 3,517,243	\$ 2,904,141
Loan amortization income	521,643	278,951
Salaries, benefits, and staffing costs	626,444	606,399
Professional fees	200,064	169,685
Office and general administrative	281,874	219,465
Transaction cost amortization	(49,354)	(37,707)
Financing expense	1,055,813	820,238
Recurring free cash flow (rFCF)	\$ 880,759	\$ 847,111

Amortization income increased to **\$521,643** for the three months ended March 31, 2026, compared with **\$278,951** for the three months ended March 31, 2025. The increase was primarily attributable to the addition of new loans and several loan modifications completed after the first quarter of 2025, which resulted in higher amortization income recognized during the period.

Portfolio Update – loans and royalty

	Three months ended March 31, 2026			
	Royalty agreements acquired	Equities and warrants in investee companies	Loans receivable	Total
Balance as at December 31, 2025	\$ 1,780,832	\$ 6,586,752	\$ 65,123,399	\$ 73,490,983
Proceeds from royalty settlement and loans receivable	-	-	(630,348)	(630,348)
Sale of investment	-	-	-	-
Gain/(loss) on Loan modification	-	-	-	-
Advances for loans originated	-	-	5,993,648	5,993,648
Purchase of equity instruments	-	464,054	-	464,054
Change in interest receivable	-	-	241,822	241,822
Foreign exchange impact on the investment portfolio	30,274	69,597	936,038	1,035,909
Loan amortization income	-	-	521,643	521,643
Adjustment to fair value / expected credit losses	-	(395,953)	(384,528)	(780,481)
Balance as at March 31, 2026	\$ 1,811,106	\$ 6,724,450	\$ 71,801,673	\$ 80,337,229

As of March 31, 2026, Flow’s investment portfolio included one legacy royalty with a fair market value of \$1.8 million. Flow does not intend to make future royalty investments.

As of March 31, 2026 the equity securities held by the company had a fair market value of \$6.7 million versus \$6.6 million on December 31, 2025. These securities include; preferred shares, common shares, common share purchase warrants, and success fees earned upon the sale of a business.

The company may obtain equity, warrants/options, and/or contingent success fees with each loan agreement it enters into with a borrower. The company also makes occasional equity investments in companies or venture capital funds where it believes the likely return exceeds its hurdle rate and where the investment will offer strategic advantages. These investment assets are redeemed or converted into cash from time to time when the company believes such conversion offers an appropriate return.

During the three months ended March 31, 2026, the Company acquired new equity investments with a fair value of \$464,054. This increase was partially offset by unrealized losses on existing investments of \$395,953 and a positive non-cash foreign exchange impact of \$69,597.

Management anticipates changes in the fair value of its equity securities each period since equity securities in growth companies' are by their nature volatile in fair value.

As of March 31, 2026, Flow's investment portfolio was valued at \$80.3 million an increase of \$6.8 million from \$73.5 million at December 31, 2025, driven primarily by \$6.4 million in new loans and equity, offset by 630,348 in loan repayments, a \$1 million non-cash foreign exchange adjustment, and \$780,481 in expected credit losses and fair value adjustment to equity.

Summary of Quarterly Results

	June 30, 2024	September 30, 2024	December 31, 2024	March 31, 2025	June 30, 2025	September 30, 2025	December 31, 2025	March 31, 2026
Loan interest and Financial Royalty Income	\$ 2,112,885	\$ 2,484,110	\$ 2,703,077	\$ 2,904,141	\$ 3,244,233	\$ 3,426,270	\$ 3,583,694	\$ 3,517,243

Total income tax (expense) recovery	(105,224)	110,291	825,201	(159,155)	662,695	(460,793)	(651,870)	(211,581)
Net income (loss)	\$ 189,971	\$ (752,121)	\$ (1,010,624)	\$ 433,881	\$ (1,472,539)	\$ 1,243,498	\$ 742,864	\$ 821,175

From the three months ended June 30, 2024 to the three months ended March 31, 2026, the Company's loan interest and royalty revenue increased overall from \$2.1 million to \$3.5 million, reflecting growth in the Company's investment portfolio.

Liquidity and Capital Resources

	As at March 31, 2026	As at March 31, 2025
Cash	\$ 1,211,934	\$ 1,533,998
Investments at fair value	80,337,229	63,359,983
Debt - Revolving credit facility	17,617,911	4,312,800
Debt - Redeemable debentures	32,639,934	29,922,949
Cash and investments less debt	\$ 31,291,318	\$ 30,658,232

The Company maintains access to a \$34.8 million senior revolving credit facility, which it uses to meet short-term cash needs associated with closing new investments and meeting debenture retraction obligations. As of March 31, 2026, the credit facility was drawn to \$17.6 million. The credit facility is secured against all present and after-acquired property of the Company, has a maturity date in August 2027 and an interest rate based on the Secured Overnight Financing Rate (SOFR) plus a commercially reasonable credit spread.

The Company also issues floating rate retractable debentures to institutional and individual investors. As at March 31, 2026, \$32.6 million in debentures were outstanding. The Company intends to continue issuing these debentures to fund the acquisition of new investments.

As of March 31, 2026, the Company's cash balance and investment portfolio, at fair value, exceeded the total of its debt by \$31.3 million, compared to \$30.7 million as at March 31, 2025.

Contractual obligations at March 31, 2026

Contractual obligations at March 31, 2026	On demand	1 year	1-3 Years	3-5 years	More than 5 years	Total
Accounts payable and accrued liabilities	\$ -	\$ 1,074,726	\$ -	\$ -	\$ -	\$ 1,074,726
Redeemable debenture and interest	32,641,136	-	-	-	-	32,641,136
Revolving credit facility and interest	-	1,537,328	18,258,464	-	-	19,795,792
Series 1 Preferred Shares and interest	-	467,867	859,210	-	-	1,327,077
Total	\$ 32,641,136	\$ 3,079,921	\$ 19,117,674	\$ -	\$ -	\$ 54,838,731

None of the Company's investments incorporate a commitment to invest additional funds. All investments made by the Company are discretionary and are made subject to the investment meeting or exceeding the Company's hurdle rate and the Company having access to sufficient funds to close the investment.

Flow expects to be able to meet all of its current and non current financial obligations as they become due, by utilizing some or all of the following sources of liquidity available to the Company: (i) cash on hand, (ii) cash flows generated from operations, (iii) loan repayments upon maturity, (iv) current credit facilities under the stipulated terms of the agreement, (v) refinancing or amendments to current credit facilities, (vi) issuance of debentures, and (vii) alternative financing.

Flow monitors forecasted liquidity requirements to ensure it can meet operational needs through sufficient availability of both cash and credit facility capacity, while also ensuring Flow is able to meet its financial covenants related to debt agreements.

Flow only makes incremental investments in new loans consistent with the ability to meet its ongoing obligations.

Off-balance Share Arrangements

As at March 31, 2026, Flow Capital had no commitments for material capital expenditures and no off-balance sheet arrangements.

Transactions Between Related Parties

Key Management Compensation

	Three months ended March 31, 2026	Three months ended March 31, 2025
Short term employee benefits	\$ 336,697	\$ 249,167
Share-based compensation	30,989	31,579
Total	\$ 367,686	\$ 280,746

In addition to salaries, the Company also provides long-term compensation to employees of its subsidiaries in the form of options, performance stock units, and bonuses. Key management personnel compensation paid in the three months ended March 31, 2026 was \$367,686 compared to \$280,746 in the prior period. The increase in the short term employee benefits during the three-month ended March 31, 2026 is due to the addition of two officers on March 17th, 2025.

Other Transactions

On June 28, 2022, Company issued the first tranche of its Series I Class A preferred shares. As at March 31, 2026, 166,667 preferred shares with a face value of \$500,001 (2025 - \$500,001) were held by a director, and interest of \$11,342 was accrued and expensed on these preferred shares during the three months ended March 31, 2026 (2025 - \$11,342).

On August 31, 2022, the Company advanced loans to two Directors in the total amount of \$26,559. On June 28, 2023, the Company advanced an additional \$120,758 as loans to the two Directors. These loans in the total amount of \$147,317 remain outstanding on March 31, 2026. For the three months ended March 31, 2026, the Company earned interest income on these loans in the amount of \$1,090 (2025 - \$1,453) at the CRA prescribed rate.

On August 1, 2023, the Company issued first tranche of its Debentures of multiple class. As at March 31, 2026, \$4,549,981 (December 31, 2025 - \$4,538,447) of the debentures was held by key management personnel and an affiliated company with common directors, and interest of \$96,151 was accrued and expensed on the debentures held by related parties, during the three months ended March 31, 2026 (2025 - \$101,080).

Internal Controls over Financial Reporting

The Company's management, including the Chief Executive Officer and the Chief Financial Officer, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgements in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Critical Accounting Estimates and Policies

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument to another entity. The Company has classified and measured all financial assets, other than receivables and promissory notes, at fair value through profit and loss. Promissory notes, and financial liabilities such as accounts payable are classified and measured at amortized cost.

As at March 31, 2026, the maximum credit exposure for all financial assets excluding cash and cash equivalents and equity securities in investee companies was \$73,921,369 (December 31, 2025: \$67,169,410). The Company has foreign currency exposures to United States dollars. The transaction exposure will be minimized by converting all foreign currency to Canadian dollars or using the funds for investments made in the United States. The Company is aware that a translation exposure exists and will continue to monitor the impact on its reported results and take the required hedging action when management considers it necessary. The net foreign exchange exposure at March 31, 2026 was \$39.6 million (December 31, 2025: \$34.2 million).

The Company holds equity investments in listed and unlisted entities. The equity investments include both common shares and warrants. For shares and warrants listed on a recognized stock exchange and traded actively, the fair value of the shares held was determined by reference to the closing share price. For unquoted equity investments, the fair value was determined using the valuation technique referred to as the market approach which uses transaction prices paid for an identical or similar instrument or comparable company valuation multiples. During the three months ended March 31, 2026, the impact from adjustments to fair value of equity investments recognized in comprehensive income was a loss of \$395,953.

As at March 31, 2026 and December 31, 2025 there were no cash equivalents.

All financial liabilities are measured using amortized cost.

Other than investments in share purchase warrants, at March 31, 2026 the Company does not hold any other financial derivatives either for hedging or speculative purposes.

An allowance for expected credit losses (“ECL”) on loans recorded at amortized cost, is determined based on a modeled assessment of the credit risk of counterparties to loans receivable and the risk that a counterparty fails to meet their contractual obligations. An estimate of expected credit losses is determined based on changes in credit quality and qualitative factors, estimation of a 12-month expected loss provision on current performing loans, and an estimate of lifetime losses for under-performing or non-performing loans. The model includes consideration of future macroeconomic impacts on the loan portfolio. Changes to the ECL are recorded in operating expenses. Any changes in the estimates or inputs utilized to determine the ECL allowance could result in a significant impact on the Company’s future operating results or on other components of book value.

Outstanding Share Data

The Company is authorized to issue an unlimited number of common shares, without nominal or par value, and 2,252,252 Series I Class A preferred shares with a face value of \$3 per share. and no other classes of shares.

As of April 13, 2026, there were issued and outstanding: (a) 29,303,363 Common Shares; (b) 366,667 Series I Class A Preferred Shares; (c) 2,697,759 options under the company’s stock option plan to acquire common shares, at a weighted average exercise price of \$0.5843; (d) 1,325,834 Performance Stock Units tied to certain performance and market-based metrics for vesting.

14. Risk Factors

An investment in the Company’s securities should only be considered by those investors who can afford a total loss of their investment. The risks presented below should not be considered as exhaustive and may not represent all the risks that the Company may face. Additional risks and uncertainties not presently known to the Company or that the Company currently considers immaterial may also impair the Company’s business operations. If any of the risks described below or in the Company’s other public filings occur (including the risks discussed in the management information circular of the Company) the Company’s business, financial condition, results of operation or prospects could be materially adversely affected and the Company’s ability to satisfy its obligations, pay dividends or continue as a going concern could be threatened.

Dependence on the Performance of Investee Companies

The Company will be dependent on the operations, assets and financial health of the companies to which loans are advanced. The ability to meet operating expenses in the long-term will be largely dependent on the loan interest received from investee companies and realized gains on exits which will be the primary sources of cash flow. Loan interest payments will generally be based as a percentage of the principal amount advanced. The failure of any investee company to fulfill its loan interest obligations could adversely affect the Company’s results of operations, prospects or cash flow and could threaten the Company’s business, financial condition, ability to satisfy its obligations, pay dividends, or continue as a going concern. The Company conducts due diligence on each of its investee companies prior to entering into agreements with them and monitors investee company activities by receiving and reviewing regular financial reports. Nonetheless, there is a risk that there may be some liabilities or other matters that are not identified through the due diligence or ongoing monitoring that may have an adverse effect on an investee company’s business, and this could have a material adverse impact on the Company’s business, financial condition, results of operations or prospects and could threaten the Company’s ability to satisfy its obligations, pay dividends or continue as a going concern.

Limited Number of Investee Companies and Concentration Risk

The Company has advanced funds for promissory notes and loan agreements from a small number of investee companies to date. While the intention is to make promissory notes investments in numerous companies in different technology and technology related industry sectors, it will take time to attain such diversification, if such diversification can be achieved at all. Until further diversification is achieved, the Company may have a significant portion of its assets dedicated to a single business sector or industry. In the event that any such business or industry is unsuccessful or experiences a downturn, this could have a material adverse effect on the Company’s business, financial condition, and results of operations or prospects and could threaten the Company’s ability to satisfy its obligations, pay dividends or continue as a going concern.

Limited Control Over Investee Company Management

Although loans do contain covenants and security provisions in the Company’s favour, the Company does not have significant influence or control over any of the investee companies or their operations as the Company does not mandate board representation as a condition to investment. Interest payments received from the investee companies therefore depend upon several factors that may be outside of the Company’s control.

Risk of Payment Defaults under Promissory Notes

While the Company believes that the Company has structured, and will continue to structure promissory notes in such a way as to encourage payment of interest and discourage default, there is no guarantee that investee companies will not default on their interest payment obligations as a result of business failure, obligations to shareholders, obligations

to lenders or to other investors or stakeholders, or that on the occurrence of a default by an investee company the Company will be able to recover all or any of the investment. Such failure could have a material adverse effect on the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations or pay dividends.

Equity Risk

Equity risk is the potential for financial loss on shares held by the Company from declines or volatility in equity market prices. The Company's equity risk relates to all the shareholdings held by the Company. Accordingly, the Company has further exposure to equity risk as adverse fluctuations in the market value of such assets will result in corresponding adverse impacts on our revenue and profits.

Volatility of Share Price

Securities markets throughout the world are cyclical and, over time, tend to undergo high levels of price and volume volatility. A publicly traded company will not necessarily trade at values determined by reference to the underlying value of its business. The prices at which the Company's listed securities will trade cannot be predicted. The market price of the Company's listed securities could be subject to significant fluctuations in response to variations in quarterly and annual operating results, the results of any public announcements the Company makes, general economic conditions, and other factors. Increased levels of volatility and resulting market turmoil may adversely impact the price of the Company's listed securities. If as the Company expects, the Company is required to access capital markets to carry out its development objectives, the state of domestic and international capital markets and other financial systems could affect the Company's access to, and cost of, capital. Such capital may not be available on terms acceptable to the Company or at all, and this could have a material adverse impact on the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern.

Financing Risks

The Company has some history of earnings from operations. Due to the nature of the Company's business, there can be no assurance that the Company will always be profitable. While the Company may generate additional working capital through equity or debt offerings or through the receipt of interest payments from the Company's investee companies, there is no assurance that such funds will be sufficient to facilitate the development of the Company's business as currently planned or, in the case of equity financings, whether such funds will be available on terms acceptable to us or at all.

Outstanding Debt

Certain features of the Company's outstanding debt could adversely affect the Company's ability to raise additional capital, fund operations or pay dividends, could expose the Company to interest rate risks or limit the Company's ability to react to changes in the economy and its industry, or could prevent the Company from meeting certain of its business objectives.

Dilution

The Company may be required to conduct additional equity financings to finance additional loan investments and develop the Company's business as currently planned, if suitable credit facilities are not available. Any further issuance of equity shares pursuant to such equity financings will dilute the interests of existing shareholders, and existing shareholders will have no pre-emptive rights in connection with any such future issuances.

Ability to Negotiate Additional Promissory Notes

A key element of the Company's growth strategy involves writing promissory notes to new investee companies. The Company's ability to identify investee companies and acquire additional promissory notes is not guaranteed. Achieving the benefits of future investments will depend in part on successfully identifying and capturing such opportunities in a timely and efficient manner and in structuring such arrangements to ensure a stable and growing stream of revenues.

Ability to Manage Future Growth

The ability to achieve desired growth will depend on the Company's ability to identify, evaluate and successfully negotiate new promissory notes from investee companies. Achieving this objective in a cost-effective manner will be a product of the Company's sourcing capabilities, the management of the investment process, the ability to provide capital on terms that are attractive to potential investee companies and the Company's access to financing on acceptable terms. As the Company grows, the Company will also be required to hire, train, supervise and manage new employees. Failure to effectively manage any future growth or to successfully negotiate suitable new promissory notes could have a material adverse effect on the Company's business, financial condition, and results of operations or prospects and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern.

Exercise of Prepayment Option on Loans

Most loan agreements with investee companies contain or will contain prepayment options which allow investee companies to prepay the loan by paying an interest penalty.

While the prepayment provisions are designed to produce enhanced returns, if the Company has miscalculated the value of a buyout relative to the ongoing value of a lost loan interest stream, the return on an investment may be lower than expected, which could have a material adverse effect on the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations or pay dividends. In addition, if the lost loan interest stream is not replaced with a new loan interest stream on a timely basis, there will be a reduction in the Company's revenues in the financial periods following the exercise of the prepayment which could have a material adverse effect on the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations or pay dividends.

Risks Facing Investee Companies

As previously noted, the financial condition and results of operations will be affected by the performance of the companies in which the Company invests capital through loan investments. Each investee company will also be subject to risks which will affect their financial condition. Given that the Company is not privy to all aspects of the businesses in which we will make future investments, it is impossible to predict exactly what risks investee companies will face. Nonetheless, the Company expects that typical risks which companies might face include the following:

- Investee companies may need to raise capital through equity or debt financing. Such equity or debt may impair the ability of the investee companies to finance their future operations and capital needs. Flexibility to respond to changing business and economic conditions and to business opportunities may thereby be limited.
- The success of the Company's investee companies may depend on the management talents and efforts of one or two persons or a small group of persons. The death, disability or resignation of one or more of these persons could have a material adverse impact on an investee company.
- Investee companies may require additional working capital to carry out their business activities and to expand their businesses. If such working capital is not available, the financial performance and development of the businesses of the investee companies may be adversely affected.
- Damage to the reputation of the brands of the investee companies could negatively impact consumer opinion of those companies or their related products and services, which could have an adverse effect on their businesses.
- Investee companies may face intense competition, including competition from companies with greater financial and other resources, more extensive development, manufacturing, marketing, and other capabilities. There can be no assurance that the investee companies will be able to successfully compete against their competitors or that such competition will not have a material adverse effect on their businesses.
- Investee companies may experience reduced revenues with the loss of a customer representing a high percentage of their monthly revenues.
- Investee companies may experience reduced revenues due to an inability to meet regulatory requirements or may experience losses of revenues due to unforeseeable changes in regulations imposed by various levels of government.
- Investee companies may rely on government or other subsidy programs for revenue or profit generation. Changes or elimination of such programs may have an adverse effect on the company.
- Investee companies may derive some of their revenues from non-domestic sources and may experience negative financial results based on foreign exchange losses.

Impact of Regulation and Regulatory Changes

The Company and investees are subject to a variety of laws, regulations, and guidelines in the jurisdictions in which the Company and investees operate and may become subject to additional laws, regulations and guidelines in the future in such jurisdictions. The financial and managerial resources necessary to ensure such compliance could escalate significantly in the future which could have a material adverse effect on the business, resources, financial condition, results of operations and cash flow of the Company and the investee companies and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern. Such laws and regulations are also subject to change, and it is impossible for us to predict the cost or impact of changes to such laws and regulations on its future operations.

Foreign Account Tax Compliance

The *Foreign Account Tax Compliance Act* ("**FATCA**") is U.S. tax legislation that came into effect on July 1, 2014. FATCA generally imposes certain U.S. reporting and information gathering requirements, as well as a 30 percent withholding tax applied to certain payments received by a "foreign financial institution". Specifically, with respect to a Canadian entity, FATCA (as modified by the intergovernmental agreement between Canada and the United States, the "**IGA**", and the *Income Tax Act* (Canada) and the regulations thereunder (the "**Tax Act**")) requires a "reporting Canadian financial institution" to, amongst other things: (a) report to the Canada Revenue Agency (the "**CRA**") certain information regarding its U.S. holders and certain U.S. persons that indirectly hold interests in such reporting Canadian financial institution (other than equity and debt interests that are regularly traded on an established securities market); and (b) comply with certain reporting, verification, due diligence and other procedures established by the U.S. Internal Revenue Service (the "**IRS**") and/or the CRA.

Further, unless a reporting Canadian financial institution complies with the FATCA reporting requirements (as modified by the IGA), it may be subject to 30 percent tax on certain payments it receives from U.S. withholding agents.

A Canadian entity that is not a financial institution generally will be a non-financial foreign entity ("NFFE"). An NFFE does not have registration requirements on the IRS portal but may face a similar 30 percent FATCA withholding on certain payments unless it provides certain documentation to applicable withholding agents.

Pursuant to the IGA, the Tax Act and published CRA guidance, we may be a reporting Canadian financial institution. We will continuously monitor any future guidance from the IRS and/or the CRA and will comply with any future changes in guidance as they relate to us to ensure that we are fully compliant with any differing or additional requirements that such guidance may dictate.

Tax Matters

The validity and measurement of tax benefits associated with various tax positions taken or expected to be taken in our tax filings are a matter of tax law and are subject to interpretation. Tax laws are complex, and their interpretation requires significant judgement. The provision for income taxes reflects management's interpretation of the relevant tax laws and its best estimate of income tax implications of the transactions and events during the period. There can be a risk that tax authorities could differ in their interpretation of the relevant laws and could assert that tax positions taken by the Company give rise to a need for reassessment, including reassessment under specific or general anti-avoidance rules.

The assessment of additional taxes, interest and penalties or damage to the Company's reputation could be materially adverse to our future results of operations or financial position.

Under the liability method of accounting for income taxes, deferred tax assets are recognized for the carry forward of unused tax losses and tax credits, as well as amounts that have already been recorded in the financial statements but will not result in deductible amounts in determining taxable income until future periods. Deferred tax assets are recognized only to the extent that it is probable that taxable profit will be available against which the future tax deductions and unused tax losses can be utilized.

At the end of each reporting period, we must assess the value of our deferred tax assets. The determination of our deferred tax assets is dependent upon projections of future taxable profits. Our projections require significant judgements and estimates about future events, including global economic conditions and the future profitability of the business. If the profitability of our business is lower than our projections or if our outlook diminishes significantly, we may be required to reduce the value of our deferred tax assets. Any change to our deferred tax assets could have a material adverse impact on our future results of operations or financial position.

From time to time, there are changes to statutory corporate income tax rates. These changes require the Company to review and re-measure our deferred tax assets and liabilities as of the date of substantive enactment. Any future tax rate decreases could result in a reduction in the carrying value of the deferred tax asset and a corresponding income tax expense at the time of substantive enactment of a rate reduction.

PFIC Status for U.S. Investors

Generally, unfavourable rules may apply to U.S. investors who own and dispose of securities of a PFIC for any year during which the U.S. investor holds such securities (regardless of whether the company continues to be a PFIC), including, without limitation, increased tax liabilities under U.S. tax laws and regulations and additional reporting requirements. Specifically, if a non-U.S. entity is classified as a PFIC, any gain on disposition of securities of a PFIC and any "excess distribution" received by a U.S. holder would be: (i) deemed to have been earned ratably over the period such holder owns such securities; (ii) taxed at ordinary income tax rates; and (iii) subject to an interest charge for the deemed deferral in payment of the tax.

A non-U.S. entity will be a PFIC for any taxable year in which either (i) at least 75% of its gross income is passive income, or (ii) at least 50% of the value (determined on the basis of a quarterly average) of its assets is attributable to assets that produce or are held for the production of passive income.

The Company has not made, and does not expect to make, a determination as to whether it is or has ever been a PFIC. Consequently, there can be no assurance that the Company has never been a PFIC or will not become a PFIC for any tax year during which U.S. investors hold securities of the Company.

U.S. investors are urged to consult their own tax advisors regarding the possible application of the PFIC rules and the consequences of holding securities of the Company if the Company is treated as a PFIC for any taxable year in which a U.S. investor holds its securities.

Competition from Other Investment Companies

The Company competes with a number of venture debt funds, mezzanine funds, commercial banks, and venture capital funds, and other sources of financing, including the public capital markets. Some of the Company's competitors are substantially larger and have considerably greater financial resources than the Company does. Competitors may have a lower cost of funds and many have access to funding sources and unique structures that are not available to the

Company. In addition, some of the competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments than the Company. Pressure from the Company's competitors may have a material adverse effect on the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern.

Impact of Quarterly and Annual Financial Reporting

There can be no assurance that the Company will be profitable on a quarterly or annual basis. The business strategies may not be successful. As a reporting company, the Company will be required to report financial results on an annual and quarterly basis. If the Company's business is not profitable, the market price of the Company's shares may decline.

Payment of Dividends

There is uncertainty with respect to future dividend payments by the Company and the level thereof. Holders of the Company's common shares do not have a right to dividends on such shares unless declared by the Board of Directors of the Company. The declaration of dividends is at the discretion of the Board of Directors of the Company, even if the Company has sufficient funds, net of its liabilities, to pay such dividends, and the declaration of any dividend will depend on the Company's financial results, cash requirements, future prospects and other factors deemed relevant by the Board of Directors of the Company.

Currency Fluctuations

Certain of the Company's interest payments may be paid and received in United States dollars and potentially other foreign currencies. The Canadian dollar relative to the United States dollar or other foreign currencies is subject to fluctuations. Failure to adequately manage foreign exchange risk could therefore adversely affect the Company's business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations or pay dividends.

Reliance on Key Personnel

The Company's success will depend on the abilities, experience, efforts and industry knowledge of the Company's senior management and other key employees. The long-term loss of the services of any key personnel for any reason could have a material adverse effect on business, financial condition, results of operations or prospects and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern. In addition, the growth plans may require additional employees, increase the demand on management and produce risks in both productivity and retention levels. The Company may not be able to attract and retain additional qualified management and employees as needed in the future. There can be no assurance that the Company will be able to effectively manage growth, and any failure to do so could have a material adverse effect on the Company's business, financial condition, results of operations or prospects.

Conflicts of Interest

Certain of the Company's directors and officers will also serve as directors and/or officers of other companies. Consequently, there exists the possibility for such directors and officers to be in a position of conflict. Any decision made by any of such directors and officers will be made in accordance with their duties and obligations to deal fairly and in good faith with a view to the best interests of the Company and its shareholders. In addition, each of the directors is required to declare and refrain from voting on any matter in which such director may have a conflict of interest in accordance with the procedures set forth in applicable corporate legislation and under other applicable laws and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern.

Effect of General Economic and Political Conditions

The Company's business, and the business of each of its investee companies, is subject to the impact of changes in national economic conditions including, but not limited to, recessionary or inflationary trends, equity market conditions, consumer credit availability, interest rates, consumers' disposable income and spending levels, job security and unemployment, and overall consumer confidence. These economic conditions may be further affected by political events throughout the world that cause disruptions in the financial markets, either directly or indirectly. Adverse economic and political developments could have a material adverse effect on the business, financial condition, results of operations or prospects of the Company and its investee companies and could threaten the Company's ability to satisfy its obligations, pay dividends or continue as a going concern.

Sale of Common Shares by Existing Shareholders

If the Company's shareholders sell substantial amounts of the Company's shares in the public market, the market price of the Company's shares may decline.

Legal Proceedings

In the normal course of business, the Company may be subject to lawsuits, claims, regulatory proceedings, and litigation for amounts not covered by the Company's liability insurance. Some of these proceedings could result in significant costs, whether or not resolved in the Company's favour.

Analyst Reports

The trading price of the Company's common shares will be influenced by the research and other reports that industry or securities analysts publish about it, its business, its market or its competitors. If any of the analysts who cover the Company changes his or her recommendation regarding the Company's stock adversely or provides more favourable relative recommendations about the Company's competitors, the Company's stock price would likely decline. If any analyst who covers the Company were to cease such coverage or fail to regularly publish reports on the Company, the Company could lose visibility in the financial markets, which in turn could cause the stock price or trading volume to decline.

Accounting Policies and Methods

The accounting policies and methods the Company utilizes determine how the Company reports its financial condition and results of operations, and they may require management to make estimates or rely on assumptions about matters that are inherently uncertain. Such estimates and assumptions may require revisions, and these changes may materially adversely affect the Company's business, financial condition, and results of operations or prospects. The Company accounts for its investments in financial assets under IFRS Accounting Standards, which requires that certain investments be measured at fair value through profit or loss rather than amortized cost. Changes in the fair value of certain investments are recognized in consolidated comprehensive income (loss) reflecting market conditions. The Company may have to amend the valuation of its investment in an investee company if the value of such investee company declines, which could have a material adverse effect on the Company's business, financial condition, results of operations or prospects.

16. Forward-Looking Information

This MD&A and documents incorporated by reference contain certain "forward-looking information" within the meaning of applicable Canadian securities legislation and may also contain statements that may constitute "forward-looking statements" within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking information and forward-looking statements are not representative of historical facts or information or current condition, but instead represent only the Company's beliefs regarding future events, plans or objectives, many of which, by their nature, are inherently uncertain and outside of the Company's control. Generally, such forward-looking information or forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or may contain statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "will continue", "will occur" or "will be achieved". The forward-looking information contained herein may include, but is not limited to, information with respect to: prospective financial performance; including the Company's opinion regarding the current and future performance of its portfolio, expenses and operations; anticipated cash needs and need for additional financing; anticipated funding sources; future growth plans; loan investments; estimated operating costs; estimated market drivers and demand; business prospects and strategy; anticipated trends and challenges in the Company's business and the markets in which it operates; the Company's ability to pay dividends in the future and the amount and timing of those dividends; and the Company's financial position. By identifying such information and statements in this manner, the Company is alerting the reader that such information and statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance, or achievements of the Company to be materially different from those expressed or implied by such information and statements.

An investment in securities of the Company is speculative and subject to a number of risks including, without limitation, risks relating to: the need for additional financing; the Company's ability to pay dividends in the future and the timing and amount of those dividends; the relative speculative and illiquid nature of an investment in the Company; the volatility of the Company's share price; the Company's limited operating history; the Company's ability to generate sufficient revenues; the Company's ability to manage future growth; the limited diversification in the Company's existing investments and the concentration of a significant amount of the Company's invested capital in a small number of investments; the Company's ability to negotiate additional loan investments from new investee companies; the Company's dependence on the operations, assets and financial health of its investee companies; the Company's limited ability to exercise control or direction over investee companies; potential defaults by investee companies and the unsecured nature of the Company's investments; the Company's ability to enforce on any default by an investee company; competition with other investment entities; tax matters, including the potential impact of the Foreign Account Tax Compliance Act on the Company; the potential impact of the Company being classified as a Passive Foreign Investment Company ("PFIC"); reliance on key personnel; dilution of shareholders' interest through future financings; changes to the Company's accounting policies and methods; and general economic and political conditions, and the risks discussed herein. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking information and forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended.

In connection with the forward-looking information and forward-looking statements contained in this MD&A, the Company has made certain assumptions. Assumptions about the performance of the Canadian and U.S. economies over the next 24 months and how that will affect the Company's business and its ability to identify and close new opportunities with new investees are material factors that the Company considered when setting its strategic priorities and objectives, and its outlook for its business.

Key assumptions include, but are not limited to: assumptions that the Canadian and U.S. economies relevant to the Company's investment focus, will remain on recession watch over the next 12 months; that while interest rates have increased dramatically in the past few quarters, and may increase further over the next few quarters, the subsequent moves will be more tempered; that the Company's existing investees will continue to make interest payments to the Company as and when required; that the businesses of the Company's investees will not experience material negative results; that the Company will continue to grow its portfolio in a manner similar to what has already been established; that tax rates and tax laws will not change significantly in Canada and the U.S.; that more small to medium private and public companies will continue to require access to alternative sources of capital; and that the Company will have the ability to raise required equity and/or debt financing on acceptable terms. The Company has also assumed that access to the capital markets will remain relatively stable, that the capital markets will perform with normal levels of volatility and that the Canadian dollar will not have a high amount of volatility relative to the U.S. dollar. In determining expectations for economic growth, the Company primarily considers historical economic data provided by the Canadian and U.S. governments and their agencies. Although the Company believes that the assumptions and factors used in preparing, and the expectations contained in, the forward-looking information and statements are reasonable, undue reliance should not be placed on such information and statements, and no assurance or guarantee can be given that such forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information and statements.

The forward-looking information and forward-looking statements contained in this MD&A are made as of the date of this MD&A, and the Company does not undertake to update any forward-looking information and/or forward-looking statements that are contained or referenced herein, except in accordance with applicable securities laws. All subsequent written and oral forward-looking information and statements attributable to the Company or persons acting on its behalf is expressly qualified in its entirety by this notice.
