

Do you have innovative ideas in data science & quantitative modelling?

Win a shot
at real-world
application within
the sports analytics
industry

10 star

10star Innovation Lab

The 10star Innovation Lab is a programme for undergraduate and graduate students who want to build, test and pitch new ideas in data science and quantitative modelling within the sports analytics industry.

Rather than shadowing existing work, Lab participants will ideate, research and build solutions to real, open-ended problems with a view to pitching your findings to our data science and trading professionals for a shot at real-world testing.

How the Lab works

A live problem, not a case study

Each participant can explore areas of their own interest across a range of sports

Work how you choose

Participants can work individually or in groups, at times that suit them

Validate in real life scenario

Pitch your findings and, if it passes criteria, we will bring to real-world testing with the strongest ideas considered for adoption

Who we're looking for

**Strong academic
performance in a
mathematical discipline**

**Experienced using
coding languages
and/or AI tools**

**Comfortable working
both independently or
collaborating in a group**

**A genuine curiosity about
sport, data, and testing
new ideas, happy to be
wrong and iterate quickly**

What you'll gain

Mentorship & coaching

Work with experienced data scientists and quants and learn how to sharpen your technical and analytical skills for real world application

Cross-functional exposure

Collaborate with professionals across analytics, engineering and product, and build relationships that can shape your future career

Ownership of a real project

Take a genuine problem from discovery through to a working prototype: your work isn't shelved, it's presented

Complete flexibility

The programme is structured by you and your own requirements

Upside for winning ideas

Share rewards of successful projects

10 star

Timeframe & location

- **Timeframe**
September 2026 – August 2027
- **Location**
Fully remote, work from wherever suits you

Application process

- **Register your interest**
Candidates should submit their resume and a cover letter outlining their interest in the Innovation Lab to careers@10star.com with the subject line "Innovation Lab Application"
- **Next steps**
Shortlisted candidates will be contacted with further details
