

# Designers: Join Our Shortlist for Upcoming Projects

We believe that great talent doesn't always align with a specific calendar. Instead of waiting for a traditional job opening to appear, we want to hear from you now so we're ready to hit the ground running when the right project arrives.

**This isn't a typical job posting; it's an open invitation.** Our project needs move fast, and we want to have a shortlist of incredible designers we already know and love when things scale up.

## Our Design Needs

We're always looking for quality work across our various platforms. Whether you're a specialist in one area or work across them all, we'd love to see what you can do in:

- **Web Design:** High-converting landing pages and responsive sites.
- **Product & App UI:** Intuitive interfaces for our software and mobile apps.
- **Social Media:** Templates and assets that make a brand stand out.

## How to Connect

Since this is about getting on our radar rather than applying for a specific opening, **please skip the long cover letter.** We want to jump straight to your work and save the deep-dive conversations for when the timing is right.

**Please send a brief email to ([storm@tmrrwinc.ca](mailto:storm@tmrrwinc.ca)) with:**

1. **Your Portfolio:** A link to your website, Behance, or recent case studies.
2. **Your Location:** Let us know where you're based. We are remote-friendly, but **being able to join us [in our office](#)** is a plus.
3. **Current Situation:** Are you looking for freelance projects, a full-time role, or are you just open to hearing about the right thing down the road?

---

## What Happens Next?

If your style aligns with our vision, we'll reach out to introduce ourselves. From there, we'll keep you top-of-mind as new projects and positions evolve.

---

## About Tmrrw

We are a creative agency and builder studio. We handle a wide range of client projects—from high-end websites to brand identities—but we also build our own products. Specifically, we are the team behind [Welcome Platform](#), a product born out of our builder studio, [Tmrw Labs](#).

We sit at the intersection of service and product, meaning there is always something interesting being built here.
