

POWERTRON®

MANUAL TRANSFER SWITCHES (MTS)

MANUAL, NON-FUSED, WITH CENTER-OFF POSITION

The switches listed are rated 100% capacity, continuous duty.

POWERTRON MTS provide economical, reliable, and safe transfer of loads between main power and auxiliary source.

UL1008 manual transfer switches come standard in a NEMA Type 4/12 powder-coated steel wall-mount enclosure; 4X-316 stainless steel enclosures are also available. Add 'SS' to the end of the part number for stainless steel options. [Example: 5102SESS]

The compact mechanism is completely enclosed, and the rotary operator handle is mounted on the door and lockable in three positions: On Line, Off, and On Auxiliary.

Available for single phase and three phase power. All 2-pole and 3-pole models have a solid neutral bar, and 4-pole models have a switched neutral on the fourth pole.

Lugs are factory installed for connection to switch poles.

Factory installed auxiliary contacts for remote ON/OFF signaling or electrical interlocking.

**Total System Transfer Amperage - Suitable for control of motors, electric discharge lamps, tungsten filament lamps and electric heating equipment where the sum of motor full-load ampere ratings and the ampere ratings of other loads do not exceed the ampere rating of the switch and the tungsten load does not exceed 30 percent of switch rating.

SIRCOVER UL 98/1008

The SIRCOVER UL 98/1008 can also be used as switching means to a temporary power supply in emergency systems (systems needed for human safety) as described in article 700.3(F) of the NEC (see example: “switching means and interlock”).

Example of connection for temporary or portable power (1). (1) National Fire Protection Agency, NFPA 70: National Electrical Code®. 2017 Edition. Quincy, MA: National Fire Protection Agency, 2016, p. 70-581.
