

RONK METERING CENTER

METER-RITE SIDE-BY-SIDE DOUBLE-THROW / METER SOCKET COMBO - GRADE LEVEL

RONK's new Meter-Rite Side-by-Side combines reliable switching capability with integrated utility metering in a single unit. Engineered to simplify installations while delivering the durability and performance contractors and utilities expect from RONK, this innovative design integrates a double-throw manual transfer switch alongside a utility-grade meter socket within a single NEMA 3R aluminum enclosure.

Available in either 200 Amp or 400 Amp configurations, the Side-by-Side is built for 240V single phase service lines, making it ideal for residential, agricultural, and light commercial applications requiring dependable power transfer with utility-approved metering capabilities.

This grade level, pedestal-mounted unit streamlines installation by eliminating the need for multiple enclosures while maintaining RONK's high standards for safety and quality. The unfused design ensures minimal maintenance and straightforward operation, while the tamper-resistant NEMA 3R aluminum enclosure provides reliable protection from weather and environmental conditions, ensuring long-lasting field performance even in harsh climates.

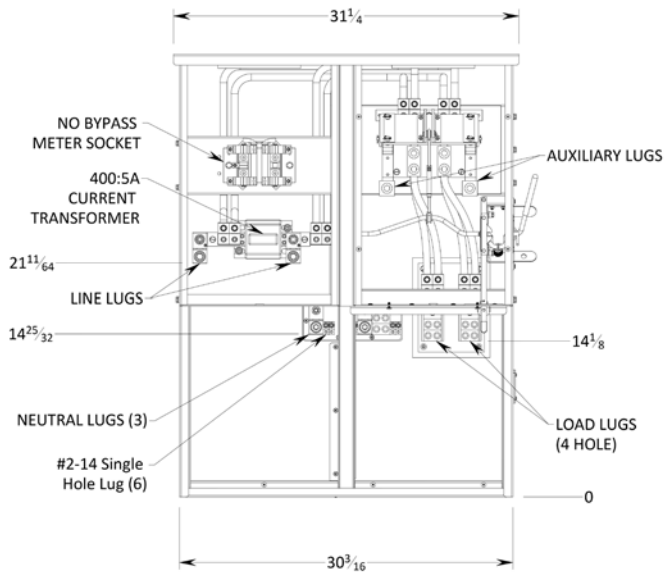

Whether installed for backup power systems, generator connections, or critical farm and utility applications, the Side-by-Side offers a practical, space-saving solution that reduces labor time and increases system reliability. As with all RONK products, the Meter-Rite Side-by-Side is built to meet rigorous utility and contractor standards, ensuring your installation is code-compliant, durable, and backed by over 75 years of trusted electrical expertise.

FEATURES AND BENEFITS

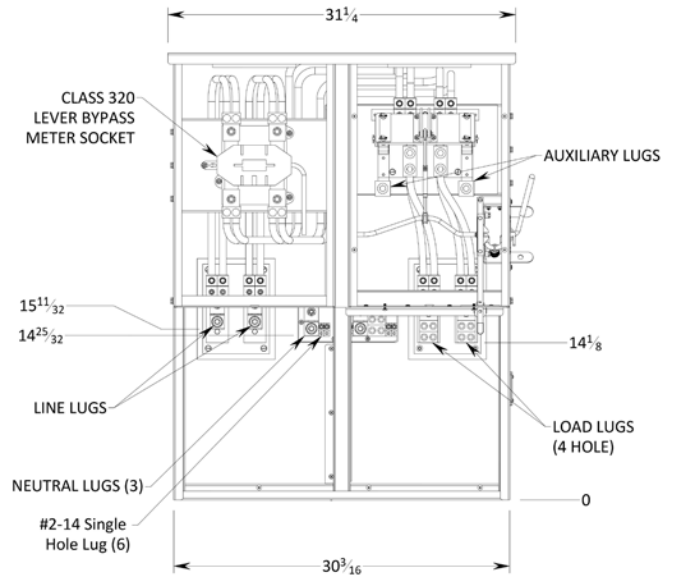

- Integrated double-throw switch with utility-approved meter socket in a single enclosure
- Available in 200 Amp or 400 Amp configurations
- 240V single phase service line compatibility
- Pedestal mount for secure grade-level installation (Wall mount adaptor plate available)
- NEMA 3R aluminum enclosure for harsh weather durability
- Unfused design for minimal maintenance and easy operation
- Ideal for residential, agricultural, and utility service applications

Grade Level Double-Throw / Meter Socket Combo Unit				
Part Number	Amperage Rating	Breaker	Bypass Type	Load Lug
MRP-7406MS	400A	25k	CT 400:5 (No Bypass)	4-Hole Load Lug
MRP-7410MS	400A	25k	Class 320 Lever Bypass	4-Hole Load Lug
MRP-7215MSL	200A	25k	Lever Bypass	4-Hole Load Lug
MRP-7215MSH	200A	25k	Horn Bypass	4-Hole Load Lug
