

RONK

ELECTRICAL INDUSTRIES

AGRICULTURE

• **Roto-Con Center Pivot Phase Converter** • **Rotoverter Rotary Phase Converter** • **Meter-Rite Double-Throw Switch**

RONK

YOUR PARTNER IN AGRIBUSINESS

MARKET OVERVIEW

Modern agriculture depends on reliable electrical power for irrigation systems, grain handling, feed processing, and livestock operations. Power interruptions or inefficient equipment can disrupt critical workflows and create costly downtime during planting and harvest seasons. Farmers, contractors, and co-ops need solutions that deliver consistent performance in demanding rural environments.

WHY RONK FOR AGRICULTURE

For more than 75 years, RONK has been a trusted name in rural power solutions. Our products are engineered to perform in agricultural settings where conditions are tough, demands are high, and downtime is not an option. With rugged construction and proven reliability, RONK provides solutions that help farmers maximize uptime, efficiency, and safety across their operations.

FEATURES AND BENEFITS

- **Durable Construction:** Heavy-gauge, NEMA rated, aluminum enclosures resist rust and weather, ideal for outdoor farm use.
- **Trusted Reliability:** Field-proven designs keep equipment running through harvest and beyond.
- **Ease of Use:** Simple, straightforward products that contractors and operators can rely on.
- **Application Versatility:** Products tailored to irrigation, grain drying, livestock safety, and backup power.

PRODUCT SPOTLIGHT

- **Roto-Con Rotary Phase Converter** - Provides dependable three phase power for center pivot irrigation systems.
- **Rotoverter Rotary Phase Converter** - Trusted solution for grain elevators, grain dryers, and feed processing equipment.
- **Meter-Rite Double-Throw Switches** - Safe, reliable manual transfer switches for barns, shops, and outbuildings needing generator backup.
- **Blocker Stray Voltage Isolator** - Protects livestock from stray voltage, improving animal safety and productivity.
- **Power Factor Correction Capacitors** - Improves energy efficiency, stabilizes voltage, and reduces utility penalty fees for high-demand facilities. (large water pumps / irrigation)
- **Add-A-Phase Static Phase Converter** - Provides balanced three phase power for motor loads and industrial equipment where only single phase service is available. (water pumps)
- **Roto-Load Center** - Integrates a rotary phase converter with a 3Ø transformer, creating a complete package for powering motors and equipment in demanding environments. (grain dryers / irrigation pumps / agricultural processing equipment)

ABOUT RONK

With over 75 years of experience, RONK Electrical Industries delivers trusted, reliable, and innovative power solutions. From rotary phase converters to transfer switches, RONK products are designed to perform in the most demanding agricultural environments. Farmers and contractors across the country rely on RONK to keep their operations moving.
