

METER-RITE®

METER SOCKET LOAD MANAGEMENT

PRODUCT OVERVIEW

The Meter-Rite® Meter Socket Load Management unit is designed to provide a reliable, code-compliant solution for service entrance and load control applications. Engineered for three phase, four wire systems, this innovative product combines a built-in meter socket with integrated load management capabilities in a single, compact enclosure.

Housed in a durable aluminum, NEMA 3R-rated enclosure, the Meter-Rite Meter Socket Load Management unit is built for outdoor wall mounting and long-term performance in challenging environments. The design incorporates a 7-jaw bypass meter socket to simplify service continuity during maintenance or meter replacement, ensuring minimal downtime and safe operation.

At its core, the unit features a 277V contactor switch, delivering dependable load switching and management for commercial and light industrial applications. This built-in functionality reduces the need for additional equipment, streamlining installation and saving valuable space at the service entrance.

With its combination of rugged construction, integrated metering, and load management capabilities, the Meter-Rite Meter Socket Load Management unit is ideally suited for applications where service reliability, simplified maintenance, and compliance with modern electrical standards are paramount.

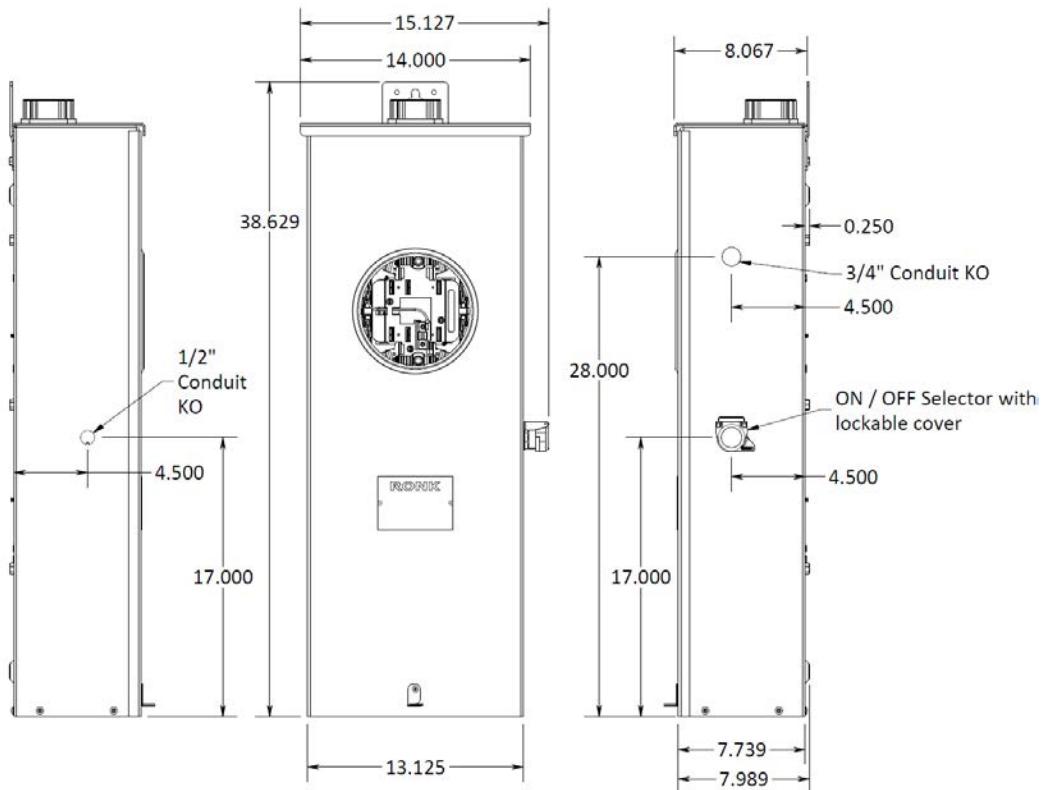

FEATURES AND BENEFITS

- NEMA 3R Outdoor Rated:** Designed for durability and weather resistance in outdoor applications.
- Enclosure:** Type 3R wall mounted #10 gauge aluminum.
- Compliance:**
- Safety:** on/off safety switch on side of unit.
- Bypass:** 7 jaw lever bypass and 277V contactor switch.

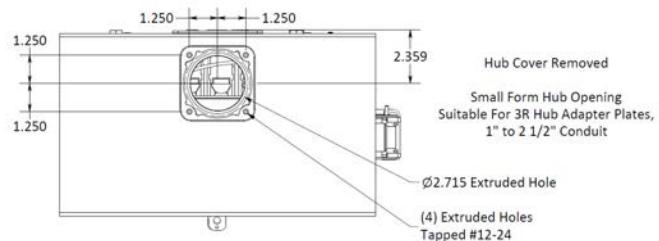

Meter-Rite Meter Socket Load Management

Part Number	Details	Amperage Rating	Voltage	Wire Size	Mounting	Enclosure
LMC-3-7-200	7 Jaw Lever Bypass and Contactor	170A	277VAC	#6-350 Line and Load	Wall Mounted	Type 3R
LMC-3-C-200	Contactor Only	170A	277VAC	#6-350 Line and Load	Wall Mounted	Type 3R
