# Quick Wins

## How to Start Today

---

Athereon GRC

# Your first steps toward greater security and Compliance under NIS2

The NIS2 directive introduces new requirements for businesses—but not everything needs to be perfect right away. You can make significant progress today with a few targeted steps. This one-pager explains practical quick wins for you to start today.

## 1. Get an Overview

- Check NIS2 relevance: Identify whether your company is affected (e.g., using our checklist: "Self-Check for Companies").
- Define responsibilities: Appoint internal officers responsible for information security and compliance.

## 2. Start Risk Analysis

- Inventory: Collect all critical processes, systems, and data to understand your risk profile.
- Prioritization: Assess risks according to probability and impact in order to plan initial measures quickly.

## 3. Implement Immediate Measures

- Close security gaps: Start with basic measures such as access controls, password policy, and patch management.
- Raise awareness: Train employees in cybersecurity basics and emergency procedures.

## 4. Prepare Documentation

- Document processes: Record the measures taken and responsibilities assigned—this will make it easier to provide evidence later on.
- Continuous improvement: Add regular reviews and updates to your action list.

## 5. Get Support

- Access expert knowledge: Check our whitepaper "Ready for NIS2" and other resources.
- Use software: With Athereon GRC, you can map risk analysis, action planning and reporting digitally—quickly and audit-proof.

# Your Benefit:

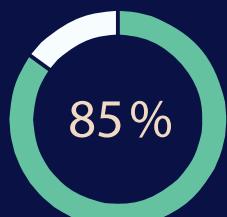

With these quick wins, you can make immediate and tangible progress toward NIS2 compliance, build internal knowledge, and lay the foundation for a sustainable security and compliance strategy.

**Ready to use in just 4 weeks**

**100% higher resilience**

**85% less manual effort**
