# KWS STUDENT DIGITAL CITIZENSHIP AGREEMENT

The use of computers, technology, iPads, print facilities, and the internet within our school is a privilege, not a right. With this privilege comes the responsibility to uphold the core values of our community: respect, courage, inclusiveness, commitment, and resilience. Technology is an essential resource for learning and communication, and continued access to school-owned networks and systems requires students and their parents to acknowledge and adhere to the principles of responsible digital citizenship.

These principles apply whenever students access school-owned networks, systems, and infrastructure—whether on campus or remotely—and extend to all electronic devices, including laptops, tablets, mobile phones, wearable devices, and USB drives, regardless of ownership. Failure to comply with these guidelines may result in consequences such as removal of devices or internet privileges, and in some cases, the cost of repairs or replacements may be charged to the student's school account.

By agreeing to these principles, students demonstrate their commitment to using technology responsibly and ethically, ensuring that digital tools enhance learning while maintaining the integrity and values of our school community.
