Exclusively offered by RamSoft, Blume – Patient Portal lets patients view and share diagnostic images and reports. It offers a single point of access through both web and mobile applications.

Integrated with PowerServer and OmegaAI, Blume also facilitates notifications and the electronic completion of forms that are visible in PACS.

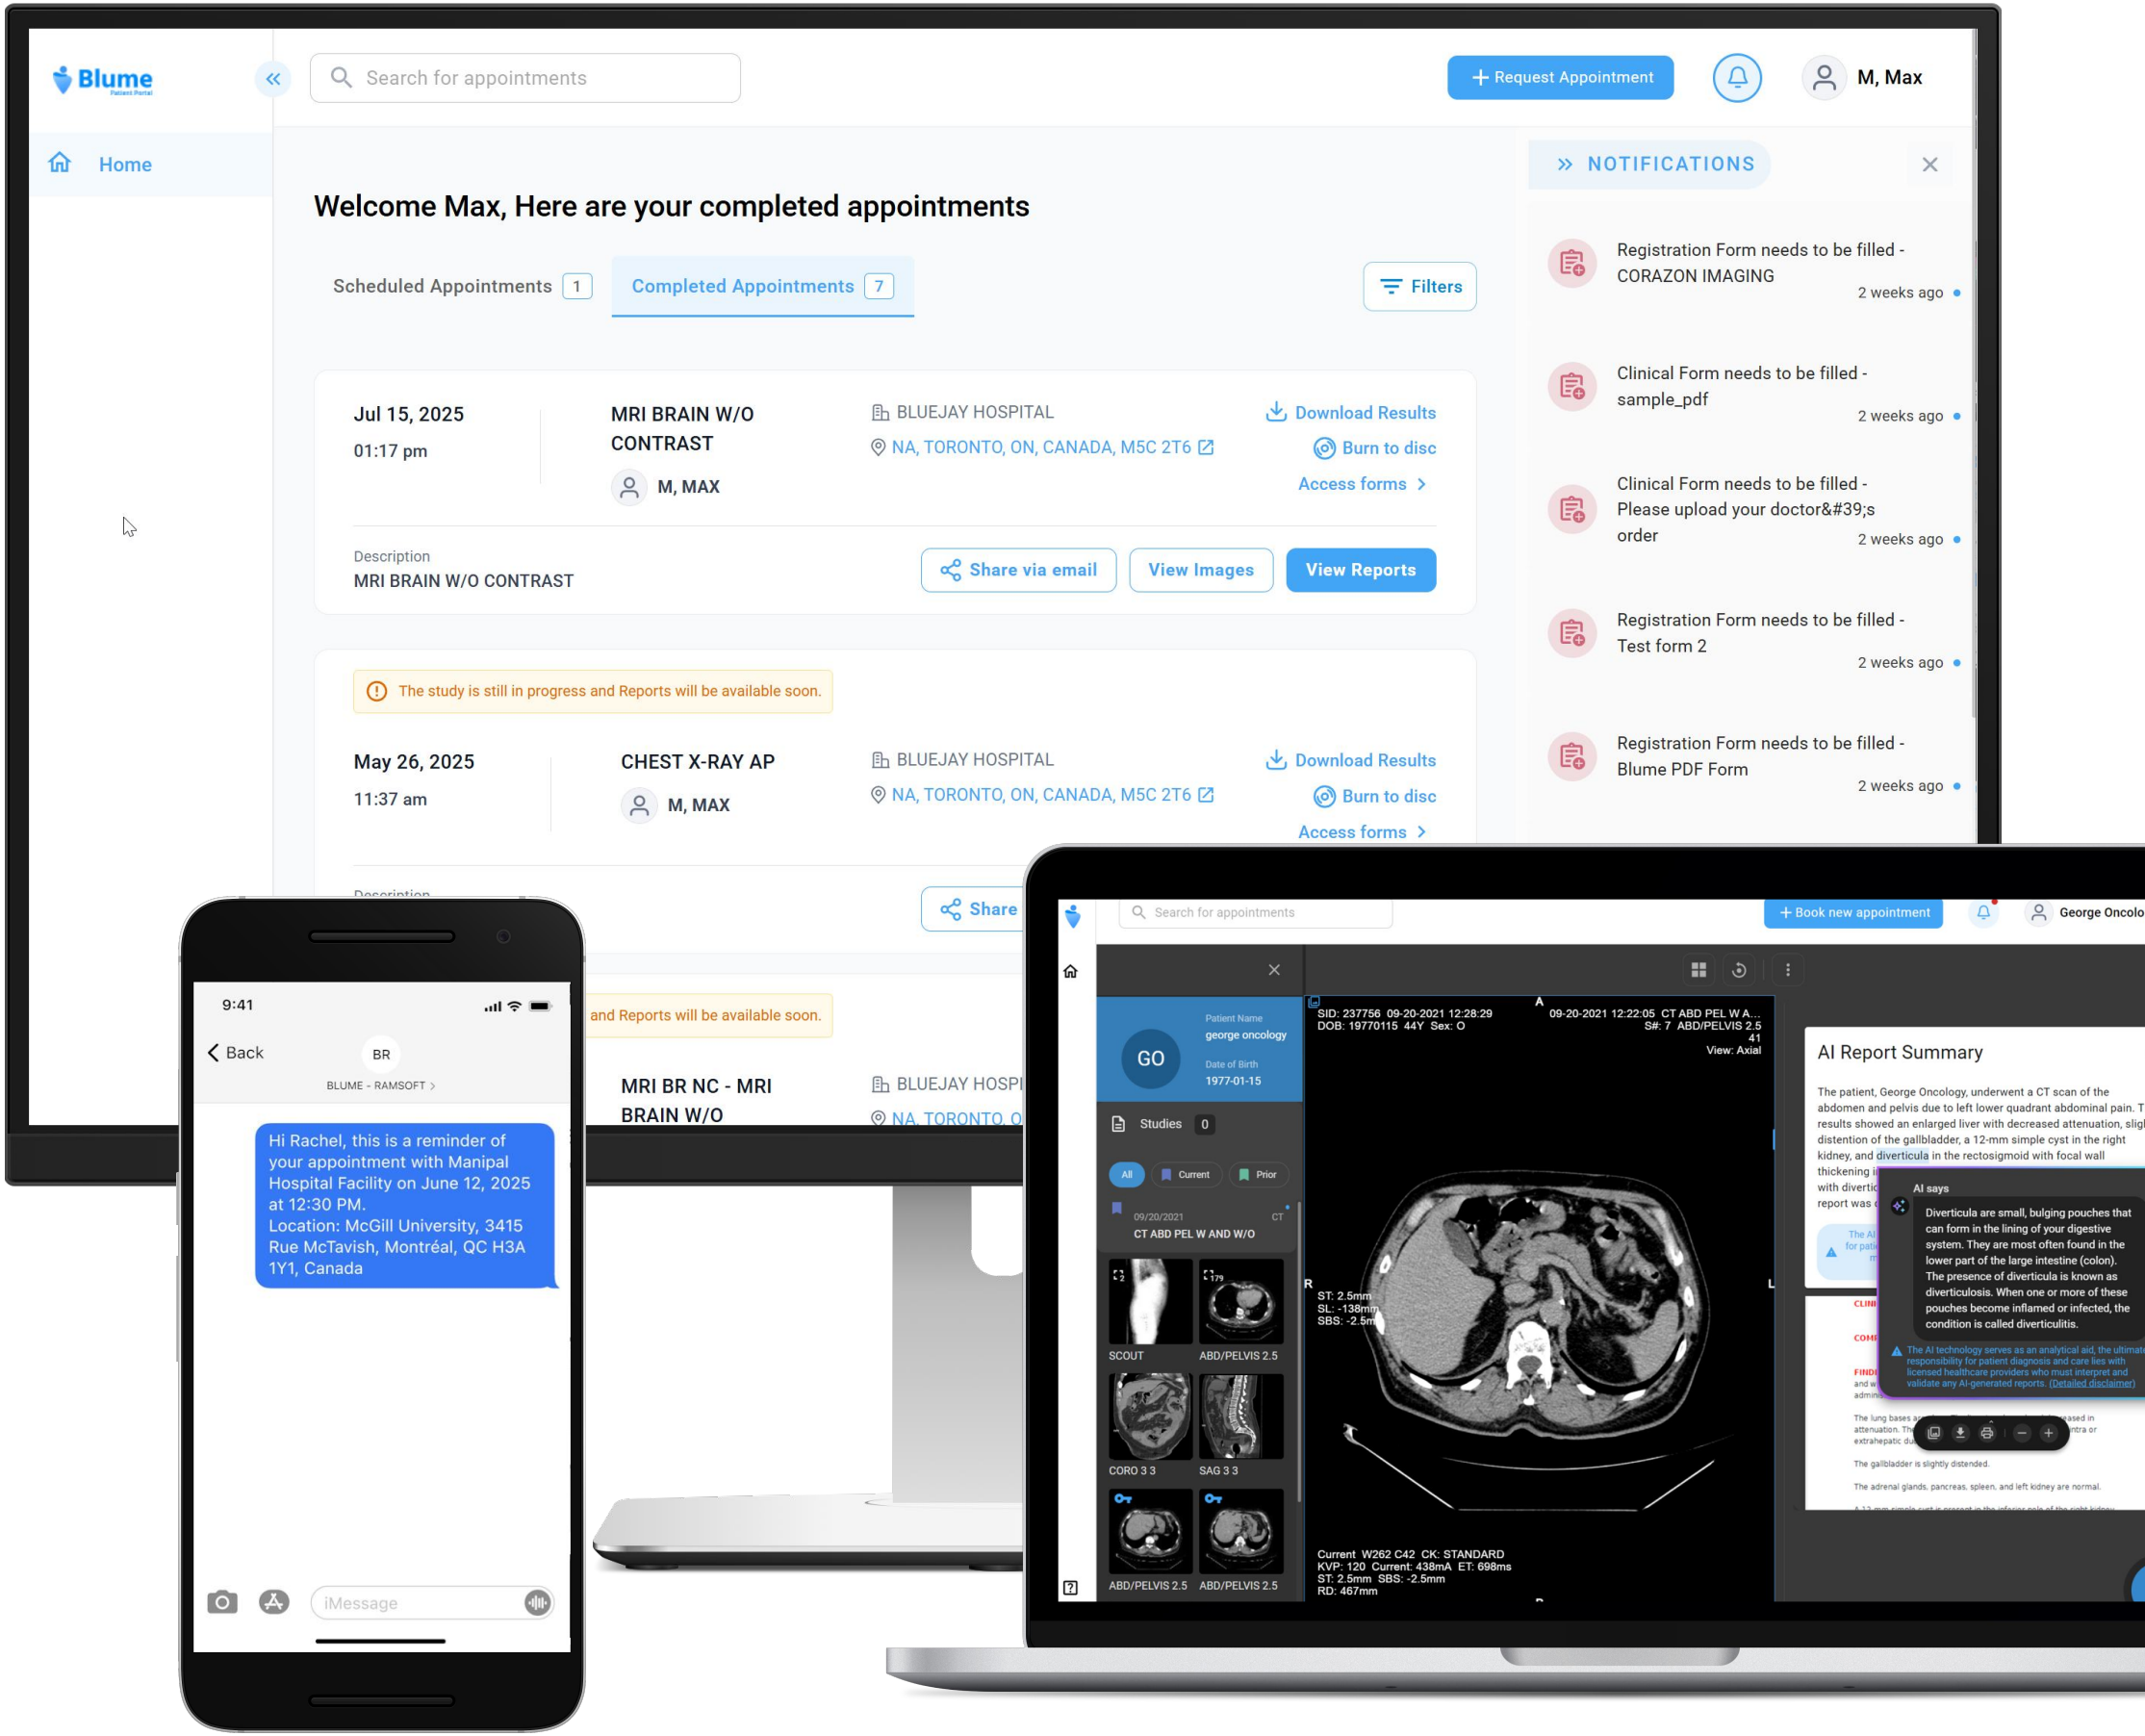

How Blume enhances PowerServer and OmegaAI

Blume, an available add-on application to PowerServer and OmegaAI, provides patients a tool to access and share their diagnostic images, track

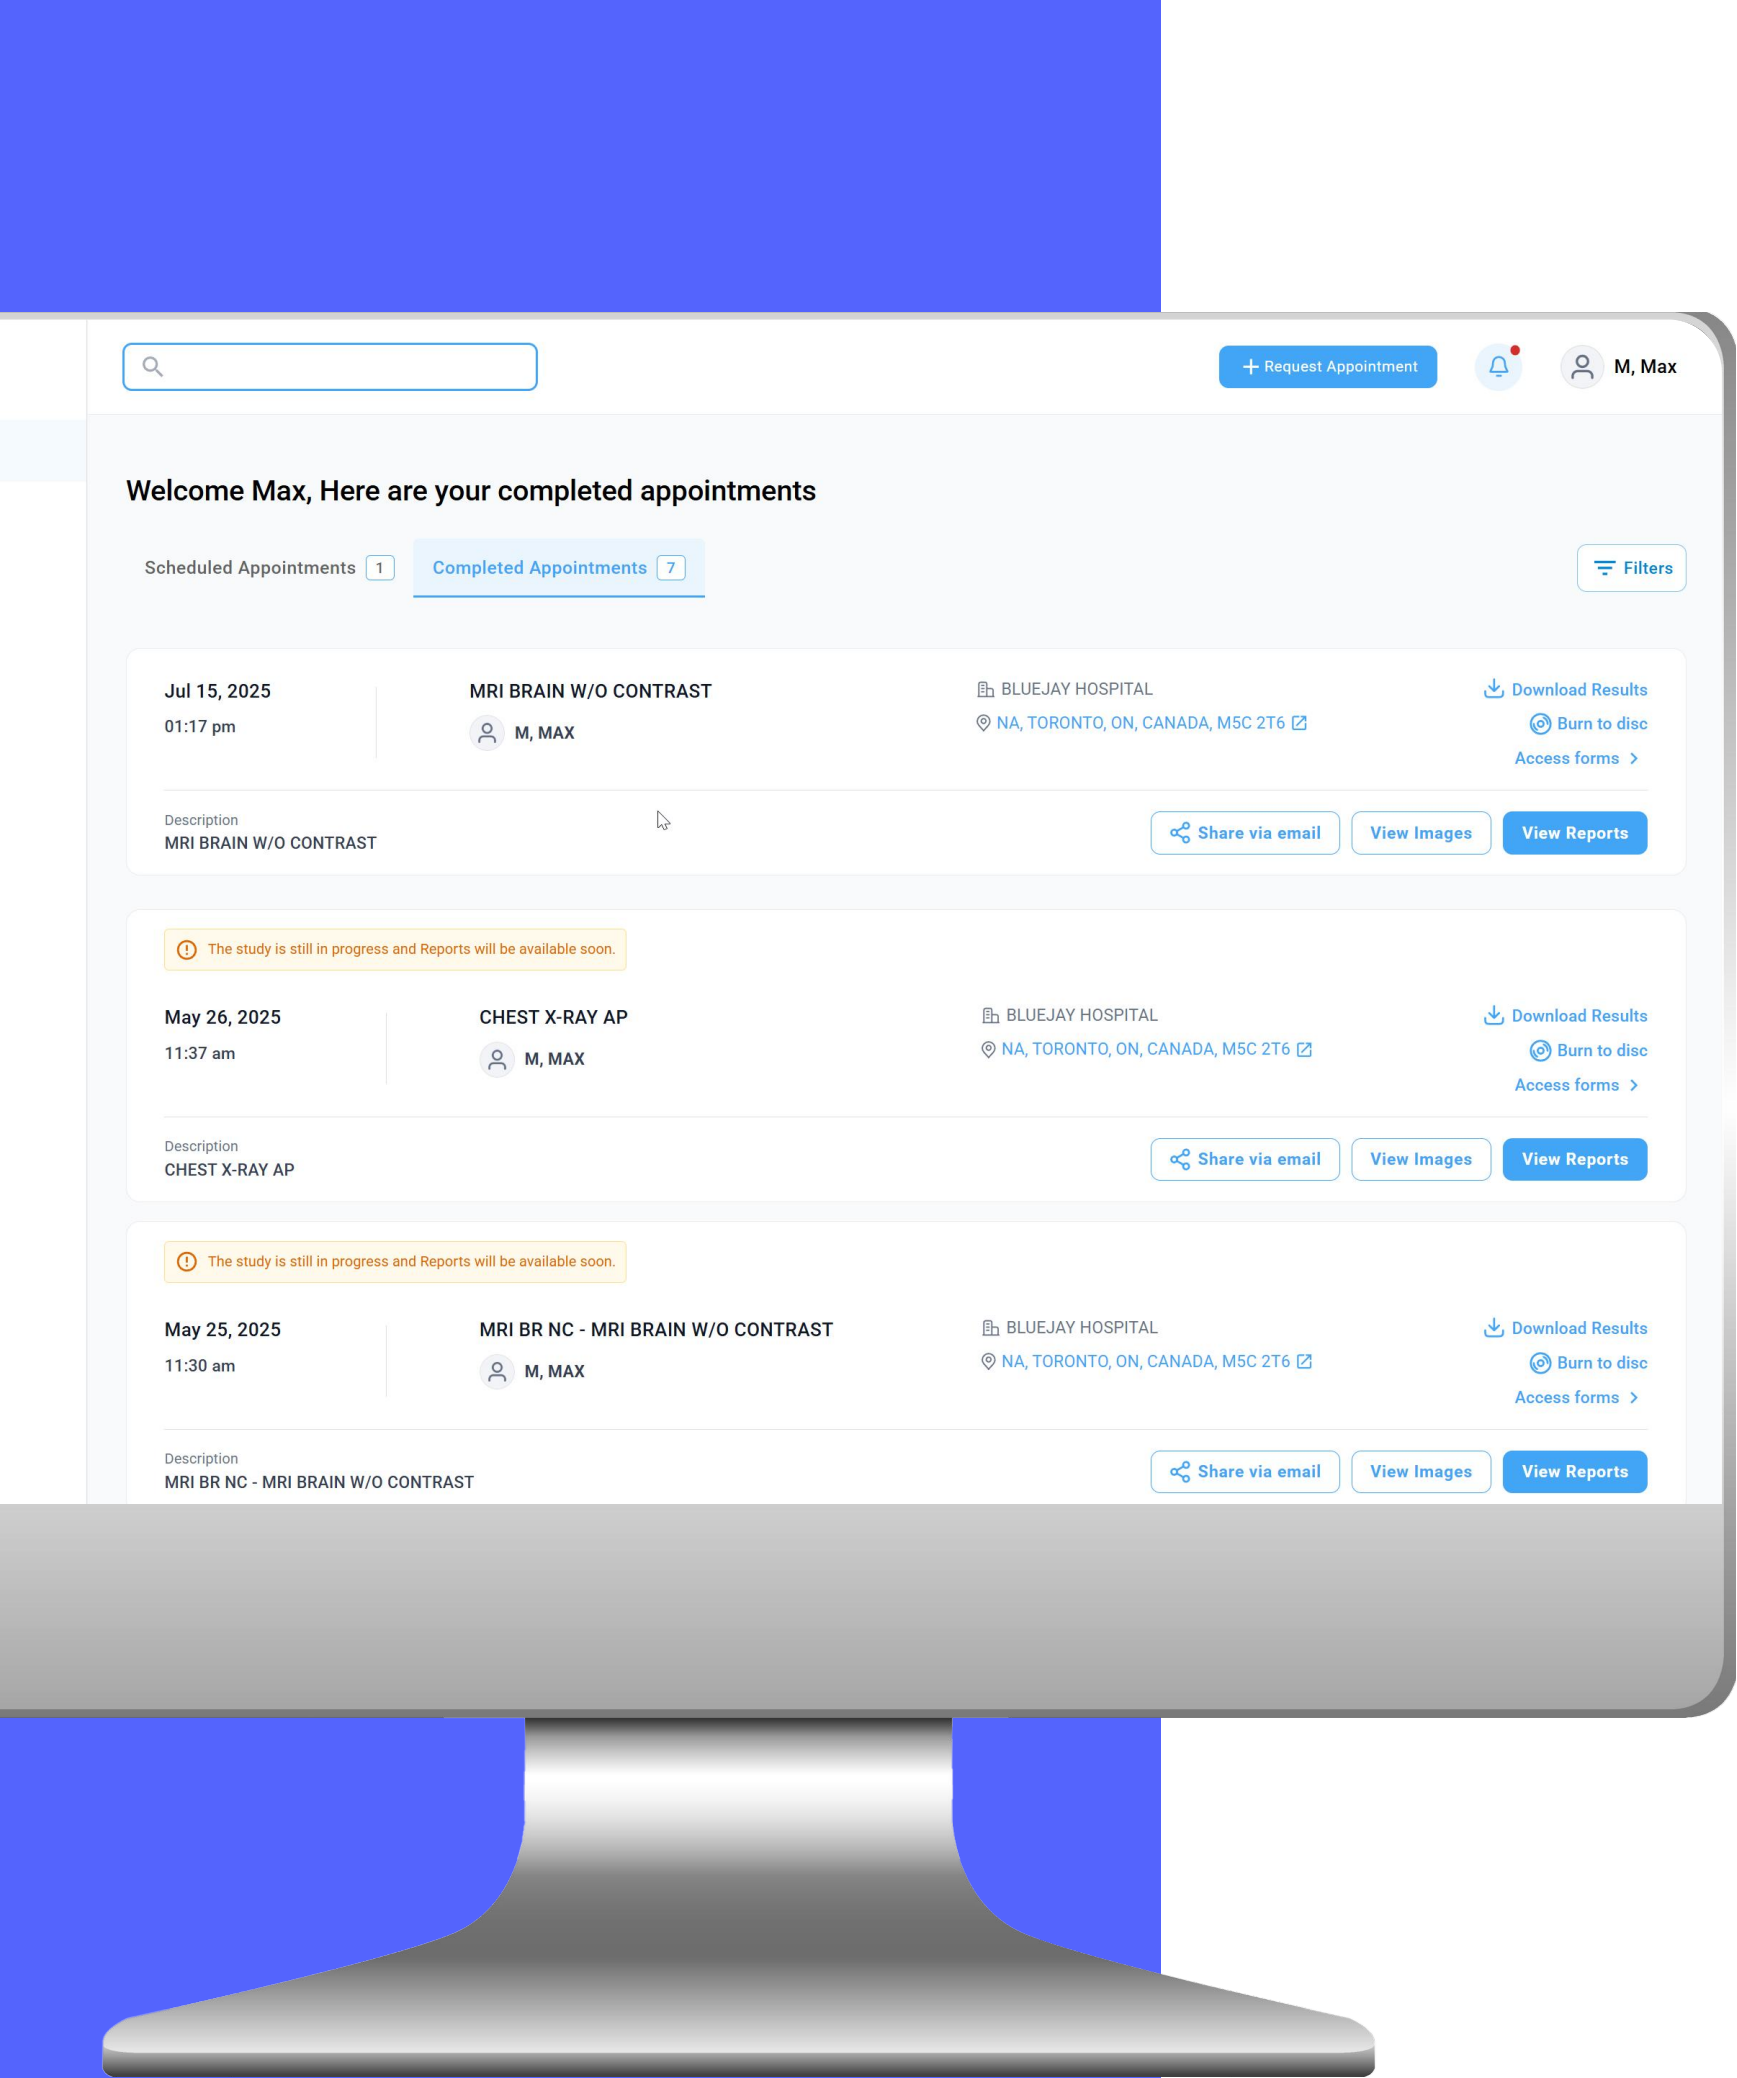

imaging appointments, ask Blume Assistant for clarification of medical terms and procedures. Patients can also complete and submit pre-imaging forms.

Key Features for Patients:

- Self-signup
- Image and report viewing and sharing
- Share prior images with imaging centers
- Access appointments
- Electronic notifications
- Remotely complete and submit intake fillable PDF forms
- Download and print individual images and reports
- Medical terminology and report summary explained with AI
- Help Center with frequently asked questions

How Clinics and Imaging Centers Benefit from Blume

Improved Operational Efficiency

Blume automates the distribution of reports and images, reducing manual tasks like printing, mailing, or calling patients with updates. This frees up staff time and lowers administrative overhead.

Reduced Follow-Up Burden

With AI-explained reports and simplified medical terminology, patients better understand their results on their own. This reduces the volume of calls to clinics from patients seeking clarification, allowing staff to focus on clinical priorities.

Enhanced Patient Satisfaction = Stronger Loyalty

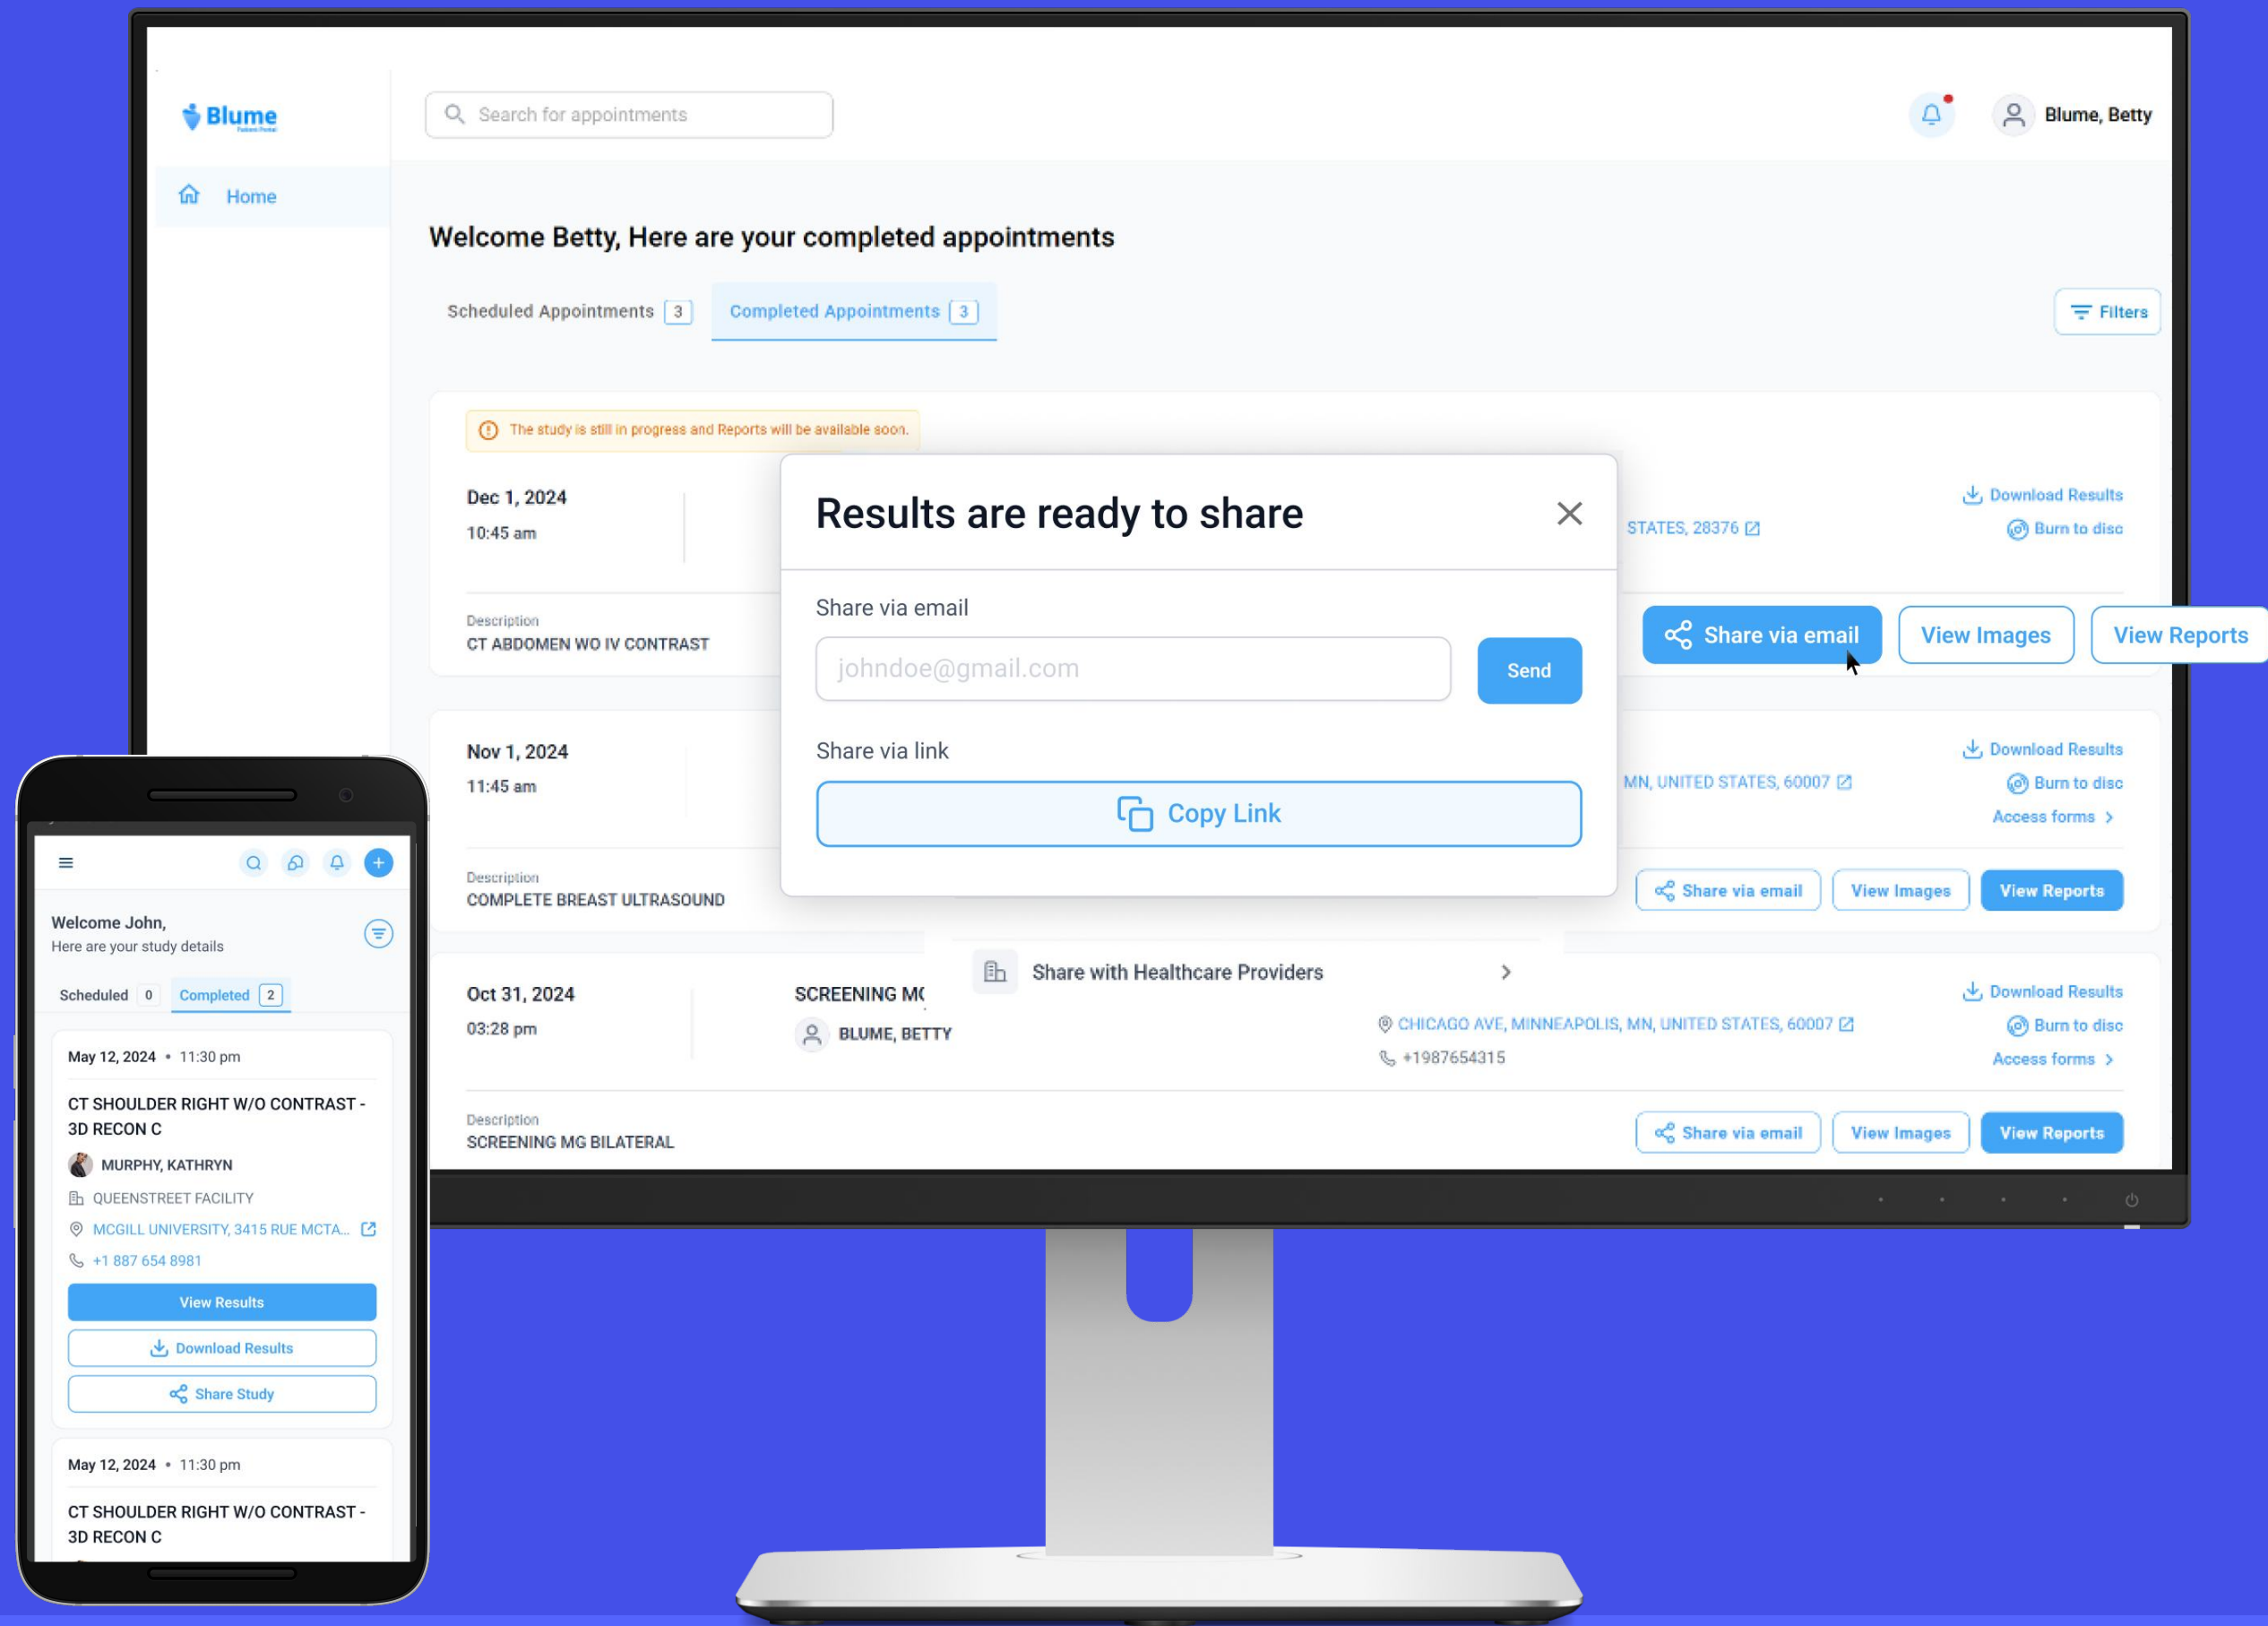

Offering a modern digital portal positions clinics as innovative and patient-centric. Patients who experience quick, convenient access are more likely to return and recommend the imaging center.

Fewer Errors and Miscommunications

Written and AI-translated reports minimize misunderstandings compared to verbal communication, ensuring accuracy and compliance with care standards.

Competitive Advantage

Centers that offer an intuitive patient portal stand out in crowded markets, making Blume not only a clinical tool but also a differentiator in attracting referrals and retaining patients.
