Introducing Blume™ Patient Portal with Automated Front Desk

A New Era of Patient Engagement and Operational Efficiency

We are excited to announce Blume Patient Portal Suite — a flexible, scalable, and cloud-based software solution designed to transform the way your facility interacts with patients. With our innovative pay-as-you-grow model, you can enjoy cost-efficiency by starting with only the essential features and expanding as your operational needs evolve.

The Blume suite delivers fully customizable solutions tailored to the unique requirements of your facility, moving beyond generic, one-size-fits-all offerings. Our secure online portal and mobile app empower you to manage patient communications efficiently and provide broad accessibility for your patients.

Key features include advanced front desk automation, allowing patients to manage forms and appointments online or through the app. Automated SMS and email reminders help reduce staff workload and minimize no-shows, streamlining your day-to-day operations.

Our fully integrated, native patient engagement suite — featuring OmegaAI and PowerServer — facilitates secure, real-time access to patient results for both referring physicians and patients. This immediate access supports faster diagnoses and more timely treatments.

With the scalable Blume Patient Portal Suite, your imaging center can take the lead in patient-centered care, earning trust, loyalty, and recognition within the community. We're here to help you elevate patient engagement and operational efficiency — start your journey with Blume today!

Announcing PowerServer™ 6.7: Enhanced Security, Performance, and Workflow Efficiency

We are excited to announce the release of PowerServer 6.7 with enhancements to security, performance, and clinical workflow efficiency. This latest release introduces stronger authentication options, improved encryption, advanced imaging capabilities, and expanded workflow tools—enabling radiologists and administrators to work more securely and effectively within integrated environments such as OmegaAI.

Area	Enhancement	Benefit
Security	MFA + SSO, AES256 encryption	Strengthened authentication and compliance readiness
Performance	New database engine, HTJ2K support	Improved system speed and reliability
Workflow	Sub-Critical Finding option	Greater flexibility in managing radiology alerts
Usability	Modern icons, enhanced date filters	Intuitive, user-friendly experience
Integration	Integration OmegaAI portal access	Simplified navigation in hybrid deployments
Clinical Tools	CAD 3D Navigation	Advanced visualization and improved Mammography reading experience

ZettaHealth Solutions and RamSoft announce strategic partnership to deliver the first and only end-to-end teleradiology management platform designed to unify the entire business in one intelligent ecosystem.

RamSoft is set to integrate ZettaHealth Solution's Professional Reading Group Management System – ERP/BIS (Enterprise Resource Planning/Business Intelligence System) into its PowerServer and OmegaAI RIS/PACS platforms. Designed for radiology: a software platform that integrates financial, operational, and administrative functions specifically for radiology practices.

RADWorx™ worklist orchestrator -AI optimizes radiology workflows by automating case routing, and then Z-Suite™ provides back-office operations that track performance insights, enhance efficiency, compliance, communication, and both clinical and financial outcomes.
