

## Application Note

# Real-Time AI-based Autonomous Medical Coding

mCoder by Maverick Medical AI™ quickly analyzes reports to automatically generate accurate ICD-10 and CPT codes, available to billing systems in real time. By combining in-depth knowledge of medical coding with advanced large language models and deep learning technologies, Maverick's platform autonomously analyzes clinical notes and reports to generate accurate medical codes. Maverick significantly surpasses industry standards with an 85% Direct-to-Bill rate, automating the medical coding process to enhance efficiency, reduce the workload on human coders, and minimize errors.

#### How Maverick AI™ Enhances RamSoft's PowerServer™ Platform

---

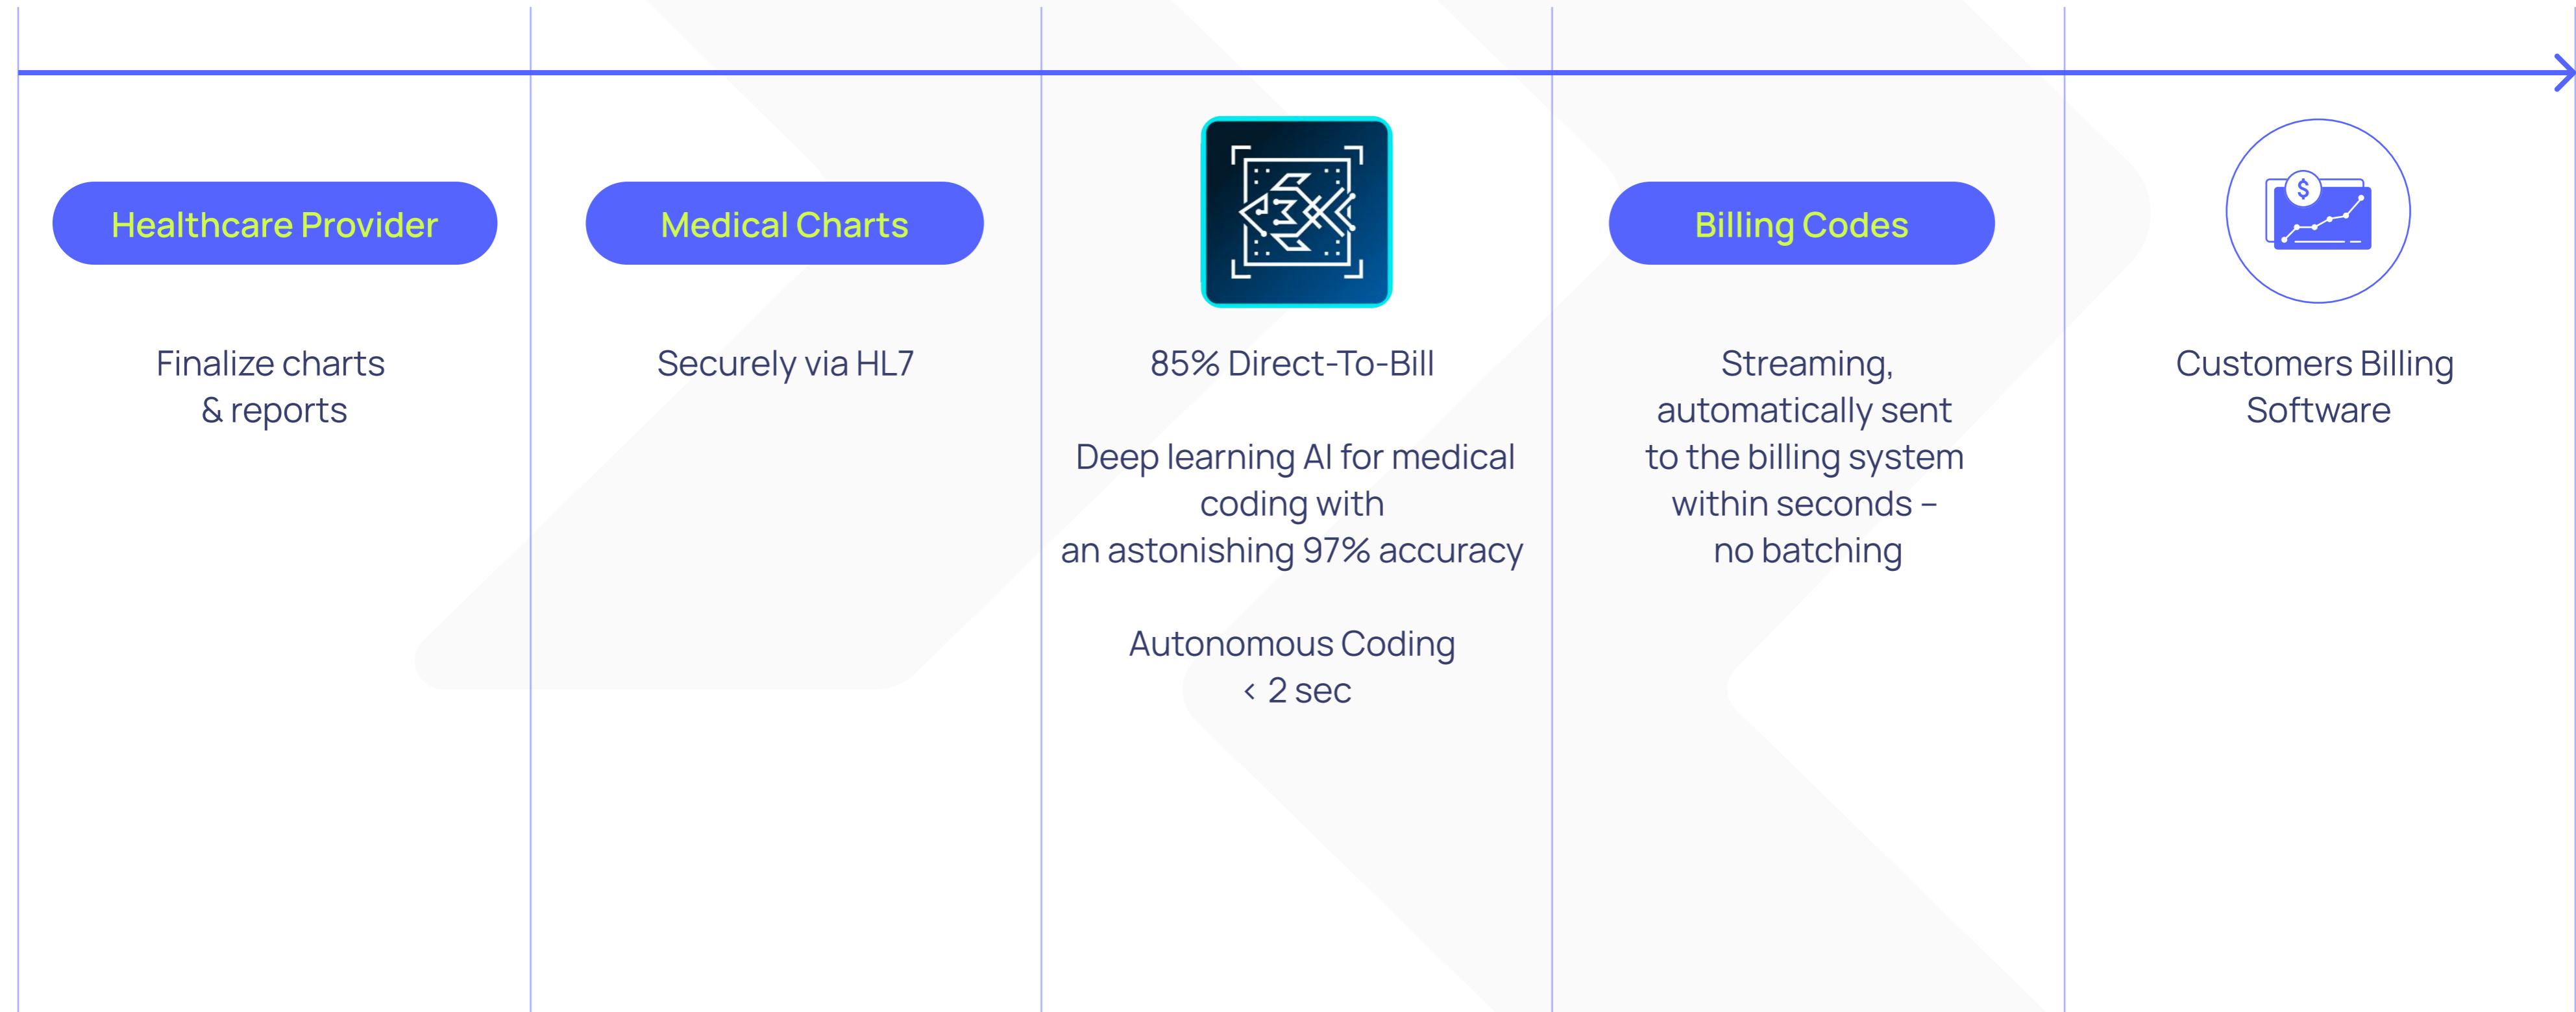

With the integration of Maverick AI's advanced autonomous medical coding capabilities, imaging providers now benefit from automated quality checks that improve coding completeness and minimize claim denials. This empowers imaging providers through intelligent and connected

workflows. Incorporating Maverick AI's autonomous medical coding into the RamSoft PowerServer™ platform, enabling customers to avoid costly billing errors and enhances overall operational efficiencies.

## Features and benefits that deliver real impact

Feature	Benefit	Unique Advantages
<b>Point-of-care coding intelligence</b>	Uses proprietary deep learning and generative AI to generate precise ICD-10, CPT codes, HCPCS, supply codes from clinical notes, in 2 seconds without human intervention.	<b>The software keeps learning and improving.</b> <ul style="list-style-type: none"> <li>• Coding intelligence learns from historical data and is personalized with customer-specific coding/business. The model continuously learns from documentation and manual coding patterns.</li> <li>• All codes assigned are fully explainable in the text with color coding.</li> </ul>
<b>Industry-leading 85%+ direct-to-bill rate</b>	Remove coding backlogs and reduce the standard 5+delay in billing caused by traditional processes.	<b>8 out of 10 cases are coded automatically</b> and without human intervention
<b>Combined machine learning, deep learning, and large language modes</b>	Sophisticated and fully curated models running 24/7 lead to lowers costs, reduced claim denials, accelerated billing cycles, and frictionless growth.	Reduce coding denials, bill faster, grow effortlessly <b>97% coding accuracy</b> – highest in the industry
<b>Effortless scalability</b>	The platform's scalability allows it to handle unlimited volume without requiring additional staff, providing cost savings and preventing bottlenecks during high-volume periods.	<b>Manages additional volume without the need for additional staff (fully automated)</b>
<b>Compliance and data quality</b>	<ul style="list-style-type: none"> <li>• Before implementation, several coding validation rounds assess mismatches between the Maverick model and historical data. Though not a formal audit, this acts as a quality check.</li> <li>• When errors are identified in the historical coding or gaps in documentation, the client is notified for the coding team to address.</li> <li>• If the model does not perform as expected due to coding mismatches, Maverick will make the required adjustments and carry out any customizations necessary to align the model with your organization's coding policies before it is launched.</li> </ul>	<b>Automated compliance</b> <b>Increased accuracy in coding increases revenue</b>
<b>Exception handling</b>	<p>If the engine cannot code with high confidence, the “exception” will flow to a human coder.</p> <ul style="list-style-type: none"> <li>• Ambiguous or conflicting documentation</li> <li>• Client rules/policies and edits</li> <li>• Complexity</li> <li>• Engine confidence low</li> </ul>	<ul style="list-style-type: none"> <li>• If the engine cannot code with high confidence, the “exception” will flow to a human coder using the mCoder coding platform for improved workflow.</li> <li>• Provides transparency to monitor both the automated codes and the human-assigned codes.</li> </ul>
<b>mCoder Statistics</b>	<ul style="list-style-type: none"> <li>• Performance metrics completed cases, DTB rate, manual review and QA%, aging days and more</li> <li>• Stratification by location, modality, and much more</li> </ul>	<b>KPIs at your fingertips</b> – quickly make informed business decisions and validate the performance of your coding solution

### How Maverick Helps to Automate Medical Coding for an Imaging Facility

**85%**

Highest Direct  
to Bill Rates in  
the industry

**58%**

Reduction  
in FTEs

**71%**

Reduction  
in Coding Backlog

**50%**

Reduction  
in Denials

**2 day**

Improvement  
in Billing Cycle

## Audit & QA Results

Similar to the Layers report; easily view audit & QA results to determine engine and coder accuracy by audit batch.

Summary   Frequency   Detail   In-Depth

Total cases queried	17
Comparison failed	0 (0.00%)
Total cases compared	17 (100.00%)
Total CPT code match   <b>Without Modifiers</b>	0 (0.00%)   <b>16 (94.12%)</b>
Total Primary ICD code match	8 (47.06%)
Total Supply code match   <b>Without Modifiers</b>	17 (100.00%)   <b>17 (100.00%)</b>
Total Quality code match	17 (100.00%)
Total cases match	0 (0.00%)
Total cases different	17 (100.00%)

## Runs 24/7

Delivers continuous coding without downtime

## Boosts accuracy and consistency

Minimizes errors and improves code reliability

## Reduces costs and denials

Cuts operational overhead and appeals

## Codes in seconds

Speeds up billing, reduces A/R, and boosts cash flow

## Scales effortlessly

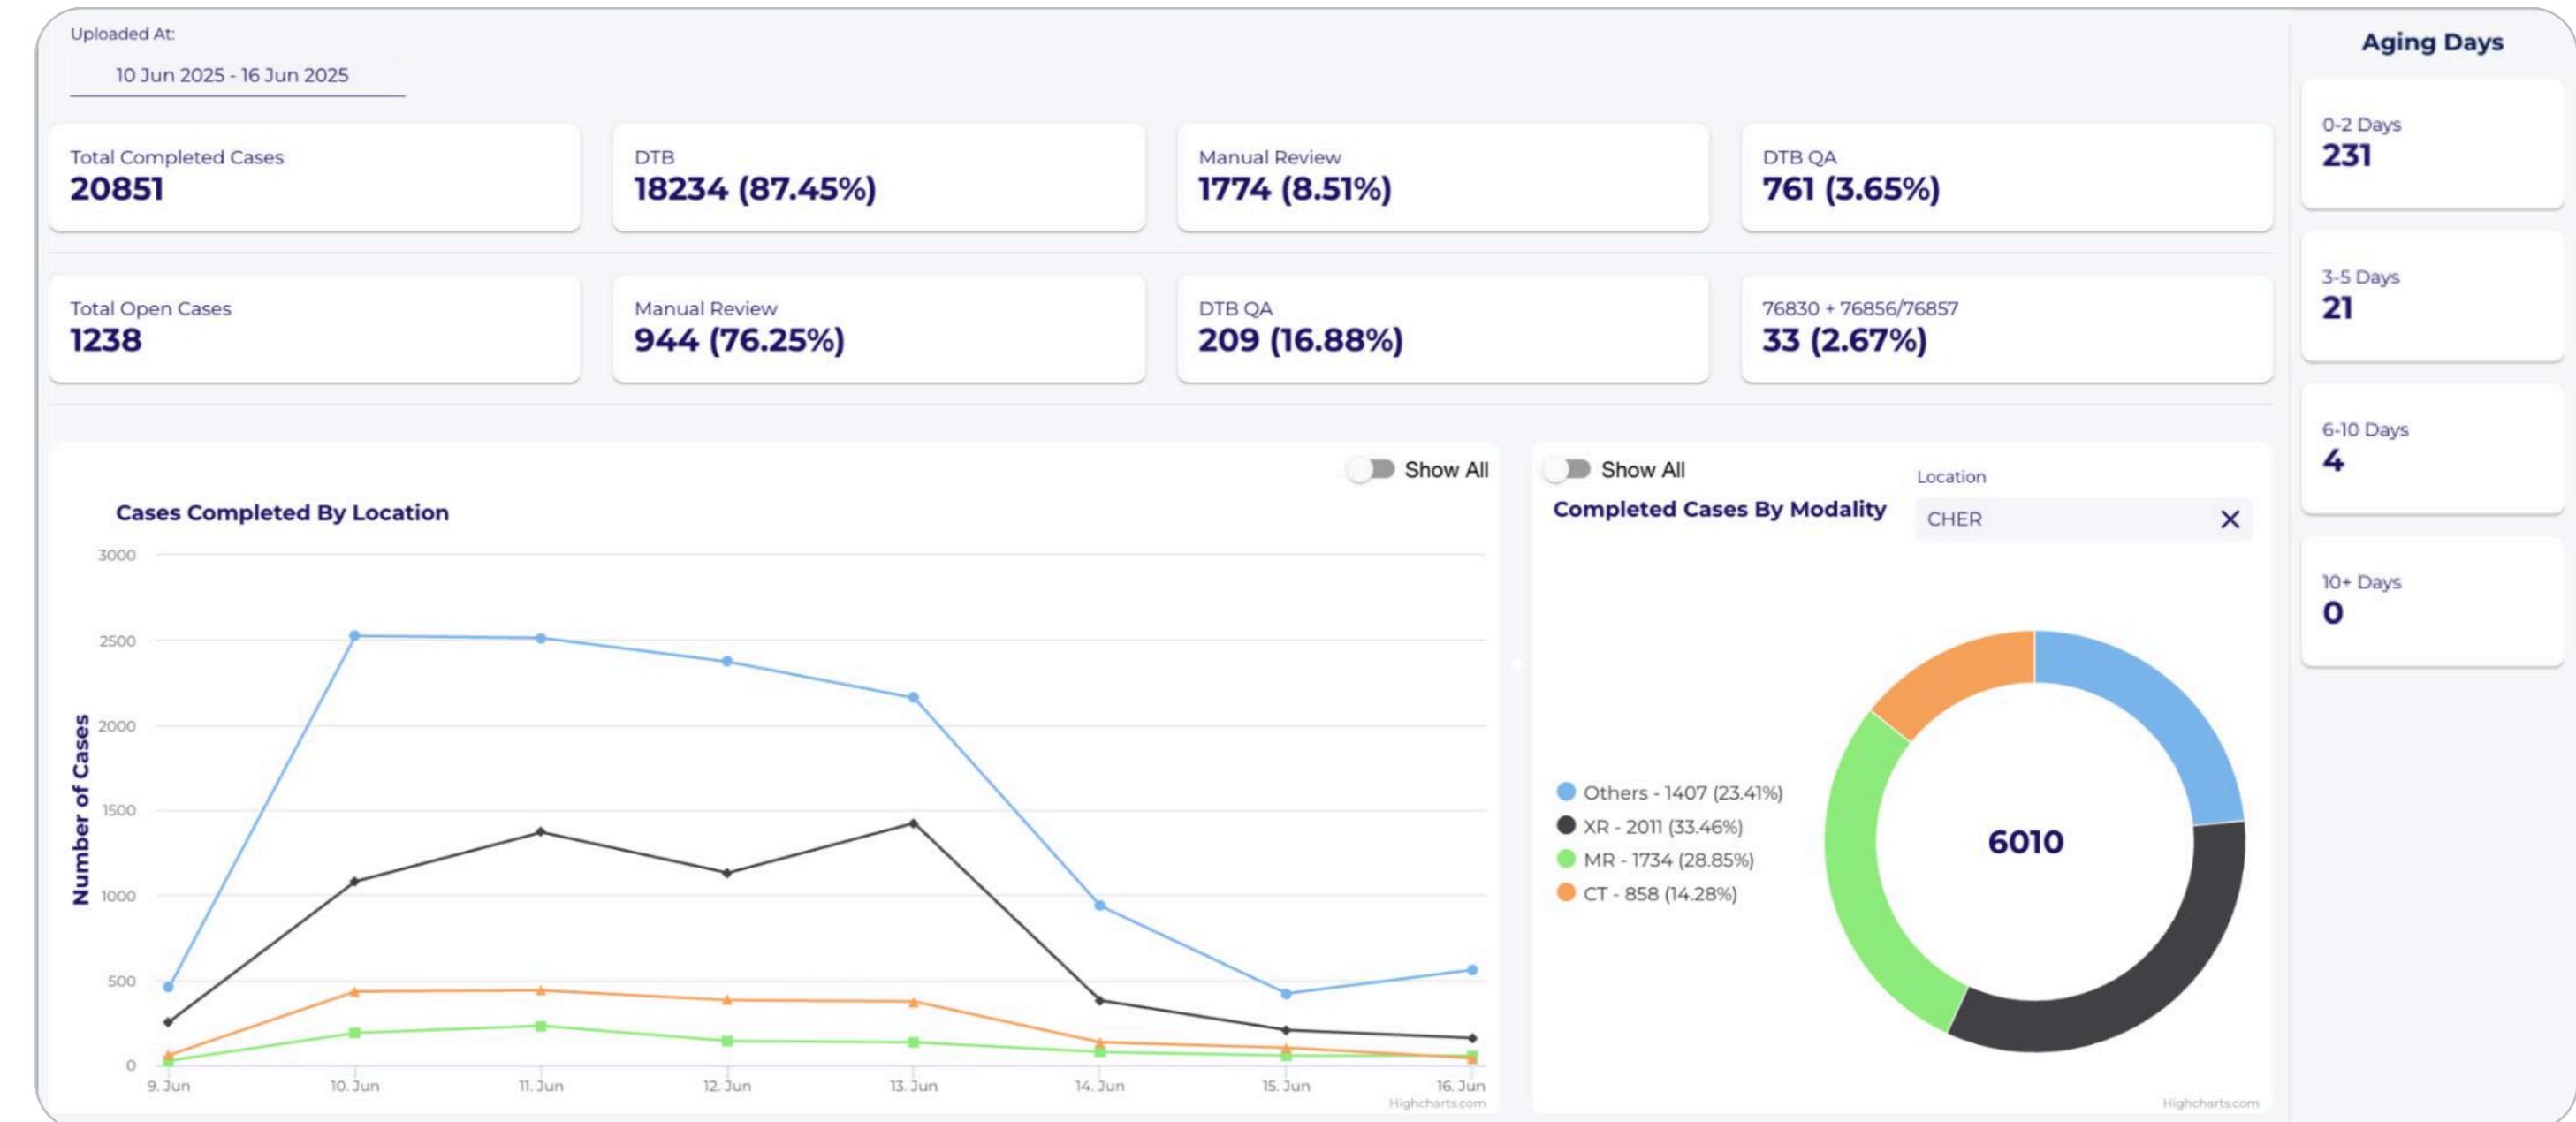

Handles unlimited volume without additional manpower

## Frees up resources

Redirects coders to more complex cases/tasks

Performance Metrics Completed Cases, DTB Rate, Manual Review and QA%, Aging Days and More

Stratification by Location, Modality, Date uploaded

## Real Time

Utilization Monitor to view coder system user and activity

User Groups	Users	Locations	Work Lists	Apply			
Coder Name	User Group	Completed Cases	Rerouted Cases	Current Worklist	Current Location	Total Coding Hours	Average Time On Case (sec)
