GUARDIAN
POWERED BY ASYLON

MADE IN USA

SECURITY DRONE PROGRAMS

FULLY- MANAGED SOLUTIONS

Launching and managing a security drone program in-house can be up to 10X more expensive than Asylon's fully-managed solution. From FAA compliance and certified pilots to maintenance and remote monitoring, the Guardian Program covers everything at a fraction of the cost to fit seamlessly into operational budgets and enhance your security posture.

ACHIEVEMENTS TO DATE

The Asylon Guardian Program is built upon tens of thousands of successful security missions, FAA expertise, and 6+ years of extensive field experience.

- 50,000+ missions completed
- 2,000+ alarms responded to
- 1,000+ Security Events Id'ed

- 10,000+ hours flown
- 10+ security integrations
- 9+ BVLOS waivers received

THE ASYLON ADVANTAGE

Guardian by Asylon is a revolutionary, BVLOS-ready, and cost-effective security solution providing unmatched situational awareness, alarm and incident response, and routine patrols—all from an aerial perspective. Offering seamless integration with existing security systems and ground robots like DroneDog, Guardian enables a new vantage point in automated security, designed for mission-critical industries and large corporate campuses.
