

Upgrade Your ePRO

ObvioHealth's ePRO solution streamlines data collection for success at every touchpoint—so you get the stronger therapeutic evidence you need.

Our Secret for Better ePRO

Today's ePRO offerings are too often just digitized versions of suboptimal traditional assessments. Upgrade your clinical trial with ObvioHealth's ePRO—purpose-built for digital and designed to deliver better data, faster.

Ease

Frictionless, less burdensome reporting for participants boosts engagement, compliance, and completion rates.

Real Time, Real World

Patients can log events and symptoms at the moment they occur—delivering real-time data captured in the real world.

Accuracy

More accurate and complete data sets result in better, more reliable outcomes—and stronger evidence for your clinical trial.

The Results

91%

ePRO Compliance Rate

89%

Retention Rate

Average rates for ObvioHealth completed studies.

ePRO That Delivers Stronger Evidence

Our ePRO capabilities, powered by the ObvioGo® DCT platform and app, combine behavioral science, proprietary technologies, and on-demand support—delivering more robust outcomes that translate into stronger evidence.

BYOD

Our BYOD ePRO model integrates seamlessly into patients' lives, allowing them to report using their own mobile devices.

Simplified, Notified, Gamified

Automated notifications and reminders are built in to boost compliance, supported by gamification that keeps participants engaged.

Intelligent Integrations

Passive data captured through integrated devices provides a more complete picture of patient symptoms and behaviors.

Intuitive UX

One-finger selection and scrolling, user-friendly scales, and interactive functions make data capture quick and intuitive.

On-Demand Support

Multi-media trainings and virtual site team members are accessible at the click of a button, ensuring that patients are always supported.

Augmented ePRO

AI-assisted media capture capabilities enable patients to record and send high-quality images, audio, and video to supplement reporting.
