

# The Chain of Sustainable BTC Yield

## BEST ECONOMICS

Stake BTC, earn real, sustainable BTC yield!

BTC powers GOAT Network's entire ecosystem. Transactions are paid in BTC. Transaction revenue is collected in BTC and converted into yield-bearing yBTC. The more transactions, the higher the BTC yield!

## HOME OF THE PEOPLE'S COINS

GOAT Network enables anyone holding DOGE to stake it and earn real, sustainable yield...in BTC! Because if BTC and DOGE share the same DNA and spirit, why should BTC holders have all the fun?!

## BEST TECH

GOAT Network is the first Bitcoin project to introduce Decentralized Sequencers, the foundation for its *sustainable yield model*. GOAT is also pushing to inherit Bitcoin native security, launching an MVP version of its *BitVM2 solution*, with testnet coming soon.

## SEASONED TEAM

GOAT Network is founded and led by alums of Metis, an Ethereum Layer 2 network that saw its token moon 65x in the last bull run, hitting a peak TVL of \$3B.

## BEST USER JOURNEY

Tired of airdrops overrun by bots that leave you with 12 cents and infinite sadness? GOAT Network's One Piece campaign lets you unlock your greatness. Every time you dive deeper into GOAT's BTCFi and DOGEFi ecosystem, you level up your soulbound NFT and earn rewards. Since each transaction on GOAT increases your yield, every on-chain interaction helps you, and the entire GOAT community!

**GET STARTED!**

Go to [GOAT.network](https://GOAT.network) and start earning today!
