

The background is a dark, textured collage. It features several logos: the React logo (an atom) in the top left, the Webbuggs logo (the word 'Webbuggs' in a rounded font) in the top center, a brain with circuitry in the top right, the Python logo in the middle right, and a GitHub logo in the middle left. There are also floating buttons with text like 'cursor auto-complete' and 'ref. optimize'. The central focus is a large, semi-transparent image of a computer monitor displaying a code editor. The code on the screen is a mix of JavaScript and Python, with some lines highlighted in blue and green. The overall aesthetic is tech-oriented and modern.

# AI-Enabled Full-Stack Experts

End-to-End Web & SaaS Solutions – Powered by Cursor & Copilot

# Meet Our AI-Enabled Full-Stack Team

Senior Engineers with Frontend + Backend Mastery

30+ Experts

Proven track record across industries

4–8+ Years

Deep technical expertise

MERN Stack

MongoDB, Express, React, Node.js

Next.js & Python

Modern frameworks and Django

Our team leverages cutting-edge AI tools like Cursor and GitHub Copilot to deliver faster, smarter solutions. Every developer brings enterprise-level experience with modern frameworks, ensuring your project is built with best practices from day one. We don't just code—we architect scalable solutions that grow with your business.

# What We Deliver

Rapid, Scalable Full-Stack Builds for Modern Product Teams

## MVPs & SaaS Platforms

From concept to launch in weeks, not months. We build production-ready applications with clean architecture and scalable foundations.

## SPAs/PWAs with APIs

Lightning-fast single-page applications and progressive web apps with robust REST and GraphQL APIs.

## Headless + Real-Time Features

Decoupled architectures with WebSockets for live updates, chat, notifications, and collaborative features.

## Microservices & Integrations

Modular backend services with seamless third-party integrations—Stripe, Twilio, AWS, and more.

# AI-Enabled = 2x Faster + Lower Costs

Cursor & GitHub Copilot Built Into Every Project

1

## Development Speed

Ship features in half the time

2

## Cost Savings

Efficiency without premium pricing

3

## Faster Iterations

Rapid testing and refinement

## The AI Advantage

Traditional development requires extensive manual coding, debugging, and refactoring. Our AI-assisted approach transforms this workflow entirely.

We leverage Cursor and GitHub Copilot to accelerate every phase—from scaffolding to testing. These tools are included in our rate at no extra cost, delivering enterprise-grade AI capabilities to your project from day one.

The result? **40–60% faster development cycles**, fewer bugs, smarter code patterns, and more time focused on innovation and scale rather than repetitive tasks.

# Our Full-Stack Arsenal

Modern Tech Stack + AI-Optimized Tools

## Frontend Excellence

**React 19** for dynamic UIs with the latest features and performance optimizations

**Next.js 15** for server-side rendering, static generation, and optimal SEO

**TypeScript** for type-safe, maintainable code

**Tailwind CSS** for rapid, responsive styling

## Database Mastery

**MongoDB** for flexible, document-based storage

**PostgreSQL** for relational data integrity

**Redis** for caching and session management

**Cloud-native** deployment on AWS, Azure, or GCP

## Backend Power

**Node.js/Express** for high-performance JavaScript backends

**Python/Django** for robust, secure server applications

**RESTful & GraphQL APIs** for flexible data access

**WebSockets** for real-time communication

## AI-Powered Tools

**Cursor IDE** for intelligent code completion and refactoring

**GitHub Copilot** for context-aware suggestions

**Automated testing** with AI-assisted test generation

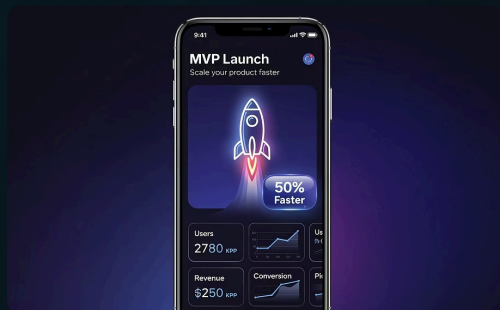

All included—no extra fees

# Unlocking Full-Stack Success

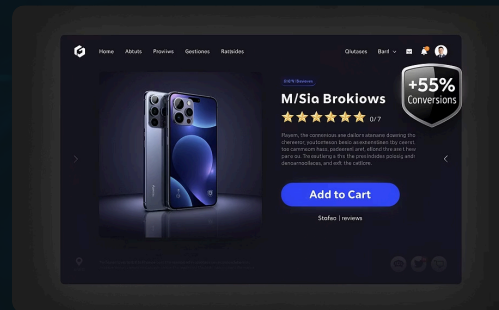

## AI-Accelerated Outcomes

Harnessing AI, we consistently deliver measurable success and superior performance across all projects, from rapid MVPs to scalable enterprise solutions.

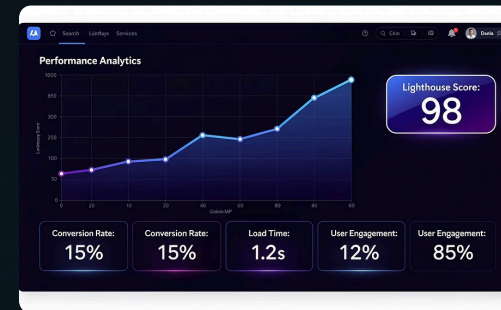

### SaaS MVP

Launched **50% faster**

### E-commerce Site

**+55% conversions**

### Dashboard App

**98 Lighthouse score**

### Real-Time Tool

Scalable to **10k+ users**

# Simple & Swift Process

From Idea to Deployment—Streamlined for Speed

## 1. Consult

Free 30-minute discovery call to understand your vision, technical requirements, and timeline. We'll discuss your tech stack preferences and how AI can accelerate your specific use case.

## 2. Match

Within 48 hours, we'll match you with the perfect developer or team based on your project needs. Review profiles, expertise, and past work to ensure alignment.

## 3. 1-Week Trial

Start with a low-risk trial week to validate fit. Your developer tackles a real feature or module, demonstrating both technical skill and communication style.

## 4. Build & Iterate

Scale to full engagement with agile sprints, daily standups, and continuous deployment. Ship features weekly with AI-accelerated velocity and quality.

Our process is designed for modern product teams who need speed without sacrificing quality. We integrate seamlessly with your existing workflows—whether you use Jira, Linear, GitHub, or custom tools. Communication is async-friendly with daily updates and weekly demos.

# Flexible Engagement Models

Choose What Works for Your Team and Budget

## Hourly Engagement \$35/hour

Perfect for short-term projects, specific features, or technical consulting. Pay only for the hours you need.

- Flexible scheduling
- No long-term commitment
- AI tools included
- 5-hour minimum

## Dedicated Developer \$5,200/month

Full-time commitment for ongoing development. 160 hours of focused work with your team's priorities.

- 40 hours per week
- Consistent velocity
- Deep product knowledge
- 20% savings vs. hourly

## Custom Team Build Get a Quote

Need a full squad? We'll assemble a specialized team—frontend, backend, DevOps, QA—tailored to your needs.

- 2-10+ developers
- Specialized roles
- Volume discounts
- Dedicated project manager

❏ **All engagement models include:** AI development tools (Cursor + GitHub Copilot), code reviews, documentation, and direct communication via Slack or your preferred platform. No hidden fees or tool surcharges.

# Start Building Now

## Unlock AI-Powered Full-Stack Expertise

Hire faster. Ship smarter. Save money. All AI development tools included—no extra fees.

### Ready to accelerate your development?

Book a free 30-minute consultation to discuss your project. We'll show you exactly how AI-accelerated development can transform your timeline and budget.

No sales pitch. No obligation. Just an honest conversation about what's possible.
