Meet the Webbuggs Unity Crew

Senior Developers · Creative & Technical

Our team brings together **20+ expert Unity developers** averaging 5–10+ years of hands-on experience. We're not just coders — we're architects of immersive worlds, combining deep technical mastery with creative vision.

Every developer on our crew specializes in C#, XR Toolkit, and multiplayer systems. Whether you need a mobile hit, enterprise training simulation, or bleeding-edge VR experience, we have the talent and track record to deliver.

Core Strengths

- Advanced C# architecture
- XR Toolkit mastery
- Multiplayer networking
- Performance optimization
- Cross-platform deployment

What We Build

From Mobile Hits to Enterprise XR

2D/3D Games

Engaging gameplay experiences optimized for mobile, desktop, and console platforms with stunning visuals and smooth performance.

AR/VR Experiences

Immersive extended reality applications that transport users into interactive worlds and overlay digital content on reality.

Multiplayer Systems

Scalable real-time networking solutions supporting thousands of concurrent players with low latency and reliable synchronization.

Training & Simulations

Enterprise-grade learning platforms that reduce training costs while increasing knowledge retention and skill development.

Our 2025 Unity Toolkit

Modern, Powerful, Efficient

We leverage the latest and most powerful tools in the Unity ecosystem to deliver cutting-edge experiences. Our technical stack ensures your project is built on a foundation of modern best practices and future-proof architecture.

1

Unity 6+

Latest engine features and performance improvements

2

URP/HDRP

Scalable rendering pipelines for optimal visual quality

3

XR Interaction Toolkit

Industry-standard framework for immersive experiences

4

Netcode for GameObjects

Official multiplayer solution with robust synchronization

5

AI-Assisted Workflows

Enhanced productivity with Cursor and GitHub Copilot

The Webbuggs Difference

Quality · Speed · Real Results

When you partner with Webbuggs, you're not just hiring developers — you're gaining a competitive advantage. We combine technical excellence with business understanding to deliver solutions that drive measurable impact.

60+ FPS Optimization

Silky-smooth performance across all target platforms through expert optimization and profiling techniques.

Cross-Platform Mastery

Deploy once, run everywhere — from iOS and Android to Quest, SteamVR, and beyond.

1-Week Risk-Free Trial

Test our capabilities with zero commitment. If we're not the right fit, walk away — no questions asked.

Competitive Rates

Enterprise-quality development at rates that make sense for startups, studios, and growing companies.

Projects That Performed

Real Impact Across Industries

Our portfolio showcases the breadth and depth of our capabilities. From viral consumer apps to enterprise training platforms, we've delivered solutions that exceed expectations and drive business results.

100K+

AR Mobile Downloads

Consumer AR app reached massive adoption with seamless marker tracking and engaging interactions

50%

Training Efficiency Gain

VR simulation reduced onboarding time while improving skill retention and safety outcomes

10K+

Concurrent Players

Multiplayer game scaled to handle peak traffic with zero downtime and minimal latency

Simple Path to Your Vision

Fast · Transparent · Collaborative

We've refined our process to eliminate friction and accelerate delivery. From initial conversation to final launch, you'll experience clear communication, realistic timelines, and a partnership built on trust.

Discovery

Deep dive into your vision, technical requirements, and business goals through comprehensive consultation.

Match

We pair you with developers whose skills and experience perfectly align with your project needs.

1-Week Trial

Risk-free evaluation period where you can assess our work quality and team compatibility firsthand.

Build & Launch

Full development sprint with iterative releases, continuous feedback, and successful deployment to market.
