

Market, Portfolio and Organizational Update

Third Quarter 2025 Update

TA ASSOCIATES

Confidentiality and Offering Disclaimers

Reminders

- **Confidentiality.** TA Associates Management, L.P. (“TA”) believes in full disclosure whenever possible, but must protect confidential information with respect to the TA portfolio companies. Specific limited information regarding the overall performance of a Fund (net fund IRR, dates and amounts of contributions and distributions, the remaining fair market value of a partner’s capital account) may be disclosed as needed for your business purposes. The release of any confidential information pertaining to our portfolio companies (e.g., market value of investment, company financial performance) is strictly prohibited. The materials we are providing you are for informational purposes only and contain confidential information that is proprietary to and constitutes trade secrets of TA, its Funds and portfolio companies and is subject to the confidentiality provisions in the TA Fund Limited Partnership Agreement (as applicable to current Limited Partners in a TA Fund). By accepting the presentation, unless otherwise permitted by law (including, without limitation, applicable “whistleblower” laws), or the TA Fund Limited Partnership Agreement, you agree not to copy, reproduce or distribute all or any portion of this presentation and to return this presentation to TA if you cannot abide with these confidentiality obligations.
- **Not an Offering.** TA is registered as an investment adviser under the Investment Advisers Act of 1940, as amended. This presentation does not constitute or form part of an offer to issue or sell, or of a solicitation of an offer to subscribe or buy, any securities or other financial instruments, nor does it constitute a financial promotion, investment advice or an inducement or incitement to participate in any product, offering or investment. Any offer to purchase or buy securities or other financial instruments will only be made pursuant to an offering document and the subscription documents, which will be furnished to qualified investors on a confidential basis at their request for their consideration in connection with any such offering. Any investment decision in connection with the Fund should be based on the information contained in the private placement memorandum.
- **Regulation D Offering.** No securities commission or regulatory authority in the United States or in any other country has in any way passed upon the merits of an investment in a TA Fund or the accuracy or adequacy of the information or material contained herein or otherwise. This information is not, and under no circumstances is to be construed as, a prospectus, a public offering, or an offering memorandum as defined under applicable securities legislation. The information contained herein does not set forth all of the terms, conditions and risks of the funds, including risks associated with Regulation D privately-offered investment products. This information is qualified in its entirety by, and is subject to, the information contained in the relevant private placement memorandum. Prospective investors are advised to consult with their own independent advisors, including tax advisors, regarding a potential investment in a TA Fund.
- **End Notes – Definitions and Disclosures.** Please refer to the End Notes – Definitions and Disclosures for important descriptions and disclosures regarding the data presented in this presentation including disclosures regarding references to past performance and forward looking statements, details related to return and other calculation methodologies, information regarding the use of benchmarks and third-party information and other important information that is material to understanding the data presented.

VIII Concluding Thoughts

II Underwriting in the Current Macroeconomic Environment

Evolution of Macro Dynamics

Transition From the “Goldilocks Years” ('09-'21) to a “New Normal” ('24-'25)

US Real GDP, Wage Inflation, CPI and Fed Funds (2009 - Q2 2025)

Goldilocks Years ('09-'21)

- Sustained economic tailwinds
- Systematic multiple appreciation
- Record PE activity

Shock to System ('22-'24)

- Economic headwinds
- Spike in uncertainty
- Slowing PE activity

New Normal ('24-present)

- + Inflation contained
- + Supportive credit markets
- Stress on the demand side
- Tariff shock and policy uncertainty
- Sector-specific opportunities and threats

Evolution of Valuation Multiples

Quality Assets Continue to Trade at Record-High Valuations

Past performance is no guarantee of future results. ¹ Source: Stepstone Private Equity Deal Benchmark, 2021 through 6/30/25 (latest available data). ² Average exit multiples achieved during period reflects EV/LTM EBITDA multiple achieved at exit (full and partial) for investments that were exited during each listed year, weighted by total roll value and cash proceeds during time period. ³ Entry multiple data reflects weighted average EV/EBITDA multiple based on invested and committed capital as of 10/31/25 for TA Equity Series (ex TASO) for all new platform investments.

Key Current Themes in Our Underwriting

TA Believes In the Current Environment, Vigilant Underwriting is More Important Than Ever

Themes in Focus

- Heightened focus on **organic growth**
- Continued emphasis on the **middle market** (enterprise values of < \$1 billion)
- Careful consideration of the **opportunities and risks with AI**
- Utilizing a broader range of **value creation levers** and pushing to **flex them with speed post-investment**
- Increased scrutiny and **assessment of management teams** and driving changes with urgency
- Evaluation of **trade / tariff exposure**
- Formally **discontinuing our consumer products strategy**

Commitment to high-quality business models continues to guide our investing discipline

TA strategy; results cannot be guaranteed.

Consumer Products Strategy Update

We Will Not Be Making New Consumer Products Investments for The Foreseeable Future

Rationale and Go-Forward Approach

- While our long-term consumer track record has been strong, the inherently less predictable business models have resulted in greater performance volatility (loss ratios), and the sector has been modestly dilutive to overall performance
- More recently, we've been managing through several underwriting mistakes in our branded consumer products portfolio, which has also been disproportionately affected by macro headwinds
- We have not made a new consumer products investment in the last three years and will not do so for the foreseeable future
- The existing dedicated North America consumer team will continue to oversee their active portfolio companies, but from a new deal perspective, the team has been re-organized into other TA industry groups to align with the most productive and attractive opportunities

North American Consumer Products Track Record

Fund	Gross MOIC ^{1,2}	Gross IRR ²	Loss Ratio ^{2,3}
TA XI (N=4)	3.4x	42%	31%
TA XII (N=7)	2.4x	23%	19%
TA XIII (N=2)	2.1x	59%	65%
TA XIV (N=4)	0.4x	(25%)	63%
TA XV (N=0)	N/A	N/A	N/A
Total NA Consumer Only	1.6x	33%	48%
<i>Fully Realized Only</i>	4.0x	43%	26%
Total Ex. NA Consumer	2.4x	36%	5%

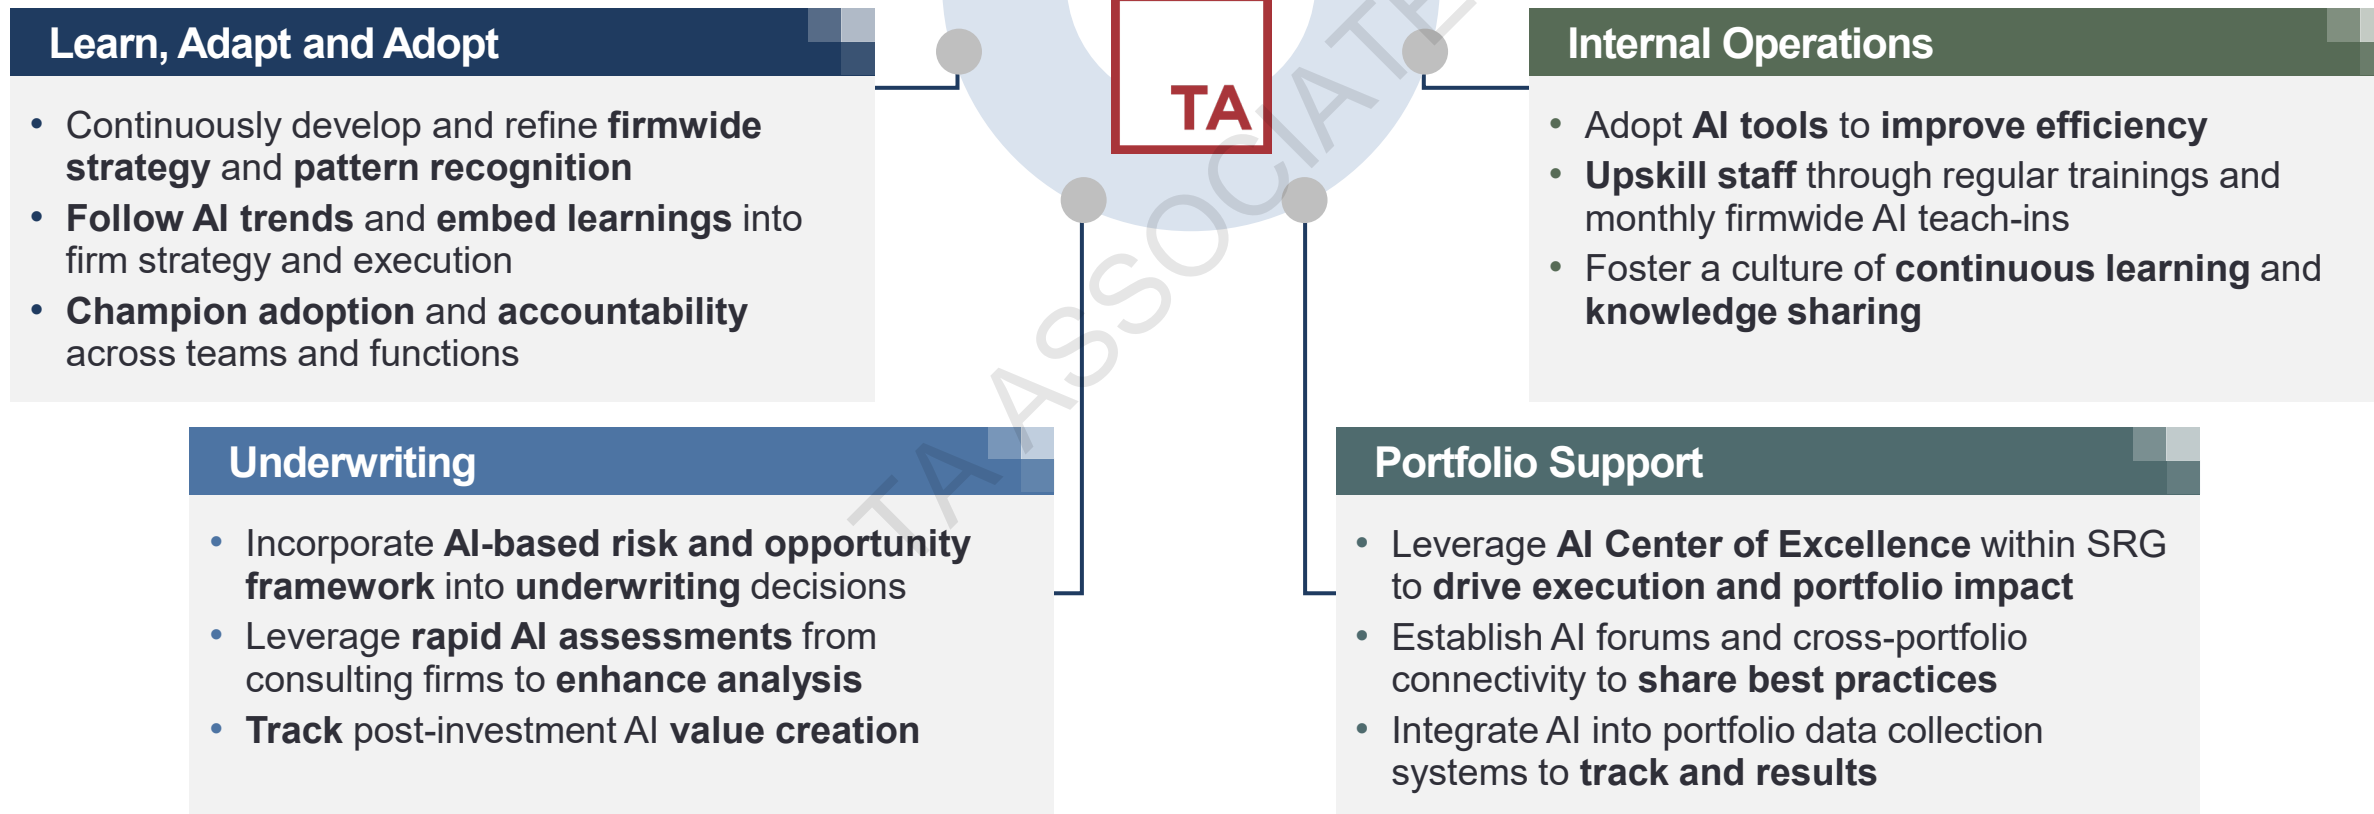

North American Remaining Active Consumer Portfolio by Fund

Data as of 9/30/25. ¹ Return calculations by investment are gross and do not reflect the deduction of management fees, performance allocations and other fund level expenses that are expected to substantially reduce investment returns. ² See End Notes 3a2, 3b2 and 17 for a description of Fund Gross IRR, Fund Gross Multiple and Fund Capital Loss Ratio. This is extracted performance, please see the first and second slides of the Appendix: TA Equity Investments section for a comparison of Gross and Net MOIC for the total portfolio/Fund for TA Funds and TA AP Funds. ³ Loss ratio is calculated as total realized and unrealized loss value as % of invested cost.

TA Approach to AI

TA's IP is built on **bottom-up pattern recognition** developed over nearly **six decades**
Combined with **continuous active engagement** with companies, operators and other partners

Perspective on AI Underwriting

AI Framework to Assess New Investment Opportunities

- We have been evaluating the AI impact on new investment opportunities along two dimensions

Technology / Product	Operations
<ul style="list-style-type: none">• AI risks/opportunities related to product innovation (within the company or within broader category)• Resulting impacts on company's value proposition, stability of customer base, security of company's moats (e.g. proprietary data), and pricing frameworks	<ul style="list-style-type: none">• AI-enabled operational improvements opportunities for companies (across functions like sales & marketing, customer success, R&D)• AI-related risks around data security & privacy, ethics/governance, etc.

- Given we invest in **companies with established product / market fit** but with remaining growth potential, **our lens is different from VC firms and / or value-oriented firms**
- AI is a **factoring into every investment decision** - is AI expected to be an **enhancer or disruptor?**
- **Not a one-size-fits-all approach** – given the myriad of factors at play, **cannot “judge a book by its cover”**
 - Menu of options (using internal templates and 3rd party resources) to evaluate at underwriting and operationalize post-investment

TA ASSOCIATES

III Investing Activity

Origination Activity

Strong Origination Discipline Continues to Fuel Quality Deal Flow

We are controlling what we can control, beginning with our effort

¹ Data presented is based on distinct counts (e.g., five emails to one company in the same year is counted once). Outbound touches (emails and calls) and visits for 2025 are annualized based on 11/14/25 data. Emails exclude those sent using automation. TA Sponsor numbers as of the beginning of each year, except for 2025, which is as of 10/1/25. Past performance is no guarantee of future results. Projections are provided for discussion purposes only based on our analysis of information available at the time and cannot be guaranteed. Actual results may vary.

Warm Deal Activity

It Is Taking More Effort to Uncover Each High-Quality Actionable Opportunity

Our proprietary deal engine is strong, though conversion is lower YTD as we aim to stay disciplined

Past performance is no guarantee of future results. ¹ Warm deal memo data as of 11/14/25. Only includes warm deal memos for TA Series Equity Funds (ex TASO). ² YTD 2025 Conversion Rate as of 11/14/25. ³ Conversion rate represents the percentage of warm deals issued in the time period noted that resulted in closed or signed investments during that same time period. ⁴ Includes closed and signed investments as of 11/14/25. Projections are provided for discussion purposes only based on our analysis of information available at the time and cannot be guaranteed. Actual results may vary.

Investment Activity

Maintaining Investment Discipline and Mid-Market Focus

Investment Activity (\$M)

Pace is slower as we focus on keeping the bar high, targeting high-quality middle market opportunities

Past performance is no guarantee of future results. Data provided for all closed and signed deals for current TA Funds as of 11/14/25. Annual dollars invested represents equity committed during the respective time period and is inclusive of both new investments and all follow-on investments. Number of investments represents new investments committed in the fiscal year. ¹ Median EV includes new deal / re-invest (not M&A in subsequent years), calculated at entry FX rate. ² Median check size based on annual commitments in respective year, excluding follow-ons (e.g., M&A funding in subsequent years is not captured).

Characteristics of Companies We're Targeting

Evolving View of Durable Business Models in the Age of AI (Software & Tech-Enabled Services Vertical Example)

Integration Depth

- Products deeply integrated with other solutions across customer tech stacks (e.g., *ERP, CRM, HRIS, payments*) – not feasible to rip and replace

Distribution / Customer Relationships

- Deep channel relationships and core to user workflows

Network Effects

- Value increases as more users & participants in the value chain use the product

Proprietary Data

- Exclusive, longitudinal, regulated datasets or data repositories which are difficult to replicate

Zero-tolerance Outputs

- Products and services where the cost of errors is too high to fully automate via AI (e.g., *clinical decisions in healthcare*)

Governance & Security

- Need for strong auditability and data protection, creating switching costs in risk-sensitive markets

Regulatory Barriers

- Moats derived from approvals from slow-to-change policies or regulatory bodies

TA ASSOCIATES

IV Portfolio and Performance

Portfolio Trends and Observations

HQBM Portfolio Impacted By Continued Macro Uncertainty But On Balance Resilient and Generally Performing Well

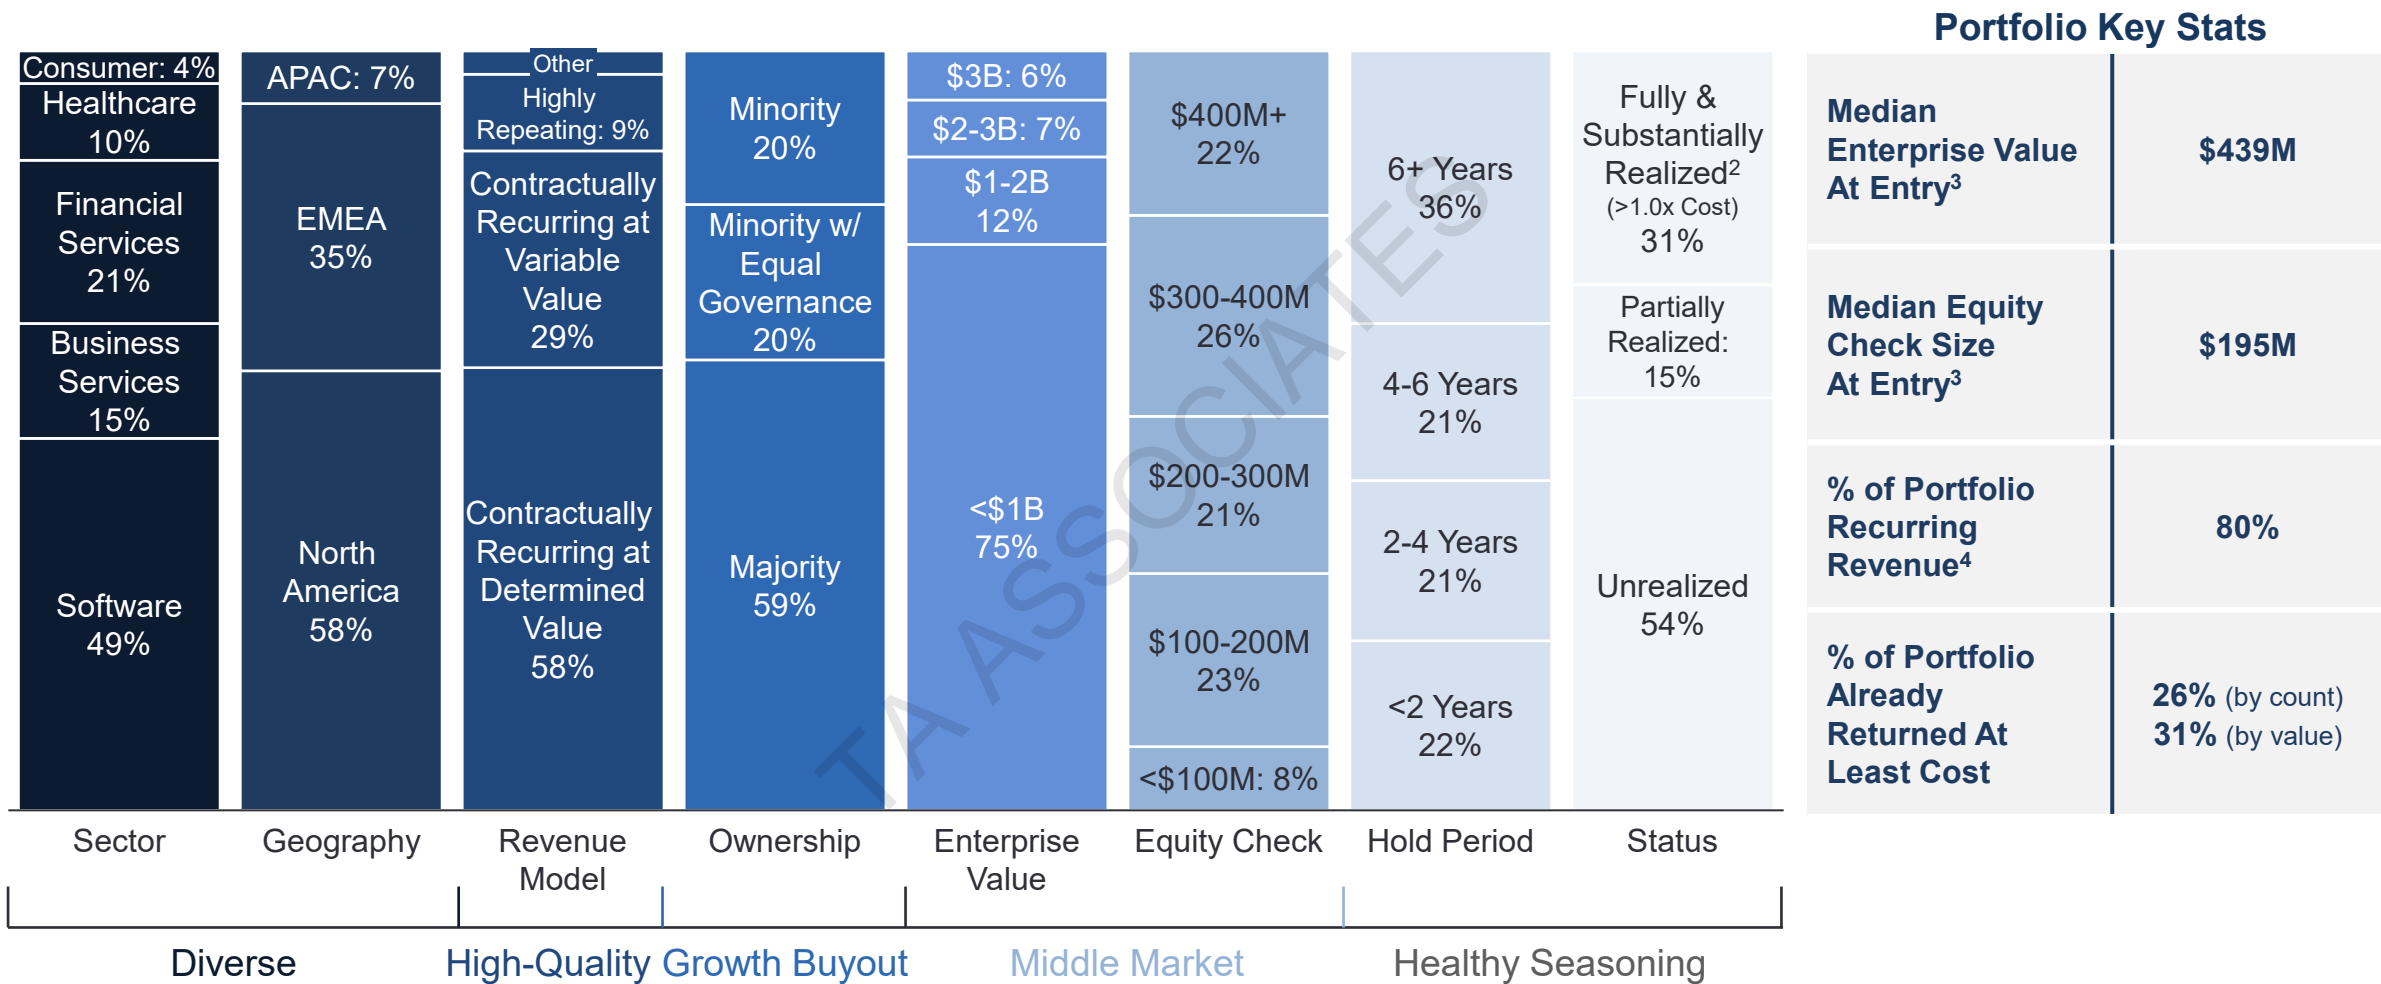

- We have a large and diverse portfolio, with \$40 billion of unrealized value across 146 companies¹
- Companies are generally performing well, albeit with some pockets of weakness
- Revenue growth has generally slowed across all segments
 - New bookings in particular have been slower, while upsell and cross-sell motion has continued to be productive
- While down from 2021 peaks, M&A continues to be active
- LTM reported margins increased ~90 bps YoY to 33%², with consumer contracting more recently
- Actively taking advantage of open capital markets, having completed 36 refinancings in the LTM period across the portfolio
- Transaction-based markups accounted for 64% of performance gains over the last 5yrs³, consistent with our valuation approach

Topline continues to be more challenged but outperforming the market, while margins are continuing to improve

Past performance is no guarantee of future results. ¹ Data as of 11/14/25. Portfolio company count includes Viridian, which closed post-quarter end. Data reflects the TA Equity Funds (TA Series + TA AP Series) and includes TA Investors. Pro forma for investments that have signed or closed post-9/30/25. ² Excludes Apex Group, Jupiter, Lumivero, Serengeti (RLDatix Life Sciences), Solifi, W.A.G., and ZoomInfo as data not yet available. Excludes Healix given outlier. ³ Beginning in 2021 and as of 9/30/25.

Portfolio Diversification

Large, Global and High-Quality Middle Market Portfolio – \$40 Billion of Unrealized Value Across 146 Companies¹

Past performance is no guarantee of future results. Data as of 11/14/25. Data reflects the TA Equity Funds (TA Series + TA AP Series) and includes TA Investors, weighted by unrealized value. Pro forma for investments that have signed or closed post-9/30/25. ¹ Includes Viridian, which closed post-quarter end. ² Fully and substantially realized includes companies that have returned 1.0x cost or greater. ³ Represents median at entry. ⁴ % of portfolio by count.

Portfolio Health

We Actively Monitor the Performance of the Unrealized Portfolio Using a RAG (Red, Amber, Green) Assessment

Q3 2025 Performance RAG Assessment (% of Total Invested Cost)

Realized portfolios have generated >3x Gross MOIC². Majority of the unrealized portfolio continues to perform well; greater proportion of Amber and Red companies in TA XIV is driving heightened attention

Data as of 9/30/25, unless otherwise noted. Past performance is no guarantee of future results. The RAG Assessment is weighted by invested cost, excludes public companies, and is based on TA's assessment of information known at the time. Actual results may vary. ¹ Represents full exits or companies that have returned 1.0x MOIC or greater. ² See End Notes 3b1 and 3b2 for a description of Gross Multiple. See End Note 4 for details on Blended Returns. This performance information is hypothetical performance that was never realized by any fund or investor. See End Note 21 for additional information regarding Hypothetical Performance. This is extracted performance, please see the first and second slides of the Appendix: TA Equity Investments section for a comparison of Gross and Net MOIC for the total portfolio/Fund for TA Funds and TA AP Funds. ³ Only includes active investments as of 9/30/25. Age is calculated by taking a weighted average based on invested cost. Adjusted age is calculated using a weighted average based on remaining value, using the more recent of either the date of an equity recap transaction or the initial investment date. ⁴ Excludes Jupiter (TA XII), Apex Group (TA XIII/TA XIV) and Lumivero (TA XIV) as data not yet available.

TA XIV Portfolio Health

Recent Positive Momentum in a Tougher Vintage Impacted by Both Market and Company-Specific Challenges

Q3 2025 Performance RAG Assessment⁶

(% of Total Invested Cost)

TA XIV (ex. Consumer)
N=53
1.5x Gross MOIC^{5,6}

of Investments Gross MOIC⁵

Fully & Substantially Realized ^{1,2}	8	3.9x
Green = On or Ahead of Plan	30	1.2x
Amber = Behind Plan	10	0.9x
Red = Performance Challenged	3	0.6x
TA XIV (ex. Consumer)⁶	53	1.5x
Consumer	4	0.4x
TA XIV⁶	57	1.4x

Primary TA challenges and lessons learned:

- Unsuccessfully extended our strategy with several consumer roll-up platforms
→ **Stopped making consumer products investments**
- Large investments in Apex Group, iCIMS, Insurity and Veracode have underperformed due to challenged demand, competitive pressures, revenue model transitions and / or roll up integration issues
→ **Raised underwriting vigilance**
- Larger EV deals have disproportionately underperformed in TA XIV
→ **Greater emphasis on mid-market transactions**
- 50% of the fund was invested in the H2 2021-H1 2022
→ **More disciplined pacing**

Market backdrop:

- Onset of **several market headwinds: rising interest rates, inflation and softening demand** have had an **impact**, particularly on the **initial cohort of investments**

Actively monitoring performance of unrealized portfolio, with overall **positive trending recent performance**

- **14%² revenue growth and 17%² EBITDA growth in Q3 2025**
- **\$3.6B of liquidity to-date** primarily from eight investments^{3,4}

SRG / deal teams focused on supporting more challenged portfolio companies

Data as of 9/30/25, unless otherwise noted. Past performance is no guarantee of future results. The RAG Assessment is weighted by invested cost and is based on TA's assessment of information known at the time. Actual results may vary. Lumivero is excluded from the RAG assessment as data is not yet available. ¹ Represents companies that have returned 1.0x MOIC or greater. ² Based on owned EBITDA at 9/30/25. ³ Pro forma for transactions that have signed but are not yet closed. Includes Adcubum, Advantive, Cliffwater, Hornetsecurity, PDQ.com, PTMA, PrimeRX, and Technosylva. ⁴ Excludes TA Investors. ⁵ See End Note 3b3 for a description of Investment Gross Multiple. See End Note 4 for details on Blended Returns. This performance information is hypothetical performance that was never realized by any fund or investor. See End Note 21 for additional information regarding Hypothetical Performance. This is extracted performance, please see the first and second slides of the Appendix: TA Equity Investments section for a comparison of Gross and Net MOIC for the total portfolio/Fund for TA Funds and TA AP Funds. ⁶ RAG Assessment data excludes Apex Group and Lumivero as data not yet available, but included in the TA XIV (ex. Consumer) and TA XIV # of investments and aggregate Gross MOIC totals.

1-2 ppts of increased revenue growth & over £20M of cost savings² by 2027

Company is targeting 100% AI adoption, 2-10x productivity improvement and double-digit product-led organic growth

Portfolio Growth vs. Market

Portfolio Continues to Exhibit Growth Outpacing the Market

Reported Revenue Growth

Reported EBITDA Growth

With the exception of the inflationary period of 2022, TA has exceeded market growth each of the last five years

Data as of 6/30/25. Past performance is no guarantee of future results. Data shown for all current TA Equity Funds (TA Series + TA AP Series). See End Note 24 regarding third-party sources. ¹ Data represents portfolio company revenue and EBITDA growth adjusted for TA ownership at going-in FX rates. Historical data represents portfolio at respective period ends unless otherwise noted. 2023 and 2024 data excludes AlephYa, Jupiter and W.A.G. as data not available. Q2 2025 data excludes Apex Group, W.A.G and Jupiter as data not available. ² Revenue and EBITDA growth, All Sectors, 50th Percentile. Paid Source: MSCI Private Capital Intel, which is a paid subscription service, covering the quarter ending 6/30/25 (the latest available data). ³ Source: S&P Capital IQ.

EBITDA Margins

Margins Across the Portfolio Have Stabilized Over the Last Several Quarters

Margins across the portfolio increased ~90 bps year-over-year despite more challenging trend on topline

Data as of 9/30/25. Past performance is no guarantee of future results. Data shown for all current TA Equity Funds (TA Series + TA AP Series). Data represents portfolio company revenue and EBITDA growth adjusted for TA ownership at going-in FX rates. Excludes Apex Group, Jupiter, Lumivero, Serengeti (RLDatix Life Sciences), Solifi, W.A.G., and ZoomInfo as data not yet available. ¹ Healthcare excludes Healix given outlier.

Portfolio Liquidity and Defensive Equity Requirements

Cashflow Has Improved Across the Entire Portfolio; Equity Infusions Have Remained Very Limited

Q3 2025 Liquidity RAG Assessment¹
(TA XII-XV; % of Total Invested Cost)

Total TA Net Asset Value vs. Defensive Equity Infusions (\$M)^{2,3}

We believe quality focus, CMG support, interest hedging, and active portfolio management have helped reduce the number of companies with liquidity concerns, resulting in very few businesses requiring defensive capital

Data as of 9/30/25. ¹ The RAG Assessment is weighted by invested cost, excludes public companies, and is based on TA's assessment of information known at the time. Actual results may vary. Excludes Apex Group, Lumivero, Jupiter, W.A.G, and ZoomInfo as data not yet available. ² Data reflects the TA Equity Funds (TA Series + TA AP Series) and includes TA Investors. ³ TA defines defensive equity infusions as additional capital investments from the TA funds made solely to support company operations, excluding capital investments primarily intended to support M&A activity.

Financing Through Market Cycles

Market Backdrop Continues to Improve, with Lender Supply and Sentiment Becoming More Borrower Friendly...

Illustrative Private Credit Unitranche Financing of a North America HQBM Company

Nearly all key economic terms have also improved for buyers across the broader market over the last four years

YTD 2025 Liquidity Events

\$5.2B of Proceeds Realized YTD 2025

Past performance is no guarantee of future results. Data as of 11/17/25. Data is for the TA Equity Funds (TA Series + TA AP Series) and includes TA Investors. ¹ Final/full exit represents the sale of the remaining stake in certain TA funds, where applicable, as we may still hold re-investments in other funds. ² Signed, not closed. ³ As part of the transaction, TA XII and AP VII sold all remaining shares and TA XIV rolled all shares. Figures presented above relate to TA XII and AP VII only (original Solabia investment). ⁴ Signed, not closed. ⁵ Recap transaction closed with \$439M of proceeds realized in April 2025 related to a debt recap and \$543M of proceeds realized in June 2025 related to an equity recap. ⁶ Proceeds and returns figures are for IFS standalone (excludes WorkWave). As part of the transaction, TA XII sold all remaining shares and TA XIII rolled 51% of its stake. ⁷ In addition to the logos shown, this category also includes Aptean, Benecon, Caprock Group, Cliffwater, Confluence, Cyncly, Fintech, Fisher Funds, ICMG, Idera, IMA Medical Group, In.Corp Global, LeadsOnline, MicroSeismic, Mid America Pet Food, MISA, NetSmart, Nexus Brands, NSE, OMNIA, Priority Software, Procure, Revalize and Yarra Capital Management. ⁸ In addition to the logos shown, this category also includes Jupiter Fund Management and ZoomInfo. ⁹ Total count excludes liquidity events for which proceeds YTD 2025 were less than \$1 million. See End Note 4 for details on Blended Returns. See Appendix for a complete list of investments and performance of TA Fund's Equity investments since TA VII. See End Note 22 for additional details on Case Studies.

Closer Look at Recent Exits

Amid Market Slowdown, We Continue to Lean In and Unlock Liquidity Across All Avenues

We believe that even in today's market, high-quality businesses can still achieve liquidity at attractive valuations

Past performance is no guarantee of future results. Data as of 11/17/25 unless specified otherwise. Data is for the TA Equity Funds (TA Series + TA AP Series) and includes TA Investors. ¹ Based on realized proceeds YTD 2025. ² See End Notes 3b3 and 3a3 for a description of Investment Gross Multiple and Investment Gross IRR. This is extracted performance, please see the first and second slides of the Appendix: TA Equity Investments section for a comparison of Gross and Net MOIC for the total portfolio/Fund for TA Funds and TA AP Funds. ³ As part of the transaction, TA XII and AP VII sold all remaining shares and TA XIV rolled all shares. Figures presented above relate to TA XII and AP VII only (original Solabia investment). ⁴ Signed, not closed. ⁵ Signed, not closed. Expected to realize approximately 2.7x MOIC at closing and an additional 0.3x MOIC over the following 18 months. ⁶ Recap transaction closed with \$439M of proceeds realized in April 2025 related to a debt recap and \$543M of proceeds realized in June 2025 related to an equity recap. Reflects valuation of rollover at implied transaction value excluding discount applied due to subordinated equity position. Including discount applied, Total MOIC is 7.3x gross. ⁷ Proceeds and returns figures are for IFS standalone (excludes WorkWave). As part of the transaction, TA XII sold all remaining shares and TA XIII rolled 51% of its stake. ⁸ Reflects valuation of rollover at implied transaction value excluding discount applied due to subordinated equity position. Including discount applied, Total MOIC is 4.3x gross. ⁹ Weighted by invested cost. This performance information is hypothetical performance that was never realized by any fund or investor. See End Note 21 for additional information regarding Hypothetical Performance. ¹⁰ In addition to the logos shown, this category also includes Aptean, Benecon, Caprock Group, Cliffwater, Confluence, Cynclly, Fintech, Fisher Funds, ICMG, Idera, IMA Medical Group, In.Corp Global, Jupiter Fund Management, LeadsOnline, MicroSeismic, Mid America Pet Food, MISA, NetSmart, Nexus Brands, NSE, OMNIA, Priority Software, Procare, Revalize, Yarra and ZoomInfo.

Liquidity Outlook

Balanced Portfolio Targeting Meaningful Near-to-Medium Term Liquidity

VI SRG and Value Creation

TA ASSOCIATES

TA's Approach to Value Creation

Tailored Engagement for Every Investment

SRG's Mission is to sustain / accelerate profitable growth within the existing TA portfolio and validate and support robust investment theses that drive quality productivity

Operational Framework

Dynamic Engagement Model

- Aligned with how we invest and each deal's specific needs
- Three engagement models:
 - 1 Key Stakeholder Engagement / Cradle to Liquidity ("C2L")
 - 2 Special Project Work
 - 3 Management Team Extensions
- Engagement models are not mutually exclusive

Team and Expertise

- 28 SRG professionals + 38 Operating Advisors
- Deployment depends on:
 - Scope of work
 - Turnaround time
 - Specialized expertise
- Advisors engaged per project through pre-contracted agreements

Funding and Access

- SRG capabilities are funded by the TA management company
- Capabilities are available to every portfolio company to directly contribute to our 180-day plans and long-term value creation

Data as of 10/1/25.

SRG Value Creation Levers & Core Capabilities

TA Has Developed Hands-On Functional Expertise to Accelerate Growth and Operational Excellence

Core capabilities are deployed across TA's different models of engagement to drive value creation

TA strategy; results cannot be guaranteed.

Strategic Resource Group Team Growth and Evolution

A Large Team of SRG Resources Supports Our Portfolio Companies

¹ Reflects team and portfolio size as of 10/1/25.

AI Expertise Supporting TA Portfolio and Deal Teams

Ongoing Efforts to Expand SRG's AI Capabilities Through Internal and External Resources

AI-Focused Operating Advisors

- Current bench of TA OAs:
 - **Kerem Tomak** – Global Chief Analytics Officer, ING
 - **John Pritchard** - CEO of Radiant Logic, PhD in AI
 - **Praerit Garg** – fmr CPO at Smartsheet, board member at Radiant Logic
 - **Andrew Volkov** - fmr co-founder and CTO of smart automation company WorkFusion
- Current CTO OAs (Ron Park, Robin Crewe) to act as Tech DD quarterbacks and partner with AI-focused OAs as needed

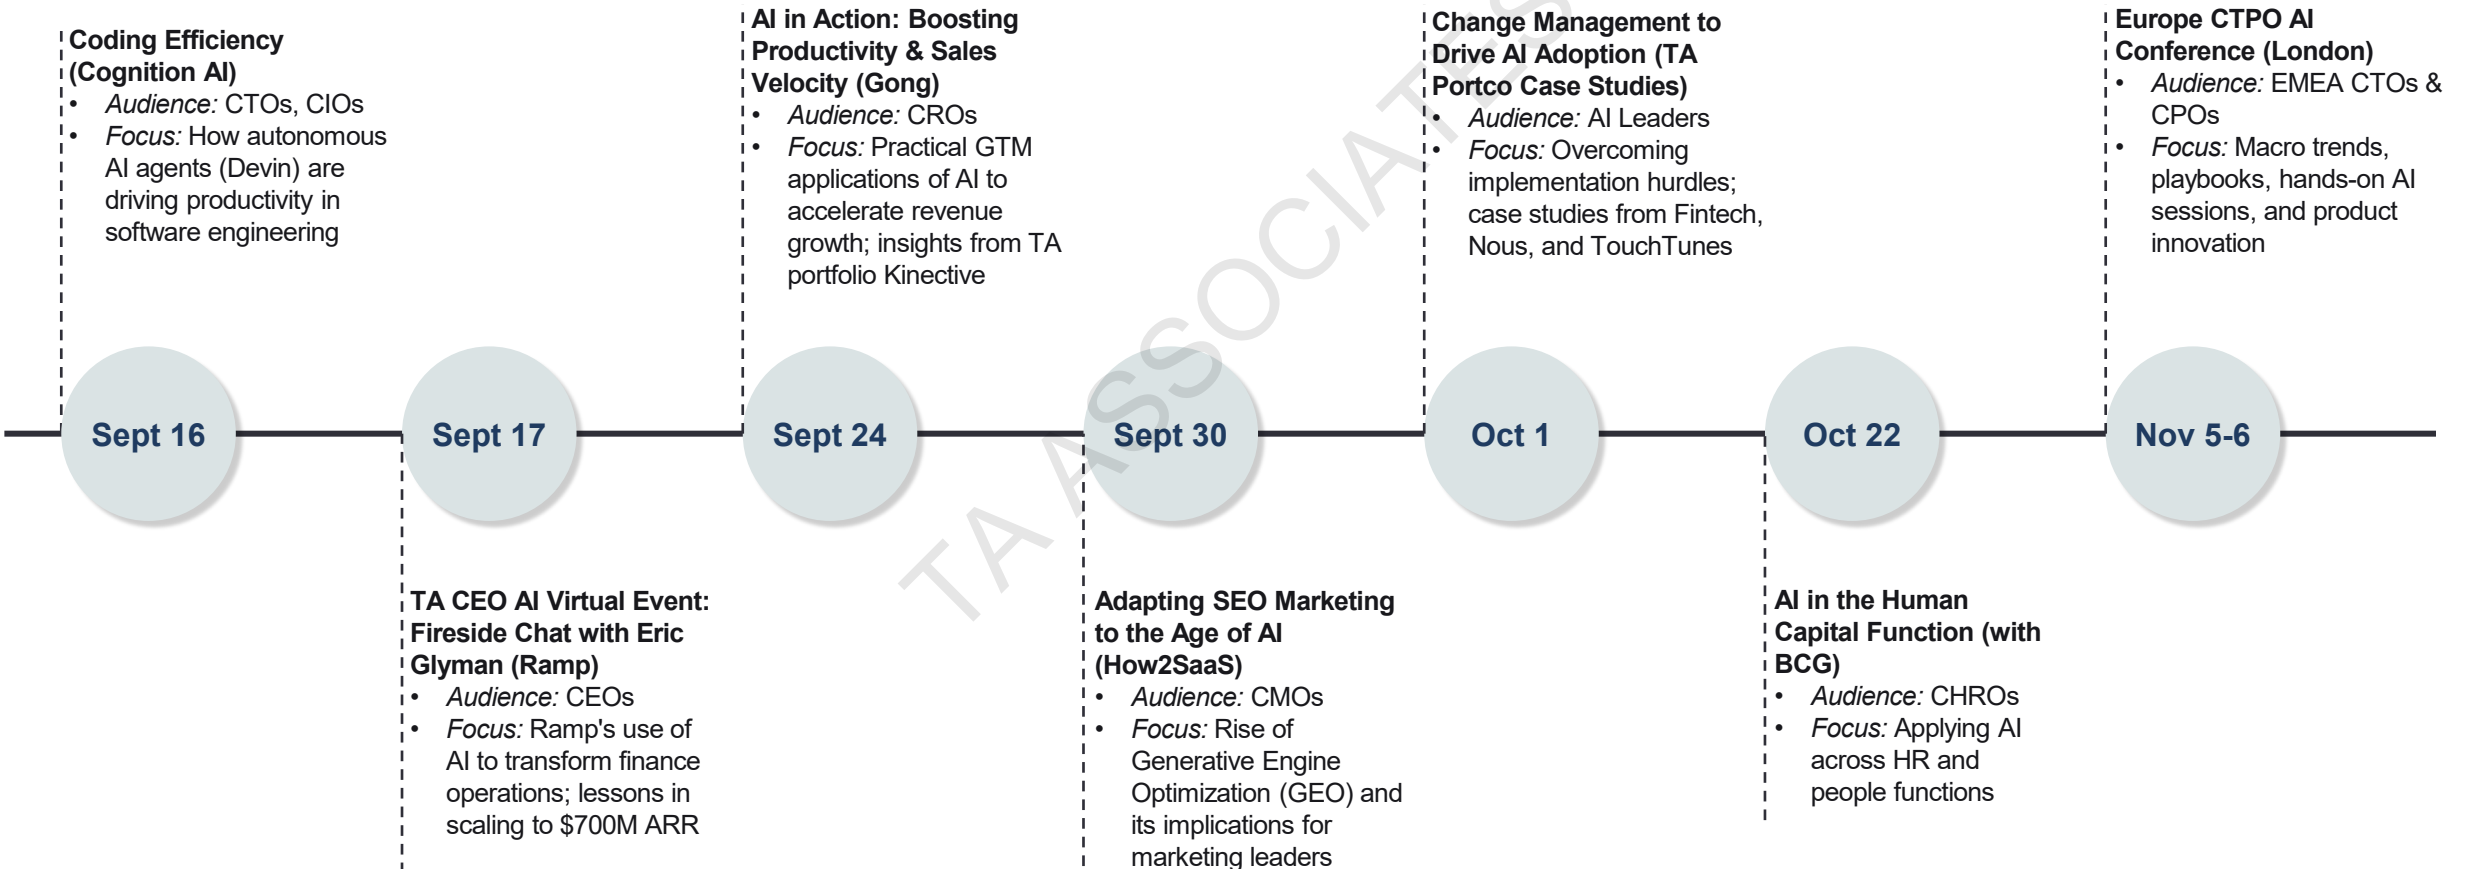

Portfolio AI Steering Committee

- TA PortCo tech & product leaders leading AI; will guide TA's AI & host quarterly AI roundtables
 - Fritz Hesse (CTO) and Alan Friedman (CPSO) (Riskconnect)
 - Alex Yin (President, ePassi)
 - Jenny Peng (CDO, Aptean)
 - Claus Jepsen (CTO, Unit4)
 - Jonathan Victor (CIO & COO, Insurity)
 - Robert Downey (CTO) and Vivek Desai (CTO) (RLD)
 - Steve Law (CTO, Agilio)
 - Jordan Dick (CTO) & Stacie Lindsay (CPO) (FGE Nexant)
 - Suresh Somasundaram (CTO, TouchTunes)
 - Bryan Thompson (CTO, 8am)
 - Adam Field (Global Head of Product, Tungsten)
 - Reed Colley (President of Technology, Orion)

Series of AI-Focused Events to Help Portfolio Leaders Understand and Apply AI in R&D, GTM, Finance, Marketing, HR

Event Timeline

VII Organizational Update

TA ASSOCIATES

Organizational Update

Team Remains Stable with a Continued Focus on Talent Development Across the Firm

Key Organizational Updates and Reminders

- Previously communicated organizational updates progressing with seamless transitioning of responsibilities:
 - Jennifer Mulloy (Menlo Park) transitioning to Senior Advisor at year-end
 - Mark Carter (Boston) transitioning to Senior Advisor in early 2026 with Ethan Liebermann (Boston) assuming the role as sole head of TA's North America Healthcare Group a year ago
- Effectuating the reorganization of the NA Consumer team to best align our resources with the most actionable new opportunities, while ensuring existing consumer portfolio is well covered
- Promotions and Committee assignments assessed and communicated each year end both internally and to our limited partners
- Creating Enterprise Value at the GP / monetization of the GP value is not the focus of the partnership

Investment in Talent, Training and Knowledge Sharing Across the Firm

- In recent months, we've held several key events and including annual Associate Training, our Investment Staff Offsite, and the bi-annual Retreat
- Investing in internal AI-driven content initiatives and hosting regular knowledge-sharing events to strengthen firmwide expertise
 - Building an AI Center of Excellence
- Focused on developing the next generation of talent across the organization

Team Resources and NA Consumer Update

Seeking to Take a Thoughtful Approach to Consumer Team Reorganization

Region	Industry Group	Sponsors	Associates
North America	Technology	13 ← ①	15 ← ②
	Business / Financial Services	14 ← ①	17 ← ②
	Healthcare	5 ← ②	5 ← ②
	Consumer	4	6
Europe	Technology	8	6
	Business / Financial Services	8	5
	Healthcare	4	3
Asia	All Sectors	12	11
Total		68	68

- **Large, dedicated teams** are deep in each of our core sectors, targeting new opportunities and covering existing portfolio (relatively stable **~2.1 portfolio companies per Sponsor** even as portfolio has grown)
- **Re-aligning dedicated North America Consumer team** into other Groups from a new deal perspective, **while existing team remains responsible for covering current consumer portfolio**:
 - Jeff Barber (MD) and Jessica Gilligan (Director) will join the NA Healthcare group
 - Danny Gold (SVP) will join the NA Services group
 - Michelle Ra (VP) will join the NA Technology group
 - Associates similarly moving to other industry groups

Data as of 10/1/25.

TA Accelerate 2025

New Leadership Development Program Crafted to Accelerate Growth and Leadership Potential

TA Accelerate at a Glance

- From September 22-25, **40 Executives from 36 TA portfolio companies** took part in the TA Accelerate Program at Harvard Business School
- Key Pillars of the Program
 - **Case Method Learning**: Develop critical thinking, strategic decision-making, and leadership through real-world business challenges
 - **Immersive HBS Experience**: On-campus program in Boston with access to world-class resources and facilities
 - **Peer Networking**: Collaboration between 40–50 senior executives from TA's North America portfolio¹
 - **Ongoing Engagement**: Continuous learning through virtual post-program pods for insight sharing and collaboration

What Participants Valued Most

- Appreciation for TA's investment in them as individuals, not just as leaders at PortCos
- HBS faculty and case method received praise for clarity, structure and impact
- The curriculum struck the right balance between strategy and leadership development
- Peer learning and new executive relationships highlighted as a lasting benefit of the week

Participant Feedback

- “The content was **strategic, relevant, and immediately applicable**. I left **energized** and already began applying frameworks on **day one** back.”
- “TA’s investment in us as individuals – not just as executives – really came through. **That matters.**”
- “I learned a great deal, built valuable connections with other TA portfolio companies, and, **most importantly, came away a better leader.**”
- “The program was **exceptionally well designed**, the faculty and curriculum were **world-class**, and the cohort was **highly engaged.**”
- “The program was **life changing.**”

¹ Geographic focus rotates; Year 2 will be for Europe and International participants.

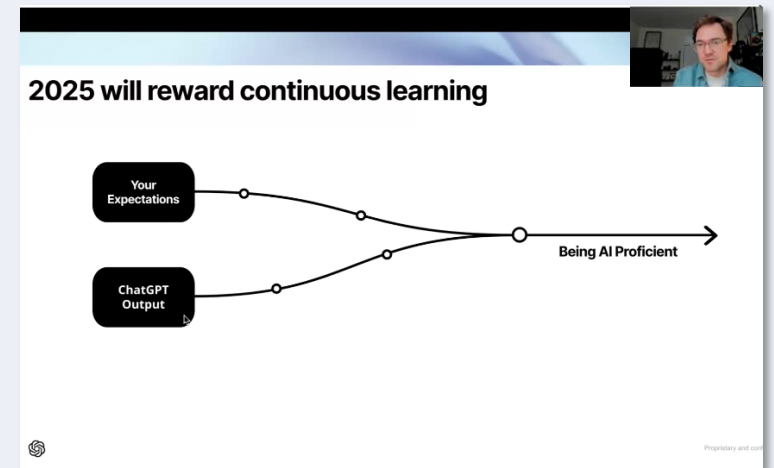

AI at TA

Firmwide AI-Focused Events to Help Educate and Promote Adoption Across the Firm

Internal TA AI at a Glance

- TA hosts regular firmwide AI teach-ins to upskill staff and share updates on AI across the firm and portfolio
- Key topics covered:
 - AI risk & opportunity underwriting framework
 - Assessment of AI usage across the firm
 - Internal AI tooling use cases
 - Ongoing SRG AI and events
 - AI assessments conducted by external partners
 - TA AI policy
- Key training sessions:
 - GenAI Training (hosted by BCG)
 - ChatGPT Enterprise Training (hosted by Open AI)
 - Associate AI Training
 - Demo of AI uses cases for internal productivity
 - Demo of latest AI tools
- We have AI experts and industry leaders come share their insights and perspectives, including:
 - Nikesh Arora (CEO of Palo Alto Networks)
 - John Pritchard (CEO of Radiant Logic)
 - Eric Glyman (CEO of Ramp)

Event Photos

AI in TA Operations Today

We are Harnessing AI to Unlock Efficiency and Leverage Nearly Six Decades of Proprietary IP

Deal Sourcing

- Automated company screening
- Custom outreach emails & follow-ups
- Thematic thesis generation
- Live note-taking during calls
- Call prep
- Deep research on sub-industries & trends
- AI agents for quick synthesis of materials

IC and Board Prep

- Sense-checking and validating
- Finding relevant precedents
- Comparing board materials for key insights & changes

Diligence

- Cleaning & summarizing meeting notes
- Querying and summarizing VDR/CIM/reference materials
- Deep research primers on industries & competitors
- Thematic thesis creation
- Scenario exploration prompts
- Drafting diligence call agendas
- Searching internal precedents

Portfolio Monitoring, Reporting & Value Creation

- M&A idea generation
- Validating company plans (AI “harsh reviewer” role)

Embedding AI across the firm by adopting tools, upskilling teams via regular teach-ins and fostering a culture of continuous learning and knowledge sharing

VIII Concluding Thoughts

TA ASSOCIATES

Concluding Thoughts

Leveraging Past Learnings While Maintaining Discipline and Adaptability in a Dynamic, Competitive Market

- TA strives to **continuously learn** from our **experience** and the **environment** around us
- **Our** recent **mistakes** are different (thankfully not repeated), but still painful and **require reflection and learning**
- **Accelerating** our **investment** and organizational **focus** on **AI** in **underwriting**, the **portfolio** and **within TA**
- Our **commitment to high-quality businesses** continues to underpin overall portfolio resilience and, we believe, position us well to **generate liquidity** opportunities in **all environments**
- TA has **three organizational priorities** guiding us today:
 - Continuing to hold our **underwriting bar high** for new investments in TA XV
 - Driving **ambitious liquidity goals** across funds over the next few years, returning to our distribution yield goals
 - Working to **drive growth, performance** as well as more liquidity in **TA XIV**
- During this ongoing period of macro uncertainty, we remain:
 - A **wholly-owned and stable partnership**
 - **Committed to sustaining our culture of entrepreneurship, meritocracy and process integrity**
 - **Aligned with our investors around a single strategy**

TA strategy; results cannot be guaranteed.

TA Atlantic and Pacific Funds

Third Quarter 2025 Update

TA ASSOCIATES

TA ASSOCIATES

TA Atlantic and Pacific VII

Fund Overview

TA Atlantic and Pacific VII

Dashboard

Fund Overview (as of 10/31/25)¹

Inception:	January 2014
LP Capital Commitments:	\$1,405M
Capital Contributions:	\$1,391M / 99.0%
Investments:	61 total ² / 23 remaining (39% of invested cost)**

Fund Performance (as of 9/30/25)

	Net	Burgiss Rank ⁴	Unlevered Net
IRR ³	42.3%	First Quartile	42.3%
DPI ³	4.12x	First Quartile	
TVPI ³	4.90x	First Quartile	4.90x

Public Market Equivalent IRR ⁵	TA AP VII vs. PME ⁵
S&P 500	11.9% +30.4%
MSCI ACWI	8.4% +33.9%
NASDAQ	16.8% +25.5%

Portfolio Summary (as of 9/30/25; USD in millions)

Past performance is no guarantee of future results. * Includes reinvested capital. ** 15 of 23 remaining investments have had significant partial liquidity events of 1x cost or greater. Excluding these partially realized investments, 13% of invested cost remains outstanding. ¹ Data as of 10/31/25. ² In Q3 2025, following the merger of RLDatix's Life Sciences subsidiary with MediSpend, TA began reporting on RLDatix and the newly merged, standalone life sciences company, Serengeti, separately. ³ See End Notes 3b1, 3b2, 3a1, 13, 14, 20 and 15 for a description of Fund Net Multiple, Fund Gross Multiple, Fund Net IRR, Distribution Multiple, TVPI, Unrealized Value and RVPI. ⁴ Paid Source: Burgiss, which is now known as MSCI, is a paid subscription service, covering the quarter ending 6/30/25 (latest available data), which was published on 9/20/25. See End Notes 25-27 for more information about third-party rankings, including the MSCI Private Equity Benchmarks (128 Private Equity Funds – Class of 2014). As of 6/30/25: IRR Upper Quartile: 23.2%, IRR Median: 15.1%, DPI Upper Quartile: 1.92x, DPI Median: 1.42x. TVPI Upper Quartile 2.30x, TVPI Median 1.83x ⁵ See End Notes 25 and 26 for information on how PME is calculated and details related to index comparisons. ⁶ 90% invested in new companies and 10% invested in add-ons; includes reinvested capital. ⁷ Includes fully- and partially-realized companies. See End Note 4 for details on Blended Returns. *** Recycling does not impact the Gross Multiple, but does impact the Net Multiple. Therefore, to make the Gross and Net Multiple comparable, TA has calculated an adjusted gross multiple, which represents the total gross realized and unrealized proceeds from investments less recycled capital divided by paid-in capital. Adjusted gross value represents total gross realized and unrealized proceeds from investments less recycled capital. See Appendix for a list of investments and performance of TA Fund's equity Investments since TA VII.

P = Publicly-Traded Company. Past performance is no guarantee of future results. ¹ See End Note 3b3 for a description of Investment Gross Multiple. See End Note 4 for details on Blended Returns. See End Note 22 for additional details on Case Studies. ² Reflects discount to transaction value. Excluding discount applied, transaction implies 3.1x MOIC. ³ In Q3 2025, following the merger of RLDatix's Life Sciences subsidiary with MediSpend, TA began reporting on RLDatix and the newly merged, standalone life sciences company, Serengeti, separately. ⁴ Current Fund Total count includes Solabia, which closed post-quarter end. ⁵ This performance information is hypothetical performance that was never realized by any fund or investor. See End Note 21 for additional information regarding Hypothetical Performance. ⁶ All data presented on an owned basis at going-in FX rates. Q3 data as of 9/30/25. Excludes W.A.G. as data not yet available. See Appendix for a list of investments and performance of TA Fund's equity Investments since TA VII.

Appendix: Additional TA Atlantic and Pacific Funds Reporting

Currency Hedging

TAAP Funds Currency Impact (as of 9/30/25)

TA Fund Currency Exposure

- USD denominated funds
- Invest internationally in various currencies
- Concentrated generally in EUR + GBP

Hedging Guidelines

- Goal: Minimize impact of FX on returns
- Target currencies with multiple investments and attractive hedge rate
- Use liquidity proceeds to settle hedges
- Generally hedge <100% of cost/value to avoid becoming overhedged

Execution

- Generally 3-5 year forward contracts
- Portfolio hedges and individual deal hedges (sign to close)
- “Dollar cost averaging” by executing over time
- Executive Committee approval required

TA Funds hedge currency exposure through use of EUR + GBP 3-5 year forward contracts

Past performance is no guarantee of future results. This page includes investment characteristics sought by TA, but there can be no assurance that each actual investment by TA will have these characteristics. See Appendix for a list of investments and performance of TA Fund's equity Investments since TA VII.

Through 2014, the TA Atlantic and Pacific Equity Funds were raised primarily for non-US investors and invested alongside the TA Funds with the same investment strategy; After TA AP VII (2014), the AP and TA Funds combined into a single series

Past performance is no guarantee of future results. AP VI and prior funds did not utilize fund-level leverage so fund returns shown are unlevered. ¹ Includes the Atlantic and Pacific series funds raised since Advent Atlantic and Pacific Fund III, L.P. ("TA AP III"), which began investing in 1996. This Fund series and timeframe were selected as they best reflect TA's current investment strategy of investing in profitable growth equity investments. ² See End Notes 3a1, 3a2, 3b1, 3b2, 3d2 and 13 for a description of Net IRR, Gross IRR, Net Multiple, Gross Multiple, Net Multiple for Multiple Funds, and Distribution Multiple. See End Note 4 for details on Blended Returns. ³ This performance information is hypothetical performance that was never realized by any fund or investor. See End Note 21 for additional information regarding Hypothetical Performance. ⁴ Includes TA AP VII-A and TA AP VII-B; Net returns are blended and may not reflect a LP's actual return. Actual Net IRR for TA AP VII-A and TA AP VII-B is 42.4% (42.4% unlevered) and 42.2% (42.2% unlevered), respectively. ⁵ Net Multiple and Net IRR exclude the General Partner's LP interest. The General Partner does not have an LP interest in other funds.

As of 9/30/25. Past performance is no guarantee of future results. ¹ The list includes all investments made by the TA Equity Funds since Advent VII, L.P. ("TA VII"), which began investing on 8/13/1993, through the time period noted above, and does not include investments made by prior Funds some of which had investments in 1993. This Fund series and timeframe was selected as it best reflects TA's current investment strategy of investing in profitable growth equity investments. It should not be assumed that Funds raised in the future will have similar investments or returns and actual results may vary substantially. ² Gross Multiple of invested capital (MOIC) is calculated by dividing gross proceeds and current valuation by total cost and do not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns. * Due to the treatment of the Tax Receivable Agreement (TRA), total MOIC by fund may vary. As of 9/30/25 only the TRA remains. ** MOIC reflects a discount applied due to subordinated equity position. *** Based on original invested cost and reflects netting of proceeds received to fund deferred purchase price. **** Based on original invested cost and reflects netting of proceeds received and a subsequent add on.

As of 9/30/25. Past performance is no guarantee of future results. ¹ The list includes all investments made by the TA Equity Funds since Advent VII, L.P. ("TA VII"), which began investing on 8/13/1993, through the time period noted above, and does not include investments made by prior Funds some of which had investments in 1993. This Fund series and timeframe was selected as it best reflects TA's current investment strategy of investing in profitable growth equity investments. It should not be assumed that Funds raised in the future will have similar investments or returns and actual results may vary substantially. ² Gross Multiple of invested capital (MOIC) is calculated by dividing gross proceeds and current valuation by total cost and do not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns. * Due to the treatment of the Tax Receivable Agreement (TRA), total MOIC by fund may vary. As of 9/30/25 only the TRA remains. ** MOIC reflects a discount applied due to subordinated equity position. *** Based on original invested cost and reflects netting of proceeds received to fund deferred purchase price. **** Based on original invested cost and reflects netting of proceeds received and a subsequent add on.

End Notes

Definitions and Disclosures

1. **Past Performance.** Past performance is no guarantee of future results. It should not be assumed that investments made in the future will be profitable or equal to the performance of previous investments. Past or current fund or portfolio wide percentages are illustrative and are not necessarily indicative of future holdings. Actual results may vary. Investing in a Fund involves significant risks, including loss of the entire investment. Each investment is subject to its own unique risks and the financial performance of the investments will vary from investment to investment and those variances may be material. An investment or investment strategy is impacted by numerous factors, including market and economic conditions, which are out of the control of TA Associates and which may result in a loss to investors.
2. **Forward Looking Statements.** When used herein, the words “anticipate,” “believe,” “estimate,” “expect,” “forecast,” “hypothetical,” “intend,” “plan,” “potential,” “project,” “should,” and variations of such words and similar expressions are intended to identify forward-looking statements. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, such as statements about Fund returns, portfolio company information such as future revenues, earnings, strategies, prospects, consequences, and potential changes. Such forward-looking statements are subject to risks and uncertainties, including, but not limited to, those caused from macroeconomic conditions, pandemics, domestic and foreign policies, climate change and war, and which could cause actual results to differ materially from those anticipated. Forward looking statements and projections are included for discussion purposes only and cannot be guaranteed. As with any investment, there is a risk of a total loss, results are not guaranteed, and actual results may vary.
3. **Return Calculations**
 - a) **IRR**
 1. **Fund Net IRR** refers to the internal rate of return to investors on their investment. Fund Net IRR is calculated using daily capital contribution, cash and stock distributions, and the ending net assets of the LPs’ capital account and reflects the deduction of management fees, performance allocations and other Fund level expenses. Includes AIVs or A/B/C fund structure; Net returns are a blended return and may not reflect a LP’s actual return. See End Note 4 for details on Blended Returns.
 2. **Fund Gross IRR** is calculated as an effective compounded rate of return using quarterly cash flows (investments in portfolio companies, proceeds and yield from investments) and the fair value of the portfolio determined in accordance with US GAAP as of the measurement date and do not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns. The fund gross IRR for Debt Fund V is calculated as an effective compounded rate of return using daily cash flows (investments in portfolio companies, proceeds and yield from investments) and the fair value of the portfolio determined in accordance with US GAAP as of the measurement date and do not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns.
 3. **Investment Gross IRR** is calculated as an effective compounded rate of return using quarterly cash flows (investment in a portfolio company, proceeds and yield from an investment) and the fair value of such investment determined in accordance with US GAAP as of the measurement date. Gross return calculations by investment do not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns.
 - b) **Multiple of invested capital (“MOIC”).**
 1. **Fund Net Multiple on Invested Capital (“Multiple” or “MOIC”)** is calculated by dividing distributions and the residual value of the LPs capital account by their paid-in capital and reflects the deduction of management fees, performance allocations and other Fund level expenses. Includes AIVs or A/B/C fund structure; Net returns are a blended return and may not reflect a LP’s actual return. Net Multiple is also referred to as Total Value Paid In (“TVPI”). See End Note 4 for details on Blended Returns.

End Notes (cont.)

Definitions and Disclosures

3. Return Calculations (cont.)

b) MOIC (cont.)

2. **Fund Gross Multiple** is calculated by dividing cash flows (investments in portfolio companies, proceeds and yield from investments) and the fair value of the portfolio determined as of the measurement date by the cost of such portfolio companies and does not reflect the deduction of management fees, performance allocations and other fund level expenses which substantially reduce investment returns.
3. **Investment Gross MOIC** is calculated by dividing gross proceeds and current valuation by total cost. Return calculations by investment are gross and do not reflect the deduction of management fees, performance allocations and other fund level expenses that are expected to substantially reduce investment returns.

c) **The Fund** returns presented herein include all returns generated by recycled (i.e., reinvested) capital. Without such recycled capital Fund MOIC returns would be materially lower. Returns for Funds that include one or more Reduced Fee LPs are calculated excluding such Reduced Fee LPs. Such returns also exclude GP commitments and, when the GP of a Fund is also an LP of such fund, the GP's LP interests are excluded from the calculation.

d) Aggregated Fund Returns

1. **Net IRR for multiple Funds** shown on an aggregated basis reflects the deduction of management fees, performance allocations and other Fund level expenses and is calculated using an effective compounded rate of return using daily cash flows (capital contributions from LPs and distributions to such LPs) and the fair value of the LPs' capital accounts determined in accordance with US GAAP as of the measurement date; quarterly cash flows are used for Funds launched prior to 2005. Due to the impact of time on such calculations, aggregated Fund Net IRR calculations emphasize the time value of money and utilize discounted future cash flows, which results in historical funds having more weighting than current funds. See End Note 3a1 for additional information relating to the calculation of Net IRR. Such returns were not actually realized by any fund or investor.
2. **Net Multiple for multiple Funds** shown on an aggregated basis is calculated by dividing distributions and the residual value of the LPs capital account by their paid-in capital and reflects the deduction of management fees, performance allocations and other Fund level expenses. See End Note 3b1 for additional information relating to the calculation of net multiple. Such returns were not actually realized by any fund or investor.

e) Returns by Investment.

1. **Calculating net returns on an investment-by-investment basis** in the context of private equity funds, including the Funds managed by TA Associates, is difficult to do with accuracy because management fees, performance allocation and other fund level expenses are taken at the full Fund level. This difficulty is driven by differences in the associated benefits relative to the investment size and in the timing of the acquisition and disposition of the investments. In addition, the calculation of carried interest depends on fund-level returns and not each investment in isolation.
2. Where net returns are provided for investments, these are calculated by applying the difference between the fund-level gross and net returns (net divided by gross) of the highest fee paying fund which holds each investment and applying the difference to the gross return of each investment.

End Notes (cont.)

Definitions and Disclosures

4. **Blended Returns.** Unless shown otherwise, returns for Funds that have established an A/B/C Fund structure or Alternative Investment Vehicles are a blended return by combining the Fund level inputs of each Fund as we view these as one fund in a fund series. However, because these are presented as one fund, no investor has received the returns indicated therein and thus, returns are hypothetical performance. See End Note 21 for a discussion of Hypothetical Performance.
5. **Aggregated and Composite Returns**
 - a) **Composite Returns.** The consolidated returns by investment reflected herein represent investments that were not made in the context of a single fund, were not part of a single investment program with coordinated investment objectives, guidelines and restrictions, and no investor has received the returns indicated therein. Thus, composite returns are hypothetical performance. The composite returns do not reflect the results of any individual investor and instead, represent a blended composite of certain investments as described in each such example. The investments selected for composite returns were chosen for discussion purposes to show TA's experience including TA Series Equity Funds, TA Series Select Opportunities Funds, TA Series Debt Funds and subsets thereof such as industry, recurring revenue, acquisitive, investment date, etc.
 - b) **Aggregated Returns.** The aggregated returns by fund reflected herein represent the returns of more than one fund and no investor has received the returns indicated therein. Thus, aggregated returns are hypothetical performance. The aggregated returns do not reflect the results of any individual investor and instead, represent a blended composite of certain funds as described in each such example. The funds selected for composite returns were chosen for discussion purposes to show TA's experience. See End Note 23 for details on the rationale for the time period selection.
6. **Reduced Fee Limited Partners.** For Funds that include Reduced Fee LPs (currently only TA Subordinated Debt Fund IV, L.P. and TA Debt Fund V, L.P.) returns are calculated excluding the Reduced Fee LP.
7. **Informative Calculations Exclusions.** In the interest of providing meaningful information to our limited partners, the general partner may, in its reasonable discretion, exclude certain investments from certain calculations. For example, when calculating the debt of the portfolio companies as a multiple of the EBITDA of those companies, companies with negative EBTDA are excluded.
8. **EBITDA and CAGR**
 - a) **Adjusted EBITDA less Cap SW.** Adjusted EBITDA less Cap SW for investments is adjusted EBITDA minus capitalized software development expenses.
 - b) **Cash EBITDA.** Cash EBITDA for investments is adjusted GAAP EBITDA plus or minus the change in deferred revenue, unless otherwise specifically noted.
 - c) **Compound Annual Growth Rate ("CAGR").** CAGR is the mean annual growth rate of an investment over a specified period of time longer than one year. CAGR cannot be calculated for companies with a negative EBITDA and in such circumstances companies with negative EBITDA are adjusted to \$1. Fund level CAGR calculations are weighted by owned EBITDA, as such, companies that have negative EBITDA do not have a material impact on the calculation. CAGR calculations exclude investments made within the past six months due to insignificant time to calculate meaningful CAGR.
9. **Recycled Capital.** The returns presented herein include all returns generated by recycled capital. Without such reinvested capital, the returns presented herein could be materially lower.
10. **Return on Average Partners' Capital.** Return on Average Partners Capital is calculated by dividing investment performance for the period by the average total partners' capital during the period.

End Notes (cont.)

Definitions and Disclosures

- 11. Return on Beginning Partners' Capital.** Return on Beginning Partners' Capital is calculated by dividing investment performance for the period by total partners' capital at the beginning of the period. Proceeds as a percent of Beginning Portfolio Value is calculated by dividing the proceeds received from portfolio investments during the period by the fair value of the portfolio determined in accordance with US GAAP as of the beginning of the period.
- 12. Annual Yield.** Annual yield is calculated by dividing liquidity for the period by Beginning Portfolio Value, divided by the number of years in that period.
- 13. Distributions to Paid in Capital ("DPI").** DPI by multiple or percentage is calculated by dividing cash and the value of securities distributed to the LPs by their paid-in capital.
- 14. Total value to Paid-in Capital ("TVPI").** TVPI is calculated by dividing distributions and the residual value of the LPs by their paid-in capital.
- 15. Residual Value to Paid-in Capital ("RVPI").** RVPI is the residual value (NAV) divided by paid in capital.
- 16. Liquidity Percentage.** Liquidity Percentage is calculated by dividing proceeds received and the value of securities distributed during the period by the fair value of investments at the beginning of the period.
- 17. Fund Capital Loss Ratio.** Fund Capital Loss Ratio is calculated by dividing the sum of the net loss on investments, including unrealized and realized losses, by the total cost of all investments in a given fund or time period.
- 18. Market Conditions.** Certain historical investment performance information contained herein is based upon periods that do not include (or fully reflect) the extraordinary market downturn that began in mid-2008 and its related financial/economic causes and effects or positive market growth periods experienced in more recent years. Prospective investors are urged to take these market periods into account in assessing the significance of such historical investment performance information including when assessing the decline or growth and performance of companies during these time periods.
- 19. Winners.** "Winners" are defined as realized or unrealized investments generating a gross MOIC of 3.0x and net MOIC of 2.0x or greater, before the effects of currency translation adjustments. This is target return information and is hypothetical performance that was never realized by any fund or investor, is not necessarily indicative or a guarantee of future results, was provided to help illustrate TA's investment strategy, and is not listed to show performance of any specific fund. See End Notes 20 and 21 for additional information regarding Unrealized Investments and Hypothetical Performance.
- 20. Unrealized Investments.** The fair value of unrealized investments is determined by the TA Portfolio Committee in accordance with GAAP and the policies outlined in the Fund limited partnership agreements and the Fund financial statements. The values of unrealized investments are estimated as of date indicated, are inherently uncertain and subject to change. There is no guarantee that such value will be ultimately realized by an investment or that such value reflects the actual value of the investment. Actual realized proceeds on unrealized investments will depend on, among other factors, future operating costs, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions on which the valuations reflected in the historical performance data contained herein are based. Accordingly, the actual realized proceeds on these unrealized investments may differ materially from the returns indicated herein and there can be no assurance that these values will ultimately be realized upon disposition of investments. Different methods of valuing investments and calculating returns may also provide materially different results.

End Notes (cont.)

Definitions and Disclosures

21. Hypothetical Returns. Hypothetical Performance is any performance that was not actually achieved by any portfolio of investments on behalf of an actual investor. In considering the hypothetical performance information contained herein, prospective investors should bear in mind that hypothetical performance, e.g., target and projected performance, consolidated returns (defined in End Note 5 above), and model performance returns, are not a guarantee and not necessarily indicative of future results. Due to various risks, uncertainties and changes (including changes in economic, operational, political or other circumstances, etc.) there can be no assurance that the Fund will achieve comparable results, that hypothetical returns will be met or that the Fund will be able to implement its investment strategy and investment approach or achieve its investment objectives. Actual gross and net returns for the Fund may vary significantly from hypothetical returns. Consequently, any hypothetical returns included herein have been prepared for illustrative purposes only to demonstrate TA's investing experience. No assurance, representation or warranty is made by any person that any target returns will be achieved, and undue reliance should not be put on them.

Hypothetical performance contained herein is necessarily speculative in nature, involves elements of subjective judgment and analysis, and is based upon certain assumptions and the best judgment of TA. It can be expected that some or all of such assumptions will not prove to be an accurate indicator of actual future performance results of the Fund. Actual performance results will differ and may vary substantially from hypothetical performance figures provided herein.

"Extracted performance" refers to the performance results of a subset of investments extracted from a single Fund. Under the SEC's marketing rule, when presenting extracted performance, investment advisers are required to disclose both the gross and net performance of the underlying fund. This ensures transparency and provides a more accurate representation of the investment's performance after accounting for fees and expenses.

Potential investors should not rely on such hypothetical performance in making an investment decision.

22. Case Studies. TA may provide examples and case studies for illustrative purposes, which have been selected in order to provide examples of the types of investments made by TA, and do not purport to be a complete list thereof, the outcomes of which are not necessarily typical of other or all Fund investments and should be considered in conjunction with the entire presentation, oral commentary and/or appendices. Past performance is no guarantee of future results. Prospective investors should also bear in mind that past or targeted investment characteristics are not necessarily indicative of future investment characteristics and there can be no assurance that the Fund will have comparable investment characteristics or that target investment characteristics will be achieved. There can be no assurance that a Fund's investment objectives will be achieved and investment results may vary substantially over time. Investment in a Fund is not intended to be a complete investment program for any investor.

23. Complete List of Returns. Please see Appendix for a list investments. This Fund series and time frame was selected as it best reflects TA's current investment strategy of investing in profitable growth equity investments. It should not be assumed that Funds raised in the future will have similar investments or returns and actual results may vary substantially. Please contact Andrew Harris, Managing Director and Global Head of Investor Relations, at aharris@ta.com for a list of investments and returns in Funds prior to TA VII.

24. Use of Third-Party Sources / No Independent Verification. Certain information contained in this presentation has been obtained from third-party sources such as portfolio companies or industry sources. While such information is believed to be reliable for the purposes used herein, TA Associates has not independently verified such information and TA Associates makes no representation or warranty, express or implied, as to the accuracy or completeness of the information contained herein. Certain economic and market conditions contained herein have been obtained from published sources and/or prepared by third- parties and in certain cases has not been updated through the date hereof. All information contained herein is subject to revision and the information set forth herein does not purport to be complete.

End Notes (cont.)

Definitions and Disclosures

- 25. Public Market Equivalent Benchmarks.** TA utilizes the Capital Dynamics PME + methodology when calculating public market equivalent benchmarks. We believe this method allows a consistent and meaningful comparison between a private equity portfolio and the public market. Capital Dynamics PME+ scales the distributions by a factor lambda such that the final private and public NAV are equivalent. This ensures that the final equivalent NAV is positive that the public equivalent is not short. There can be no assurance of any future trends or performance. Capital Dynamics PME+ is provided solely as an indicator of the market and economic conditions for illustrative purposes only and cannot be directly compared to TA's performance or strategy.
- 26. Public Security Indices.** The following public security indices reflect the performance of publicly-traded stocks for which there is daily liquidity and, therefore, differ from private equity indices and equity investments made by Funds managed by TA Associates, each of which track the performance of securities that are primarily not publicly traded and for which the market is significantly less liquid. Each of the indices are provided solely as an illustration of the market and economic conditions generally prevailing in the relevant periods and cannot be directly compared to TA's performance or strategy. Each is provided for the same period as the internal rate of return to which it is compared. Indices are not professionally managed and do not reflect deductions for fees and expenses and one cannot invest directly in an index. None of the indices noted are necessarily indicative of a TA Associates Fund investment strategy and assets and securities contained in the following indices are different than the assets and securities contained in TA Associates' Funds, and will therefore have different risk and reward profiles, liquidity and fees and expenses. There can be no assurance of any future trends or performance.
- a) The Standard & Poor's 500 Index (the "S&P 500").** The S&P 500 is a list of 500 publicly traded stocks chosen for their market size, liquidity and industry category, among other factors, which is a commonly used benchmark for the overall U.S. public stock market.
 - b) The Nasdaq Composite Index (the "NASDAQ").** The NASDAQ tracks 4,000 stocks (many of which are in the technology sector) that are publicly traded on the Nasdaq stock exchange.
 - c) The Dow Jones Industrial Average (the "DJIA").** The DJIA is a price-weighted measure of 30 U.S. blue-chip companies selected based on reputation, growth and interest to investors from all industries with the exception of transportation and utilities.
 - d) The MSCI All Country World Index (MSCI ACWI).** The MSCI ACWI is a stock index designed to track broad global equity-market performance

End Notes (cont.)

Definitions and Disclosures

27. Private Market Benchmarks. The following benchmarks are provided for illustrative purposes and are provided for comparative purposes but are not necessarily indicative of a fund investment strategy. Each time the benchmark data is used, the time period of the benchmark data matches the time period of the corresponding performance period. The benchmark data does not contain all relevant information on all applicable asset classes and investments. There can be no assurance of any future trends or performance. The following benchmarks are provided solely as an indicator of the market and economic conditions for illustrative purposes only and cannot be directly compared to TA's performance or strategy.

- a) **MSCI Private Capital Manager Universe ("MSCI").** The MSCI dataset is sourced entirely from LPs and includes the complete transactional and valuation history between LPs and their fund investments. This electronically sourced accounting quality data is representative of actual investor experience because it is aggregated from hundreds of investment programs, represented by a broad range of LPs. The MSCI Private Capital Manager Universe coverage includes over 13,000 private capital funds representing over 12.0 trillion in committed capital across the full spectrum of private capital strategies. The asset classes included in the comparisons provided for the TA Equity Funds only include the Expansion Capital and Buyout asset classes, which TA believes are the most comparable to the current Funds. TA pays a subscription fee to access this information.
- b) **Cambridge Associates ("CA").** CA compiles the performance results for private partnerships and their portfolio company investments which are published in its proprietary private investments benchmarks. The benchmark data is provided to TA Associates as is and at no cost. The performance data provided in each chart is as of the period indicated and represents the performance of U.S. private equity funds (Buyouts, Mezzanine, Growth Equity, and Private Equity Energy) but may not have all available performance information for all U.S. private equity funds and, therefore, may not necessarily contain information on all similar private equity funds. Information provided to CA is updated on a continuous basis and, therefore, is only accurate as of the date noted.
- c) **The Markit iBoxx USD Liquid High Yield Index (the "iBoxx").** The iBoxx is a rules-based index consisting of liquid USD high yield bonds, selected to provide a balanced representation of the board USD high yield corporate bond universe and including fixed coupon bonds, step-up bonds with coupon schedules known at issuance and similar bonds and excluding preferred shares, convertible bonds, bonds with other equity features and similar bonds.
