Notice on Labelling Requirement-Amendment 02

**To All Marketing Authorization Holders of Medicines**

**Regulatory Strengthening of Controls on Falsified Products**

The Notice on Labelling Requirement-Amendment 01 (published on 5<sup>th</sup> March 2026) has previously instructed that, the all commercial packs shall bear a printed or non-peelable sticker displaying the wording “NMRA Registered Product” together with the Maximum Retail Price (MRP). These details may appear either on separate stickers or on a single label, provided that the two statements are clearly distinguishable, preferably separated by a line.

Also the sticker shall be implemented immediately for all consignments released to the market with effect from 1<sup>st</sup> of April 2026. The batches already released to the Market are not affected by this decision.

Please note that, in accordance with the decision taken at the 17th Management Review Meeting of the NMRA, no label amendments are required for products that already display the NMRA approved MRP on their labels.

Only products that do not currently bear the approved MRP on their labels are required to comply with the published instructions.

Furthermore, at the 18th Management Review Meeting, it was decided that applicants may use either peelable or non-peelable labels on their products. However, applicants remain responsible for ensuring that the correct MRP is clearly visible and communicated to patients.

We expect your fullest cooperation to implement these control measures and help prevention of falsified products getting into the market.

Thank you

Chief Executive Officer  
National Medicines Regulatory Authority
