

Insurance-native AI built for agencies

Thinking about building your own AI solution or using an LLM?

In-house tools are expensive to build and maintain, and generic LLMs like ChatGPT lack the insurance expertise to truly help.

Quandri's Renewal Intelligence pairs broker expertise with insurance-native AI speed and intelligence to increase capacity, strengthen client relationships, and enable teams to operate more efficiently at scale

FIND THE SOLUTION THAT'S RIGHT FOR YOU

Insurance-native AI does more, and requires less oversight

In-house AI and basic LLM-powered automations can clear admin tasks, but often come with a hefty price tag or unpredictable results.

Quandri was purpose-built to solve insurance workflow pain points, bringing AI-driven insight to every renewal, so brokers can spend less time on tasks and more time advising clients.

See how Quandri stacks up on the next page

	In-house AI	Generic LLMs	Quandri 🌐	Why it matters
Easily scales across thousands of policies	✗	✗	✓	Growth stalls when staff can't keep up with renewal reviews. Scalable automation eliminates backlogs and protects revenue.
Fast implementation & easy adoption	✗	✓	✓	Quick deployment means teams realize value immediately.
Ongoing updates & carrier-specific logic	✗	✗	✓	Automated updates ensure accuracy, compliance, and confidence in every renewal.
Requires heavy IT/engineering resources	✓	✗	✗	Building and maintaining in-house AI drains technical teams.
High maintenance & hidden costs	✓	✗	✗	Custom AI may be cheaper upfront, but requires constant fixes and support. Predictable pricing removes financial surprises.
Long lead times to deploy	✓	✗	✗	Slow deployments delay efficiency gains and impact retention. Measure value in weeks, not quarters with Quandri.
Requires adding headcount	✓	✗	✗	AI-powered automation enables teams to grow without needing to hire more.
Easily expand to other solutions and workflows	✗	✗	✓	A single platform for renewals, quoting, and communication unlocks more efficiency without reinvesting in new tech.
Integrates directly with your AMS	✗	✗	✓	Disconnected tools add errors and slow adoption. Quandri's integration ensures clean data and streamlined workflows.
Purpose-built for insurance	✗	✗	✓	Renewals require insurance-specific context, not generic outputs. Brokerages can't risk AI guessing at compliance-critical details.
Data security & compliance	✗	✗	✓	Handling personal data demands strict safeguards. Generic LLMs raise concerns unless carefully controlled, while Quandri is built with compliance in mind.
Consistent, auditable outputs	✗	✗	✓	Leaders need repeatable, traceable decisions. Generic LLMs give variable answers, while Quandri provides structured, auditable logic.
Content generation	✗	✗	✓	LLMs can draft general emails or summaries, but not tied to actual policy data. Quandri generates policy-specific communications informed by renewal insights.
