

## Press Release

### Procivis Joins WE BUILD Consortium to Drive the EU Digital Identity Wallet Initiative

**Zurich, 2 September 2025** – Procivis, a technology market leader for digital identities and wallet technology, and a subsidiary of Orell Füssli, today announced its participation as a beneficiary partner in the EU digital identity wallet consortium WE BUILD. With its production-ready and eIDAS 2.0 compliant technology for digital identity and wallets, Procivis brings in-depth expertise and technology to drive this EU digital identity initiative.

WE BUILD (Wallet Ecosystem Building in Large-scale Deployments) is a new, second-round large-scale pilot (LSP) from the EU. It focuses on the wallet ecosystem for business and payments use cases in the EU. It brings together nearly 200 organizations across Europe from the public and private sectors to test and deploy real-life use cases for the European Digital Identity Wallet (EUDI Wallet) and business wallets, helping accelerate adoption and ensure interoperability. The initiative officially kicks off on September 3 in Amsterdam and will run for 24 months under the leadership of Dutch and Swedish government authorities (Ministry of Economic Affairs-Netherlands, the Dutch Chamber of Commerce-KVK, and Bolagsverket-Sweden).

#### Procivis contributes to three use cases and provides eIDAS 2.0 ready technology

Thirteen use cases will focus on payments and businesses, exploring cross-border payment, instant payments and account-to-account transfers. As a beneficiary partner, Procivis participates in three of the thirteen use cases covering wallets for business as well as payment use cases, contributing its technology to enable the use cases as well as its expertise in this area.

Procivis is also one of the technical providers within WE BUILD. This means its technology, Procivis One, can be chosen for implementation across all use cases.

"WE BUILD is a milestone for the digital economy in Europe. We are looking forward to contributing with our production-ready, eIDAS 2.0 compliant technology Procivis One to enable an interoperable ecosystem for governments and businesses," says Désirée Heutschi, Co-CEO of Procivis.

#### About WE BUILD

WE BUILD is the consortium wallet ecosystem for business and payment use cases on identification, legal representation and data sharing and one of the new Large Scale Pilots (LSPs) under the EU Digital Identity Wallet program.
