PRISM: AI & Automation Reshaping Acquistions

■ Benefits

Federal acquisition management system for DoD, civilian, and intelligence agencies.

Unison's AI-enabled PRISM solution offers a holistic approach to acquisition lifecycle management and is widely recognized as the most powerful and intuitive contract writing system. It enables acquisition professionals to efficiently and effectively complete federal acquisition tasks, in a compliant way, from planning through closeout.

Fully comply with FAR/DFARS, agency supplements, and agency policies

AI Connect tool combines advanced Retrieval-Augmented Generation (RAG) and a modular architecture to deliver high-quality, secure, and current outputs.

Accomplish your paperless office goals

Promote structured collaboration with program offices and vendors, eliminating process bottlenecks and compressing PALT

Gain real-time visibility and transparency across the enterprise, including comprehensive audit trails

Avoid duplicate data entry for sophisticated sourcing, contract writing, and contract administration with guidance based on the type of acquisition

■ AI-Powered

PRISM's AI Connect tool, designed exclusively for federal acquisition and budgeting, offers strategic advantages to agencies. Our AI Engine combines the advanced capabilities of Retrieval-Augmented Generation (RAG) components with a modular architecture. This RAG approach enables the AI Engine to use contextually relevant, accurate, and up-to-date information, producing high-quality acquisition and budget products.

PRISM AI Document Generation

- Generative AI Drafting: PRISM AI Document Generation uses Unison's AI Connect to draft key contract documents by leveraging multiple data sources and user input.
- Collaborative Refinement: Integration with PRISM allows users to collaboratively refine and ensure accuracy in documents.
- Efficient Routing and Filing: Facilitates proper routing and filing into the electronic contract file.

PRISM Ally

- Credible Answers: PRISM Ally uses generative AI to provide fast, reliable answers to contracting questions from authoritative sources like FAR, DFARS, Agency Supplementals, and Unison's VAO.
- Quick Summarization: The module allows users to quickly summarize information and gather insights for trusted, cited responses.
- Conversational Interface: Delivers responses within an easy-to-use conversational interface.

VAO Ally

- Rapid Answers: VAO Ally uses generative AI to quickly provide reliable answers to contracting queries from authoritative sources like FAR, DFARS, Agency Supplementals, and Unison's VAO.
- Insightful Summarization: The tool swiftly summarizes data and offers trusted, well-cited responses within a conversational interface.
- Enhanced Guidance: Synergizes with Pathfinder to provide comprehensive, context-rich guidance, available only on unclassified networks for VAO subscribers.

Get started with PRISM.
