Master your Contracts with a Contract Management System Designed by Experts.

One system that streamlines your business processes and drives strategic insights.

Unison Contract Lifecycle Management (CLM) is a cradle-to-grave solution **designed by government contract experts for government contract experts.** UnisonCLM streamlines the lifecycle of government contracts and subcontract management, from proposal creation and negotiation to renewal and closeout—simplifying and enhancing contracting processes while significantly reducing risk.

- Purpose-built with embedded best practices to automate tedious processes and go-live quickly
- Comprehensive, out-of-the-box options with configuration flexibility to meet business needs
- Audit ready for DCAA, DCMA, and other compliance requirements
- UnisonCLM automatically updates FAR, DFARS, and other agency supplemental libraries

One platform that redefines your role from admin to advisor— become a high-value resource.

UnisonCLM revolutionizes your work. By consolidating your contracts data into a single system, you shift from reactive to proactive, as automation takes over repetitive tasks like responding to data calls and audits. Reporting to your team, company executives, and the government becomes straightforward with our advanced analytics and reporting. Focus on business strategy and sharing your expertise rather than being overwhelmed with process oversight, approval tracking, and constantly searching for the right data.

Seamless integration, or no integration at all—UnisonCLM works either way.

UnisonCLM is platform agnostic and integration-friendly. No CRM? No problem. Our system is complete on its own, yet can seamlessly integrate with your existing CRM and ERP software, offering enhanced agility, customization, and compatibility with your finance, program, and business development systems. With our Data Extraction Module, contract data from scanned documents and digital files is extracted automatically— transforming integrations, migrations, and data entry from dreaded chores into automated tasks.

The impact of UnisonCLM.

UnisonCLM's 3,500 users have experienced significant advantages in contract management leveraging a centralized system—entrusting UnisonCLM with **over 100,000 of their contracts** and crucial supporting documents. They also have experienced:

50%
shorter contract lifecycles

30%
lower costs

55%
stronger compliance

25%
higher bookings

Unique Advantages

FedRAMP Compliant

UnisonCLM is independently FedRAMP Moderate Authorized. This means our systems are tested and independently validated against FedRAMP controls. UnisonCLM itself is fully authorized and our application, database, network, and security services are certified.

Unprecedented Search

Tired of combing through contracts line by line for that elusive clause? Frustrated with the time-consuming process of manual contract review? Take control with UnisonCLM's powerful search functionality. Forget the manual grind—navigating your contract library is now as simple as a quick keyword search.

Fit for Contracts

UnisonCLM is an out-of-the-box solution that intuitively addresses your government contracting needs. Without the necessity for customizations, it offers high configurability, concentrating on the contract lifecycle rather than a sales cycle. Streamlining unique government contract processes, it leads you into the next generation of contract lifecycle management.

Reclaim control of your contract management with UnisonCLM.

UnisonCLM is the ultimate tool for exerting control over your contract management processes. Precisely calibrated for managing government contracts and subcontracts, it combines flexibility with comprehensive, out-of-the-box features. Transform your workflows into a unified, efficient operation where you can be proactive instead of reactive—rediscover contract management with UnisonCLM.
