

Bidscale

AI Modules for Federal Acquisition.

PRODUCT SNAPSHOT

Reduce Acquisition Burden Without Adding Risk.

Bidscale helps federal acquisition professionals move faster across three high-burden workflows: Requirements Development, Acquisition Package, and Offer Evaluation. AI modules guide inputs, support contract data, generate stronger drafts, and organize evaluation records so teams can produce clear, consistent, and defensible outputs.

Ideal for: Contracting Officers Program Managers Evaluators

Speed Without Sacrifice
Faster timelines. Controlled work.

Weeks → Minutes
Requirements review

Weeks → Days
Source selection

Days → Hours
First drafts

Business Value

- Reduce Manual Effort.**
Cut blank-page drafting, research, and document consolidation with guided inputs and AI-assisted drafts.
- Improve Consistency.**
Use agency-aligned templates and acquisition data support to produce more complete packages and evaluation outputs.
- Strengthen Defensibility.**
Keep source detail, findings, ratings, and decision context organized for reviews, audits, or protests.

Three Modules. One Platform.

AI-SUPPORTED ACQUISITION WORKFLOWS

- 1 Requirements Development**
Guide program teams through requirements inputs, predict key contract data, and generate stronger first drafts.
- 2 Acquisition Package**
Support strategy decisions, assemble required materials, and create acquisition documents with configurable workflows.
- 3 Offer Evaluation**
Review proposals digitally, develop findings, and generate evaluation reports with a clear audit trail.

Why Choose Bidscale

- Authorized AI**
FedRAMP Certified DoD IL4 Authorized.
- Modular by design**
Supports targeted phases of the acquisition lifecycle without forcing a one-size-fits-all rollout.
- Human-led AI**
Helps draft, organize, and evaluate work while keeping professional judgment in control.
- Enterprise-ready fit**
Works alongside existing tools and systems of record to support adoption without disruption.
