Ocado products are protected by patents and other intellectual property rights.

This webpage is provided to comply with the U.K. patent marking statute (Patents Act 1977, section 62(1)). Ocado's products may be protected by both GB national patents and European patents validated in GB. The reader is advised to also consult the list provided on this webpage of Ocado's European patents, and to check the European Patent Register to confirm in which EPC contracting states the patents are currently in force. The following list of products and patents may not be comprehensive. For example, some products listed here may be protected by patents that are not listed, and other products not listed here may be protected by one or more patents. The absence of a product or a patent number from this list does not constitute a waiver of Ocado's patent or other intellectual property rights concerning that product or patent.
