LO – Addition and subtraction word problems

Following on from the video lesson, please copy out the following questions into your maths book neatly and remember to use a ruler and write one number per square.

- Remember to read the question carefully. Ask yourself do I need to add or subtract.
- Remember to show your working and present it neatly in your maths book.

Set A

There are 95 words on a spelling test. The table shows how many words each child spelt right.

Delia	35
Henry	43
Samson	58
Zane	19

1. How many words did Henry spell wrong?

2. How many more words did Samson spell right than Zane?

3. How many words did Henry and Delia spell right in total?

Teresa buys 26 blue stickers, 32 pink stickers and 31 orange stickers.

4. How many stickers does she have in total?

5. She gives out 86 of the stickers to her class. How many does she have left?

6. Kayla has 124 red pens and 235 blue pens. How many pens does she have in total?

Brad is thinking of a number.
He takes 56 away from it and gets 234.

7. Sophie says the Brad was thinking of 178 because 234 – 56 = 178. Can you explain where Sophie went wrong?

8. What was Brad's original number?

The table shows how long it took four children to solve a riddle.

Name	Time
Ed	311 seconds
Adva	422 seconds
Jed	718 seconds
Scarlett	521 seconds

9. What was the total time of Adva and Ed?

10. How much quicker was Ed than Scarlett?

11. How much slower was Jed than Adva?

12. There are 786 carrots in a field. A farmer picks 345 of them. How many carrots are left?
