03 Elements of the feature explained

What is KYRO AI Storm Response?

KYRO AI's Storm Response is an integrated solution designed for storm restoration contractors to quickly mobilize crews, restore power faster, and streamline storm recovery operations with AI-powered automation, compliance, and real-time tracking.

Key Elements of the Feature

Storm Path Visualization and Impact Assessment

Project Creation and Geographic Targeting

Resource Selection and Advanced Filtering

Multi-Stage Communication Workflow

Digital Form Collection and Automated Workflows

AI-Powered Credential Validation

Roster finalization and export

Mobile Worker Experience

Complete Integration within the platform

KYRO's Clientele

KYRO's digital forms and workflows have transformed how we manage vegetation and asset inspections in the field.

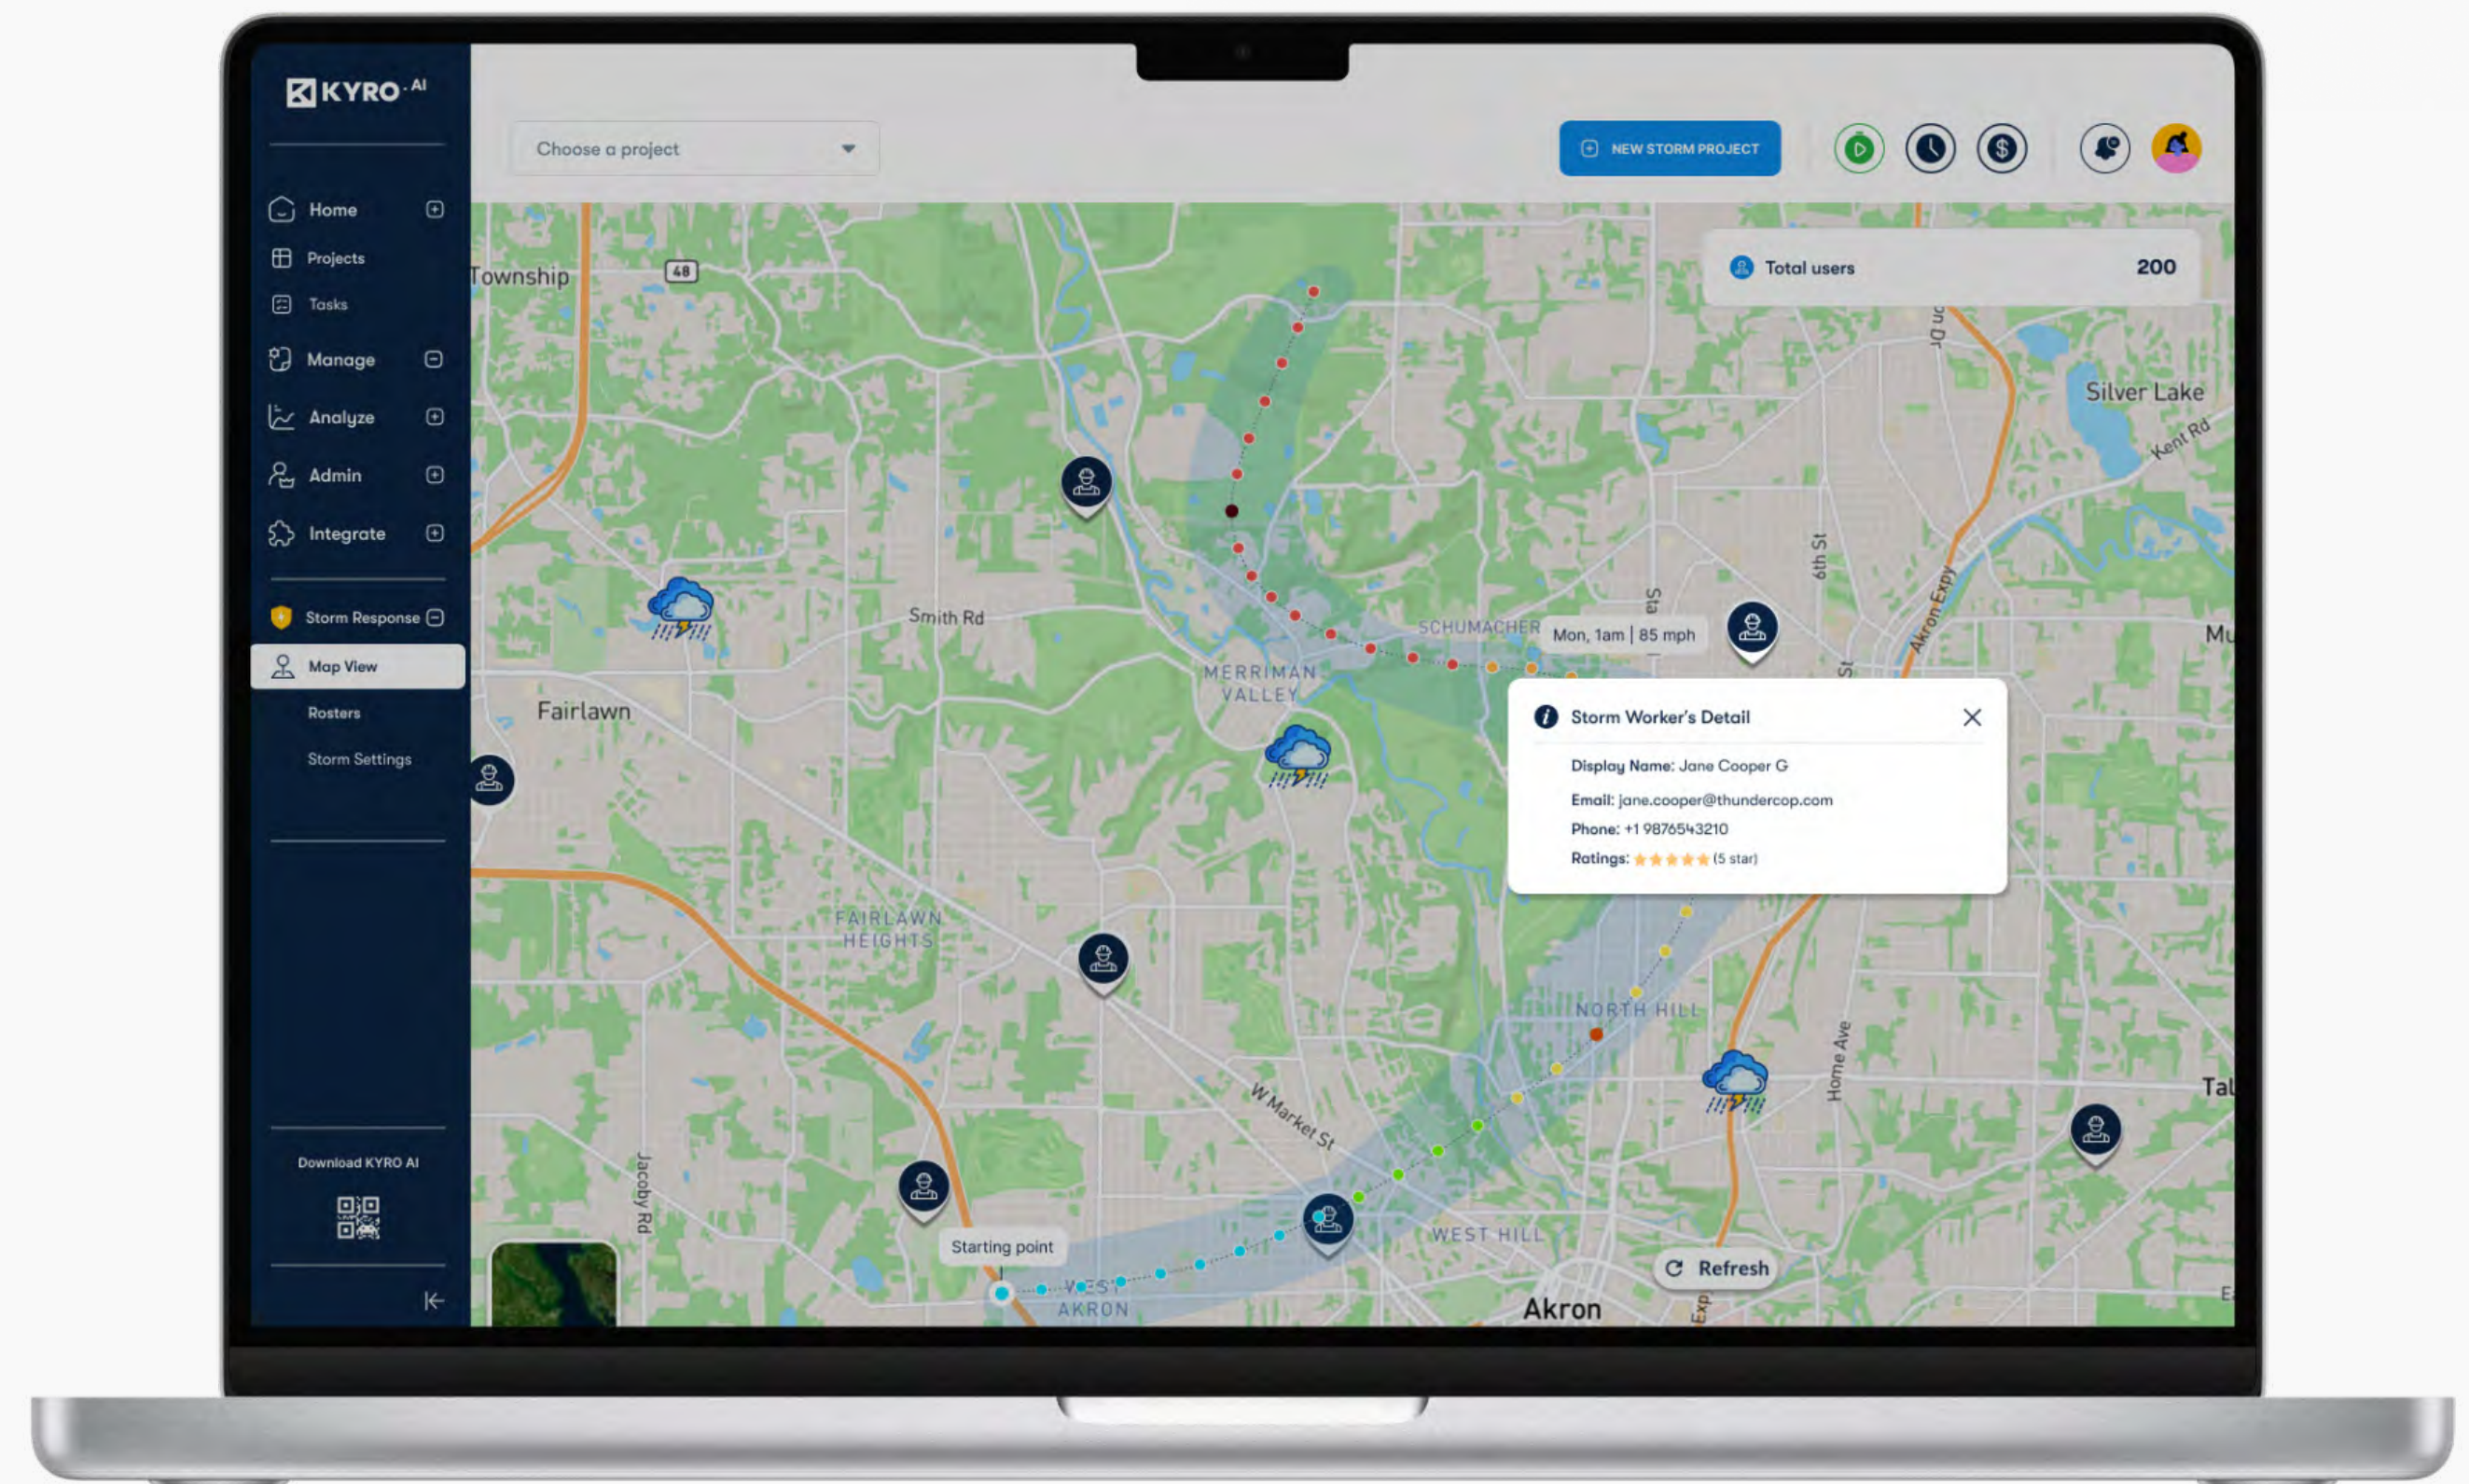

Greg Smith
Senior Manager of Vegetation Management
LS Power Grid

features

Storm Path Visualization & Impact Assessment

Track and assess storm impact zones in real time to plan effective resource deployment.

-  **Display live storm path, severity, and historical data overlays.**
-  **Predict critical impact zones with GIS-powered mapping.**
-  **Visualize required resources based on storm forecasts.**
-  **Inform project creation with actionable impact analytics.**

features

Project Creation & Geographic Targeting

Quickly set up projects and define target areas using intuitive map tools.

Plot project location manually or by searching/address entry.

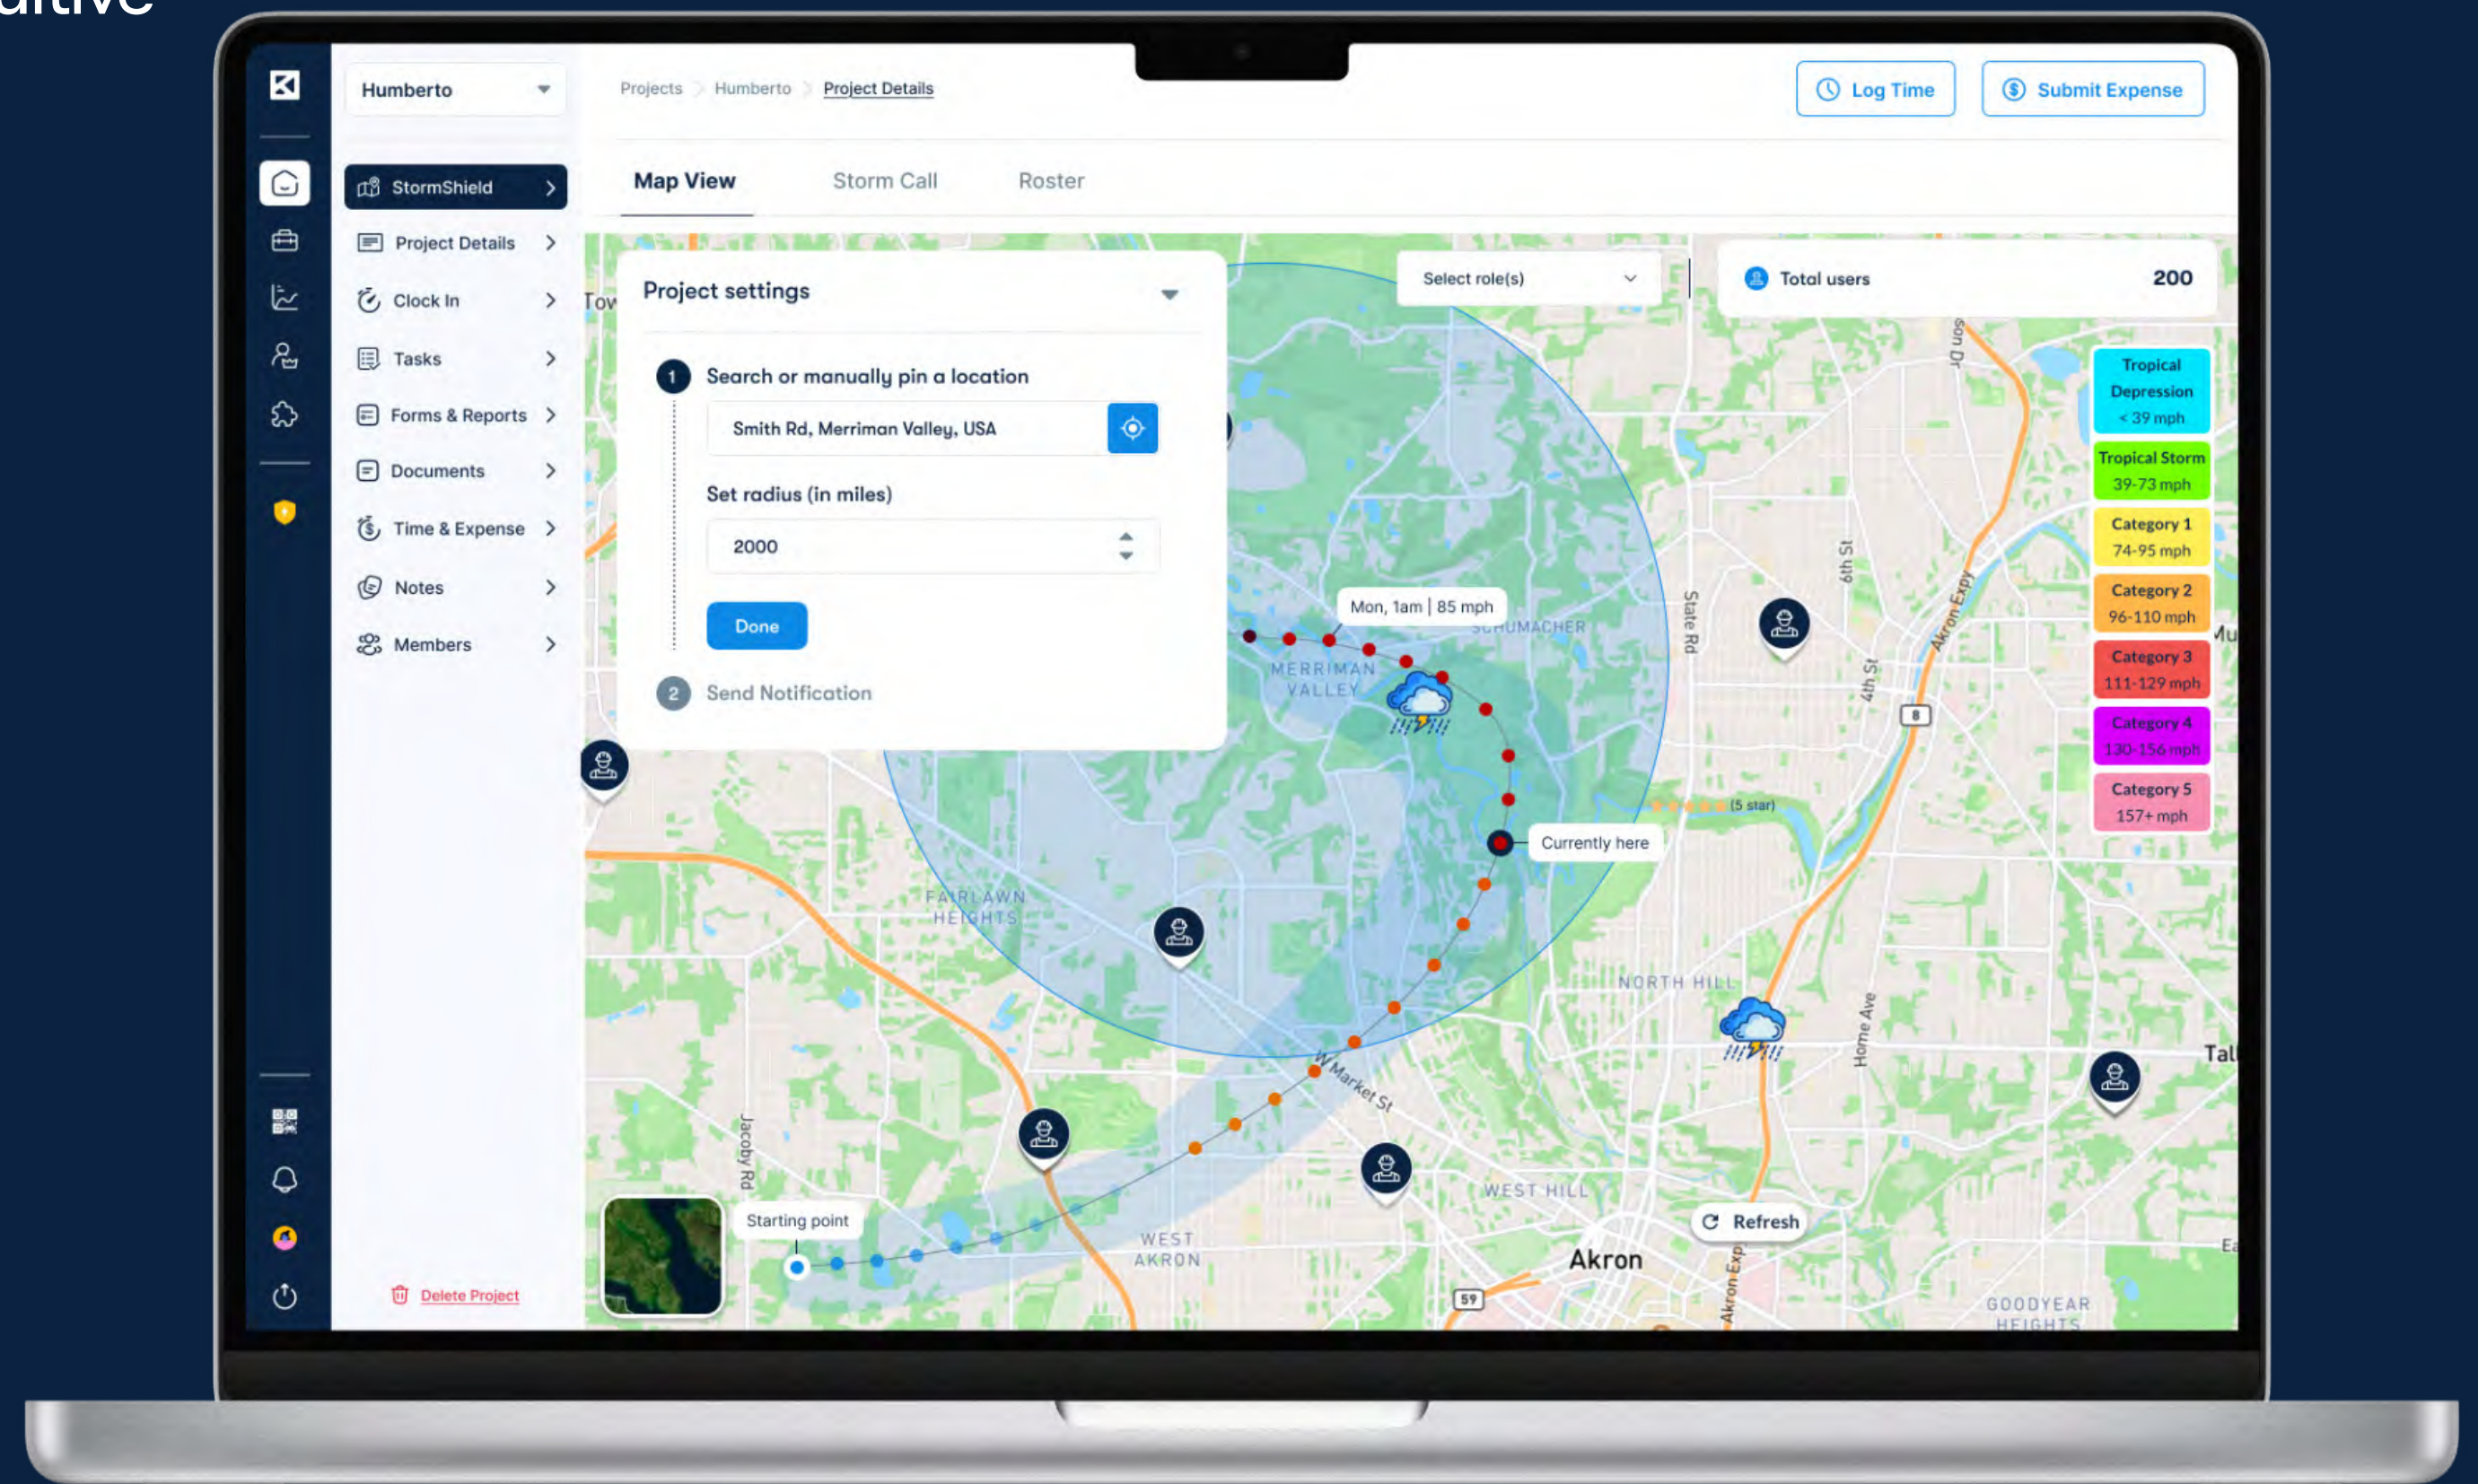

Customize response radius for targeted workforce selection.

Instantly view available worker numbers per region.

Enable focused operations to minimize deployment overhead.

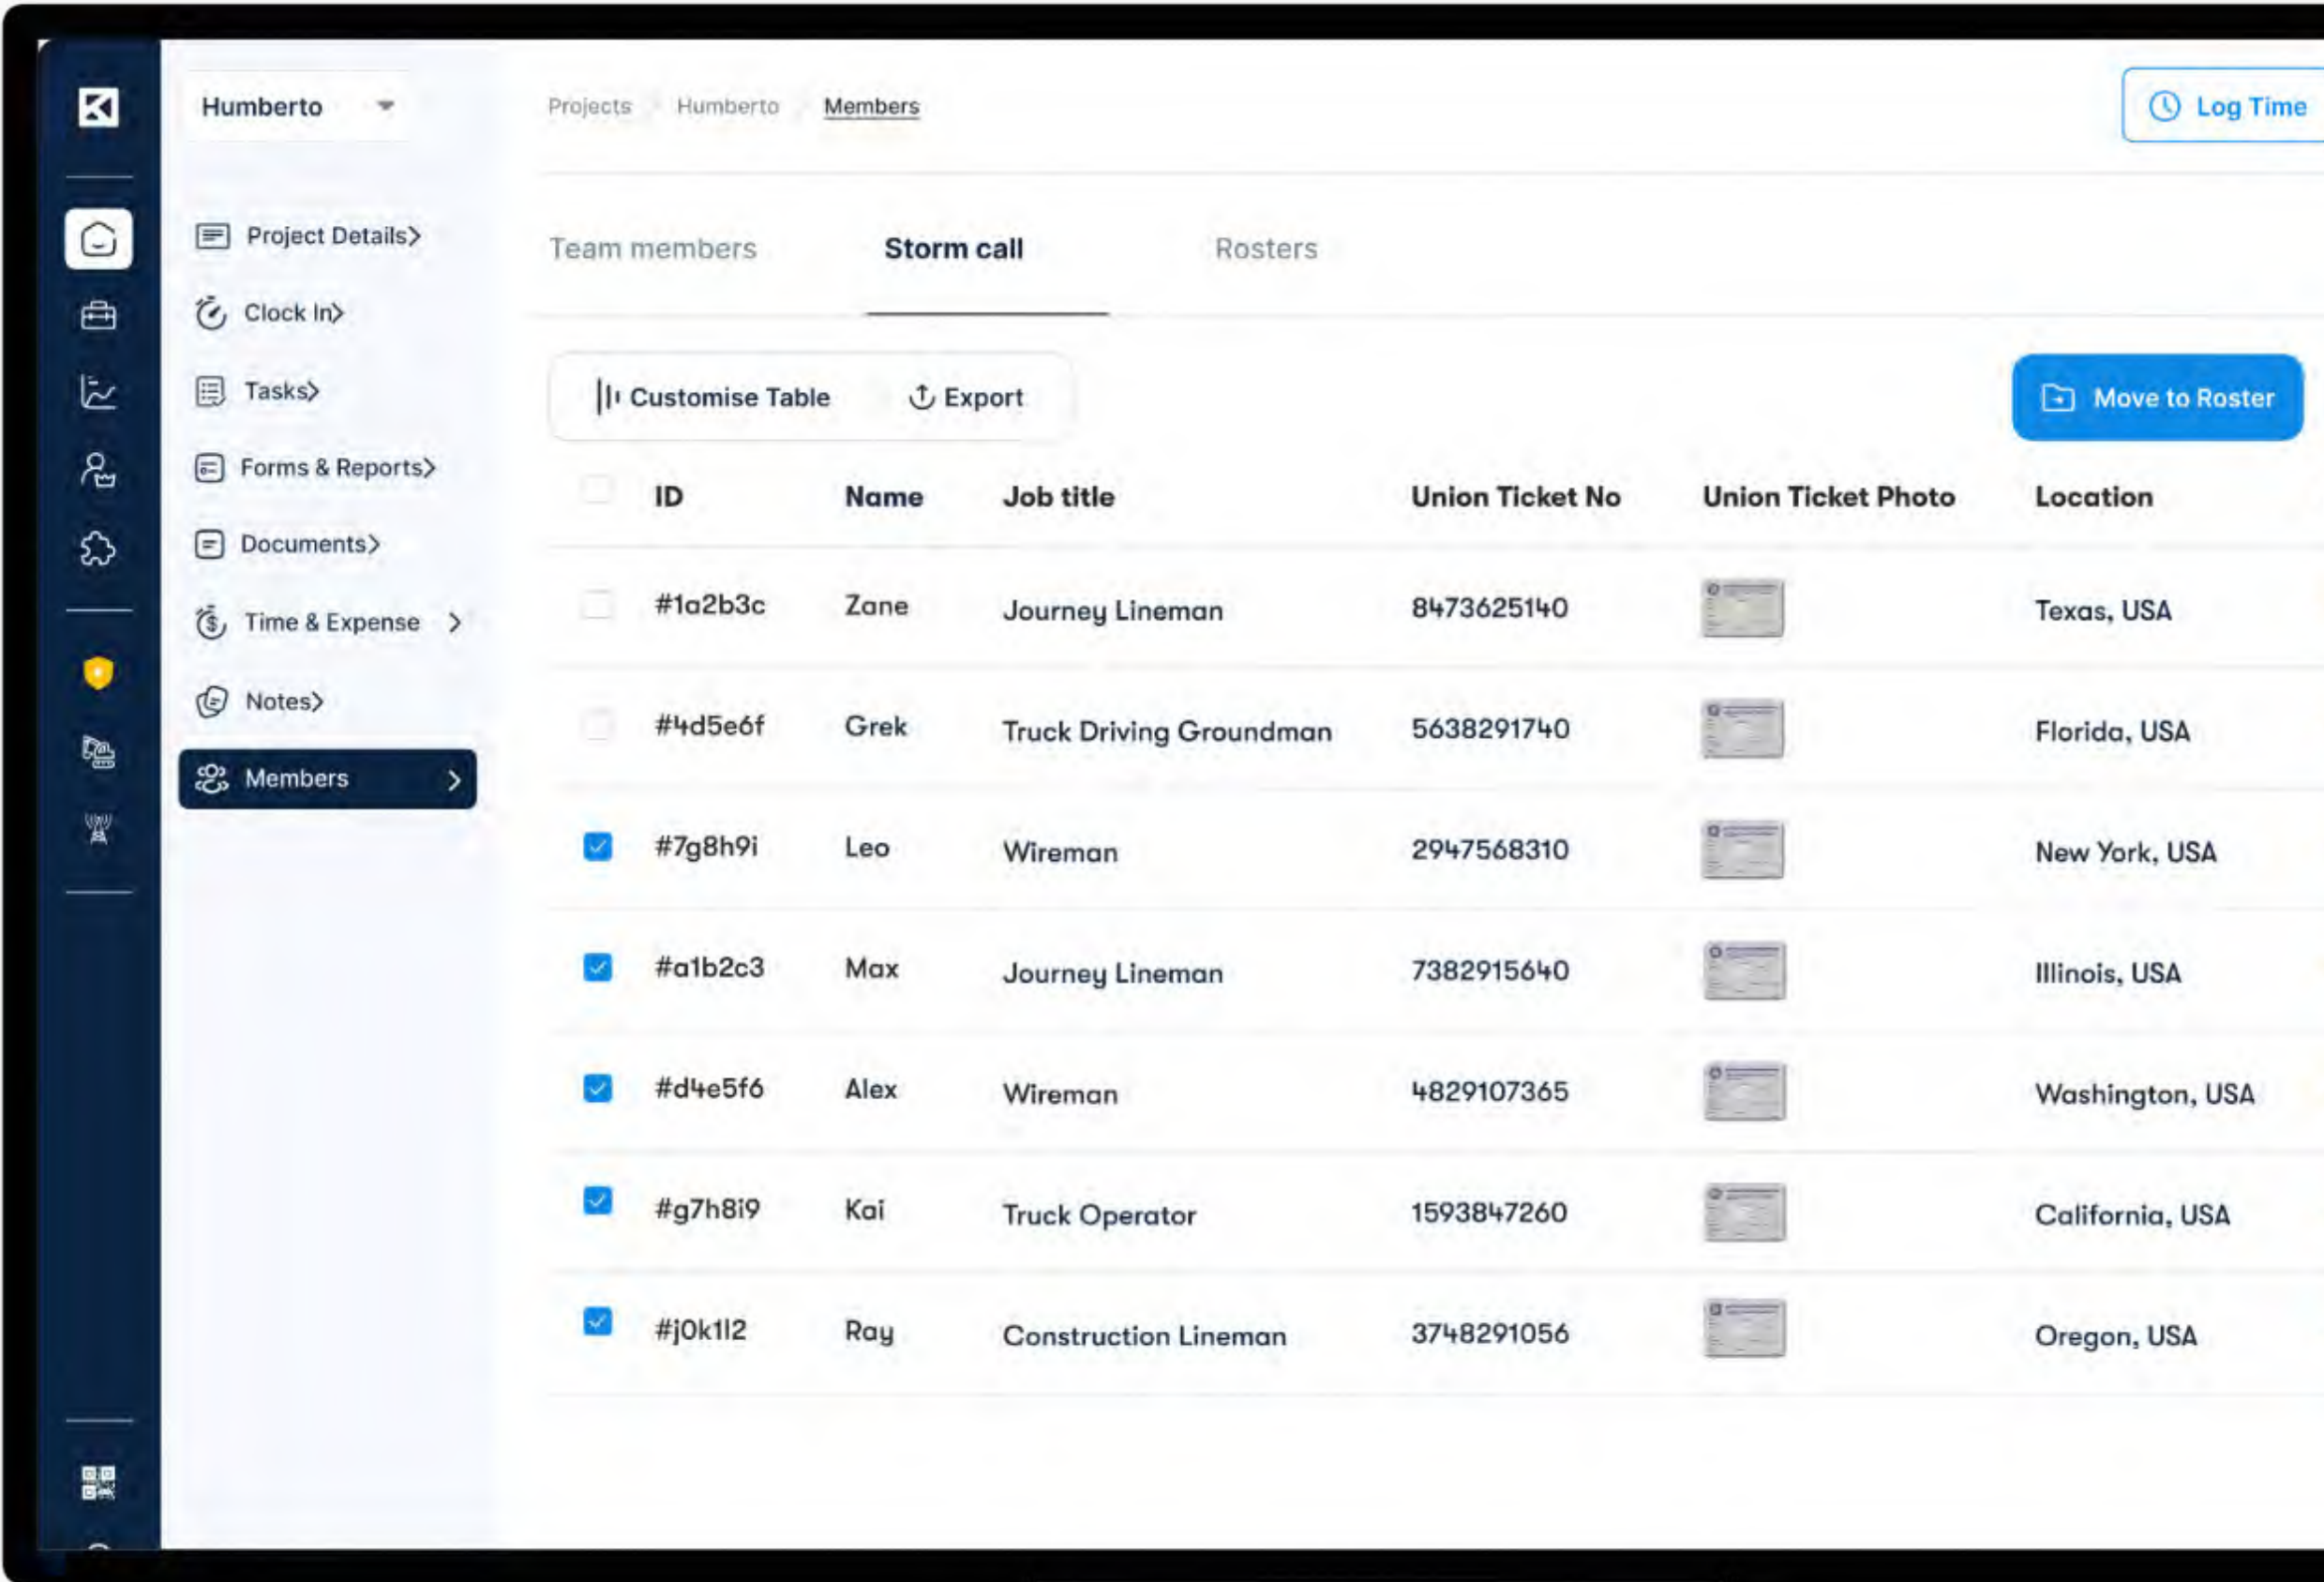

features

Resource Selection & Advanced Filtering

Efficiently identify and select the best-qualified workers for every storm event.

-  **Filter by role, union status, client, and availability.**
-  **Use search and bulk-select functions for fast crew assignment.**
-  **Build teams with diverse roles matched to specific storm needs.**

features

Multi-Stage Communication Workflow

Reach and coordinate with teams instantly using automated messaging and stepwise notifications.

Send initial awareness alerts ("storm brewing" reminders).

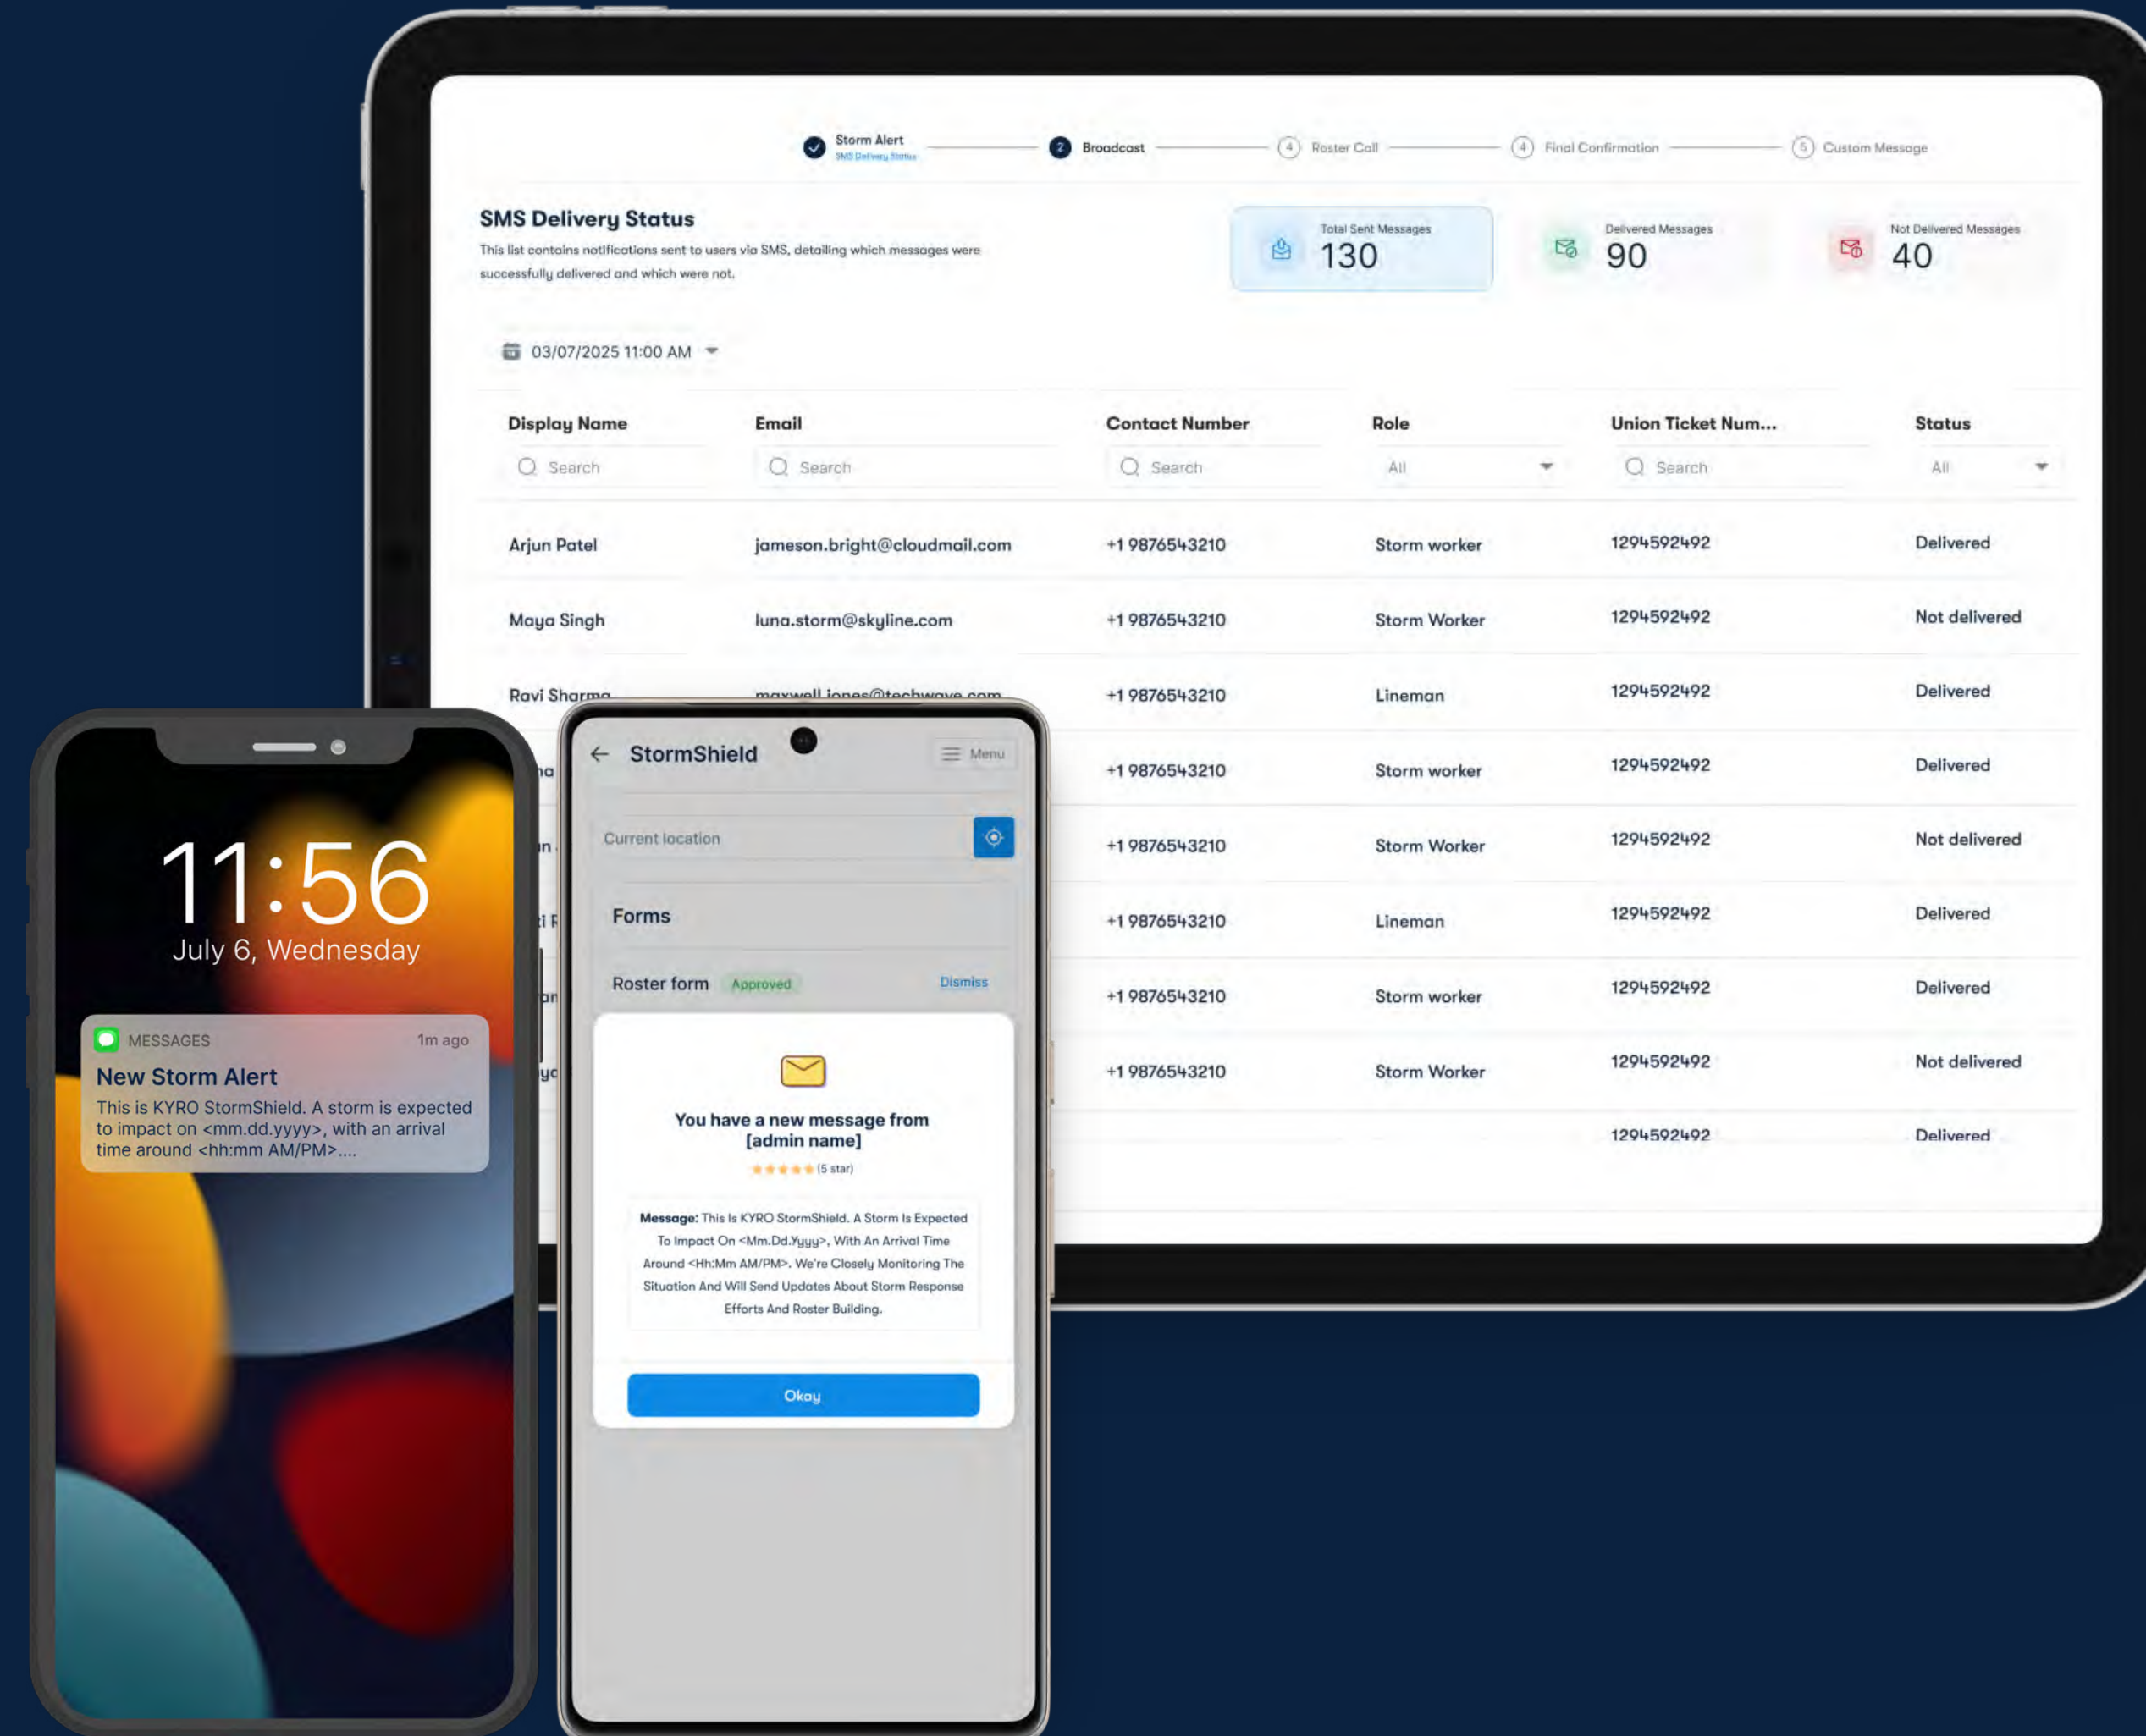

Follow up with job offers, pay rates, and project details.

Push SMS and app notifications for maximum response.

Enable multi-stage workflows to avoid missed communications.

features

Digital Form Collection & Automated Workflows

Capture crew responses and automate onboarding directly from mobile or web forms.

Distribute storm call forms via SMS/web links for quick and easy data capture.

Allow non-roster workers to join through forwarded invitations.

Automate requests for missing compliance details or onboarding packets.

Streamline form submission and crew enlistment from any device.

A smartphone screen displaying a 'Roster form'. The form includes the following fields: 'Mobile Number *' with a country code dropdown (+1) and an input field; 'Email Address *' with an input field; 'Gender (required for lodging only) *' with a 'Select Gender' dropdown; 'Glove Size *' with a 'Select' dropdown; 'Sleeve Size *' with a 'Select' dropdown; 'Do you have a valid CDL? *' with a 'Select' dropdown; and 'Union Ticket Number *' with an input field. At the bottom, there are two checkboxes: 'I confirm that I understand and agree to the KYRO AI's Privacy Statement and Terms of Use' (checked) and 'Yes, I consent to receive SMS text messages about [e.g., order updates, promotions, appointment reminders]' (checked). A large blue 'Submit' button is at the very bottom. An 'Upload Union Photo' dialog box is open over the form, showing a camera icon and a green plus sign.

features

AI-Powered Credential Validation

Ensure only qualified crews deploy—instantly verify licenses, documentation and compliance using AI automation.

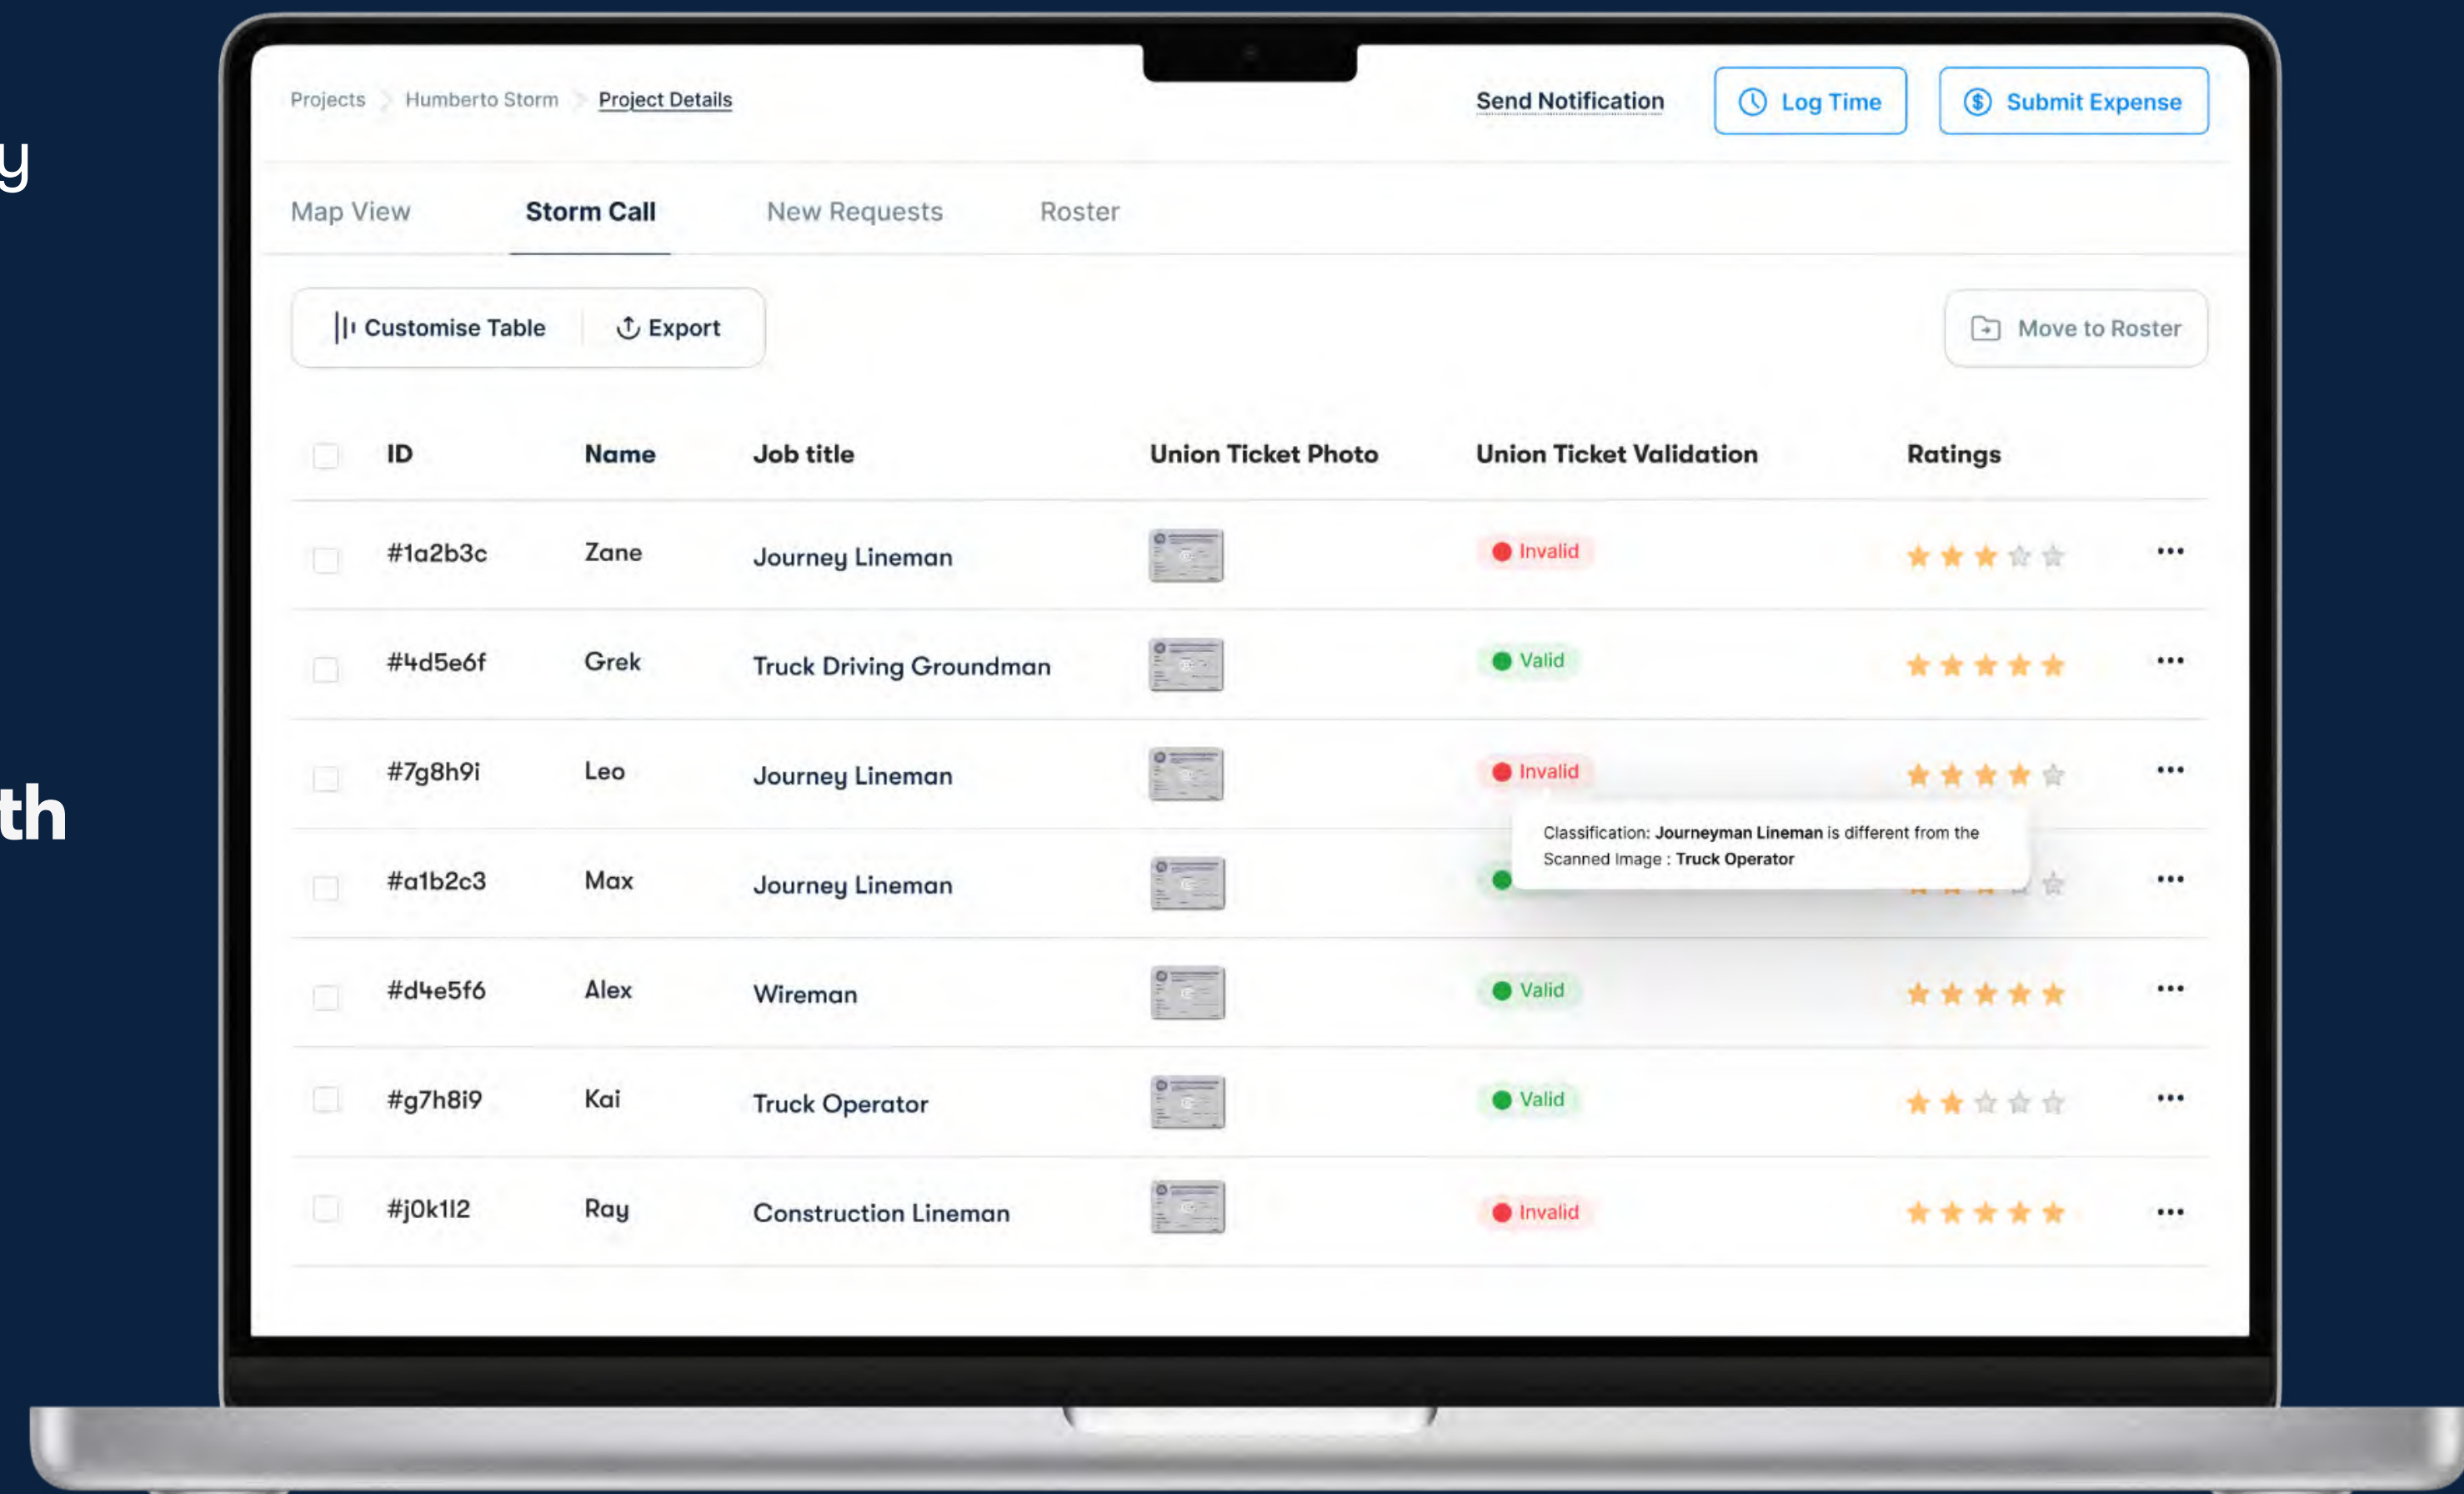

OCR checks on union tickets, med cards, and SSNs.

Automatic fraud/expiry detection with instant feedback.

Eliminate manual photo review and credential errors.

features

Roster finalization & Export

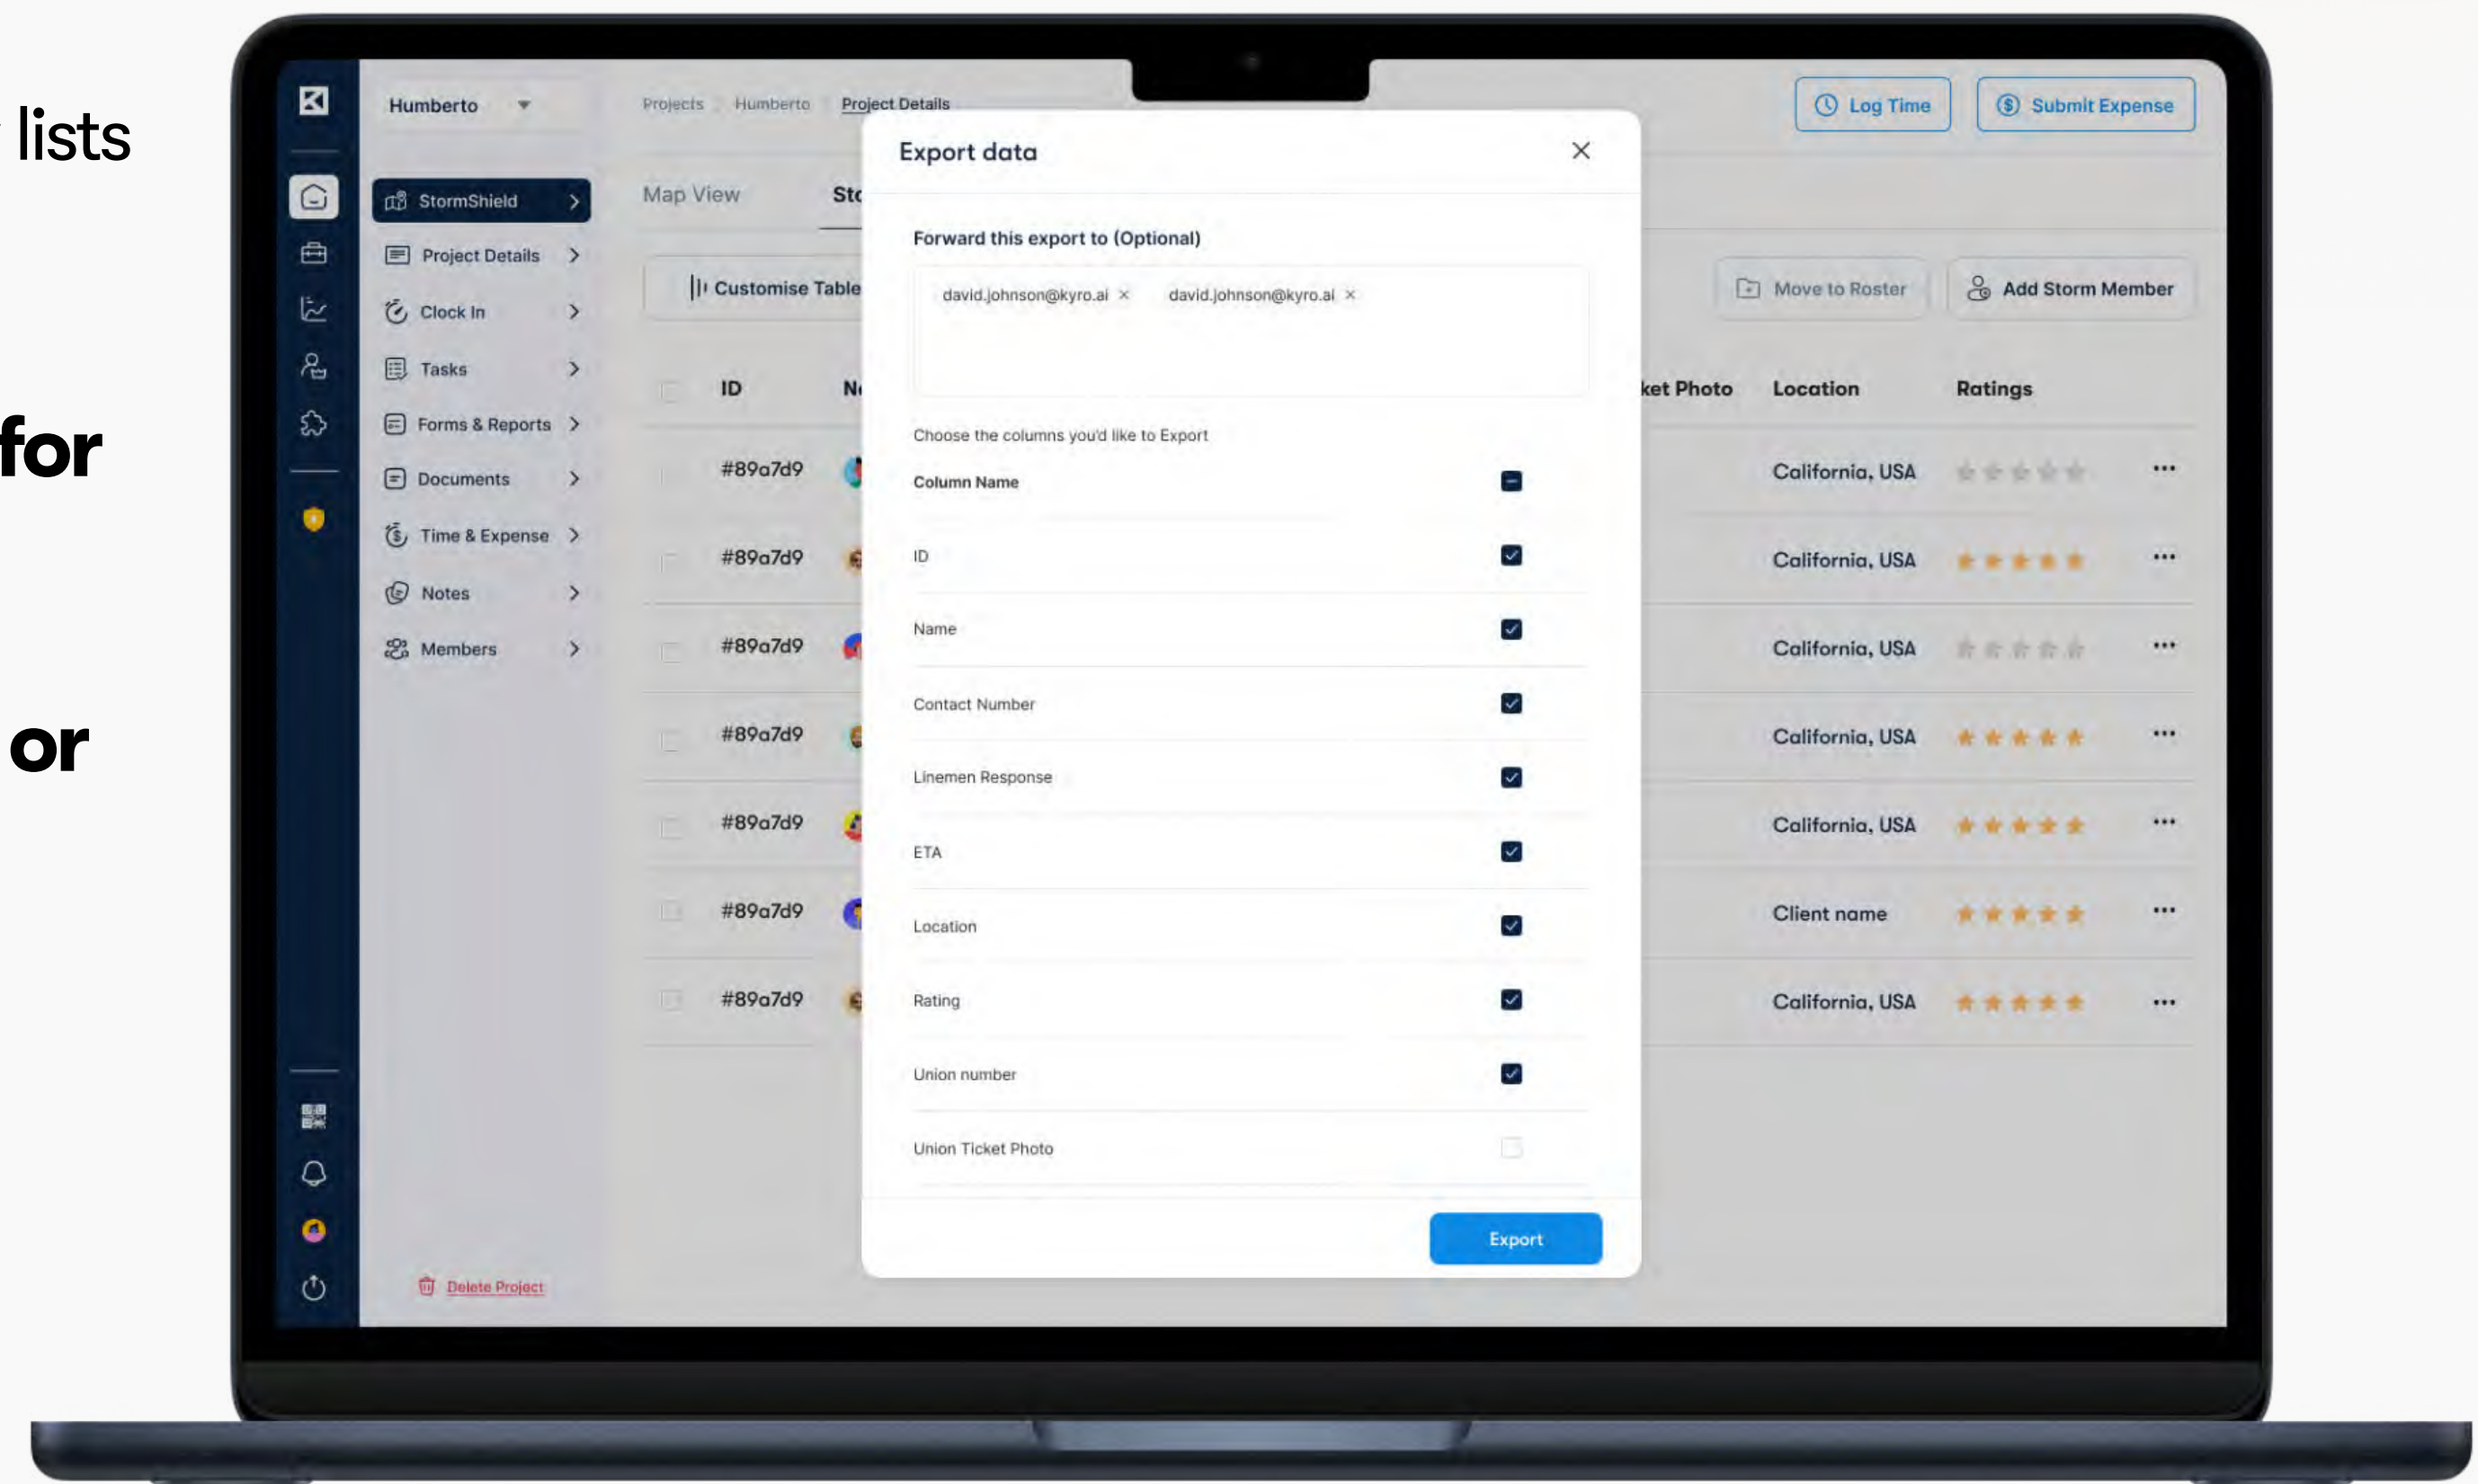

Consolidate, confirm, and export ready-to-deploy crew lists for utility partners or clients.

Move vetted workers into the final roster for active deployment.

Export crew details to share with a client or a utility.

features

Mobile Worker Experience

Empower crews to work efficiently from anywhere with secure, app-based workflows.

Workers receive jobs, fill forms, and log hours on their phones.

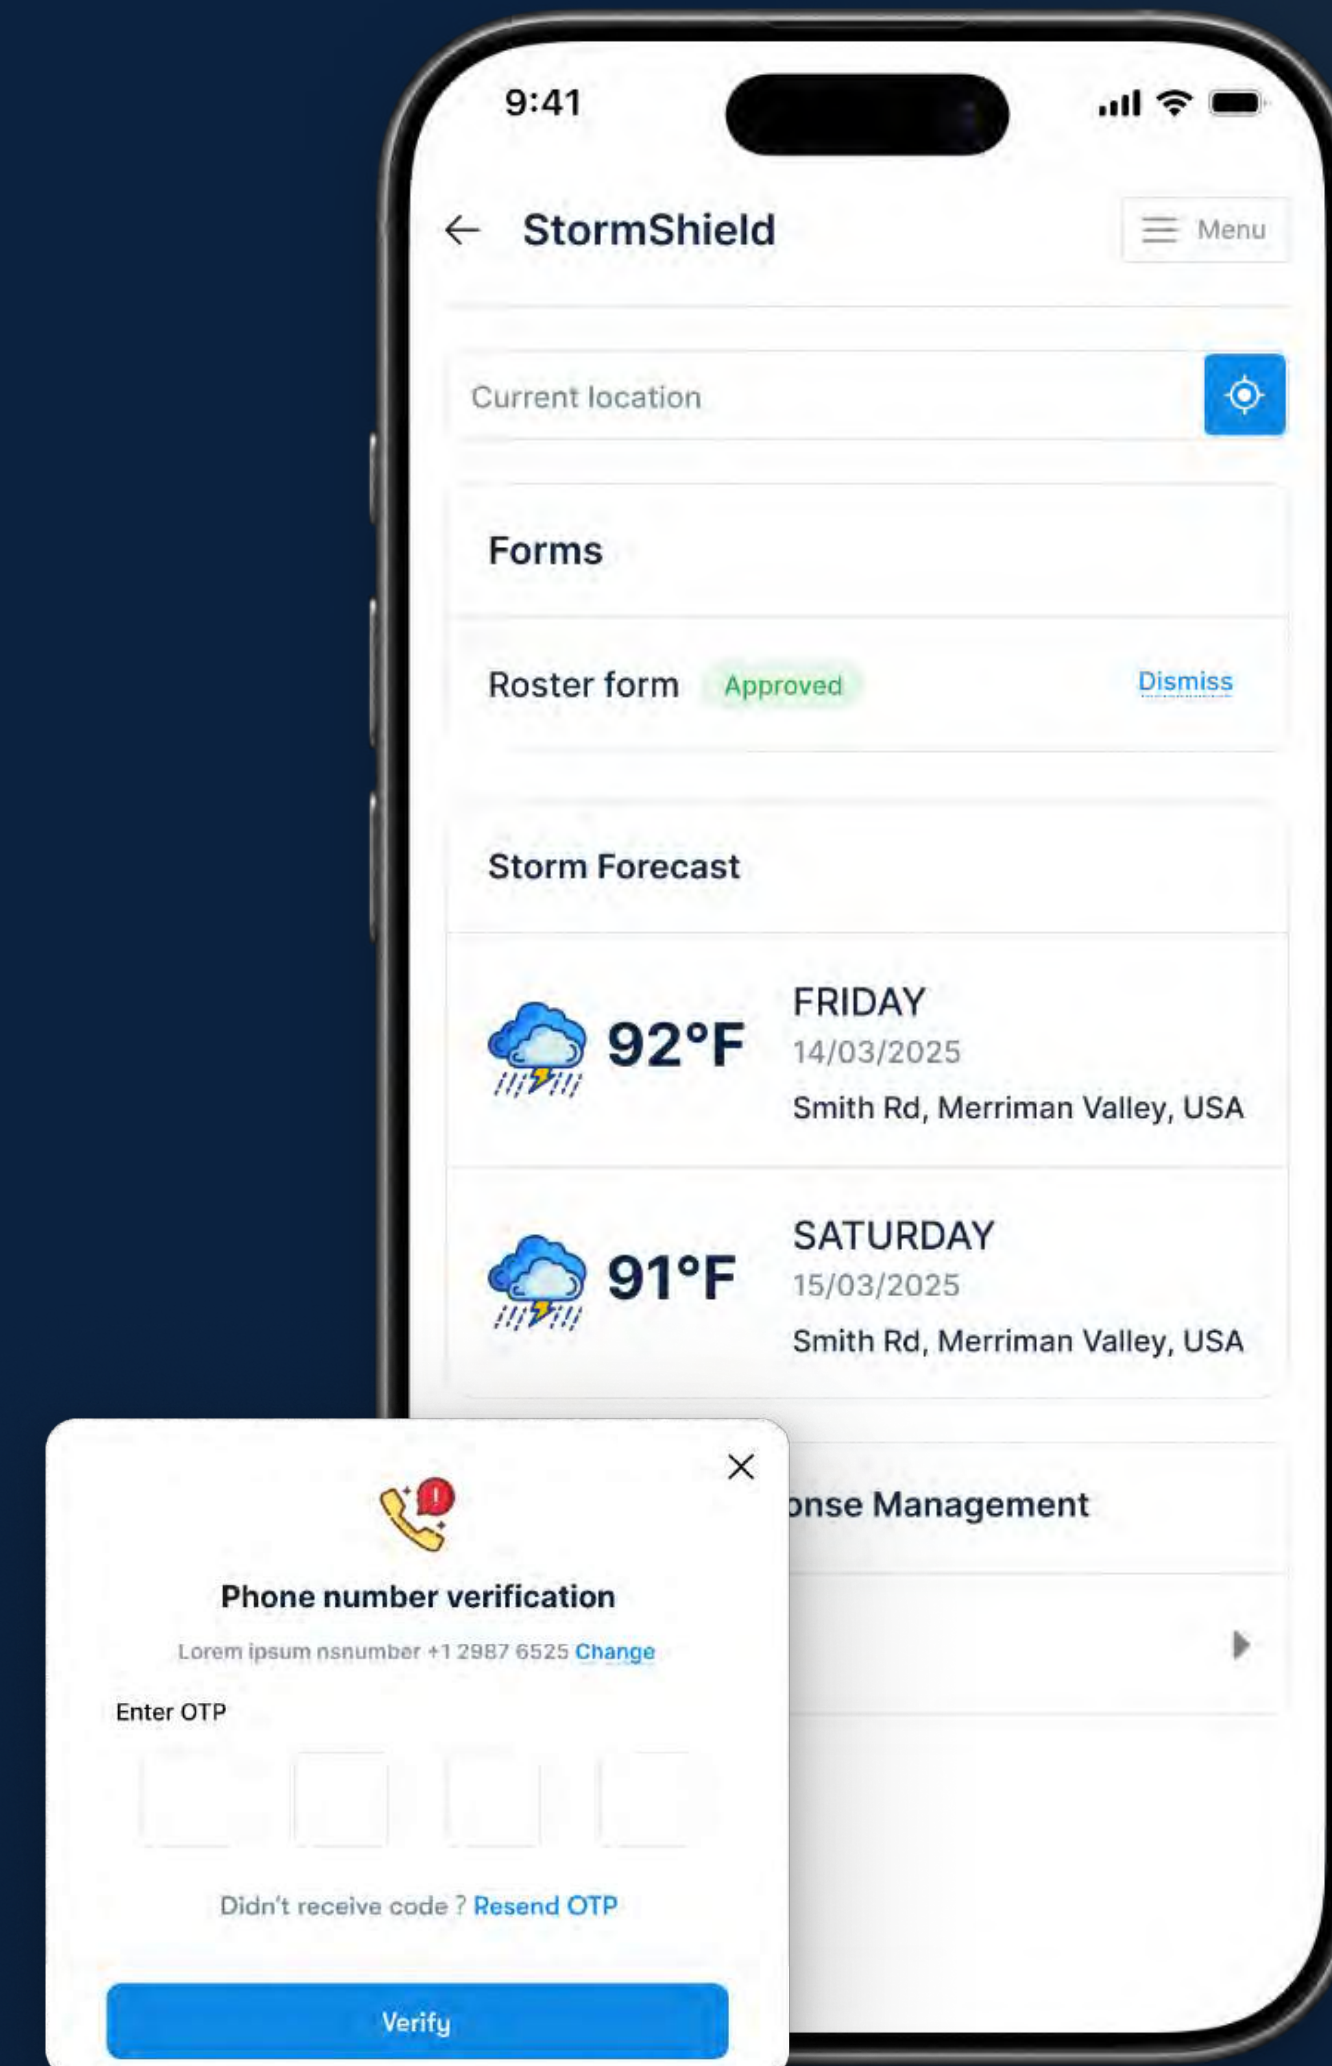

OTP login for easy, password-free access.

Submit reports and timesheets directly in the app.

Real-time location and status updates for field coordination.

features

Complete Integration within the Platform

Replace multiple tools and manual processes with a single, scalable platform.

KYRO AI unifies crew mobilization, compliance, and timesheet management.

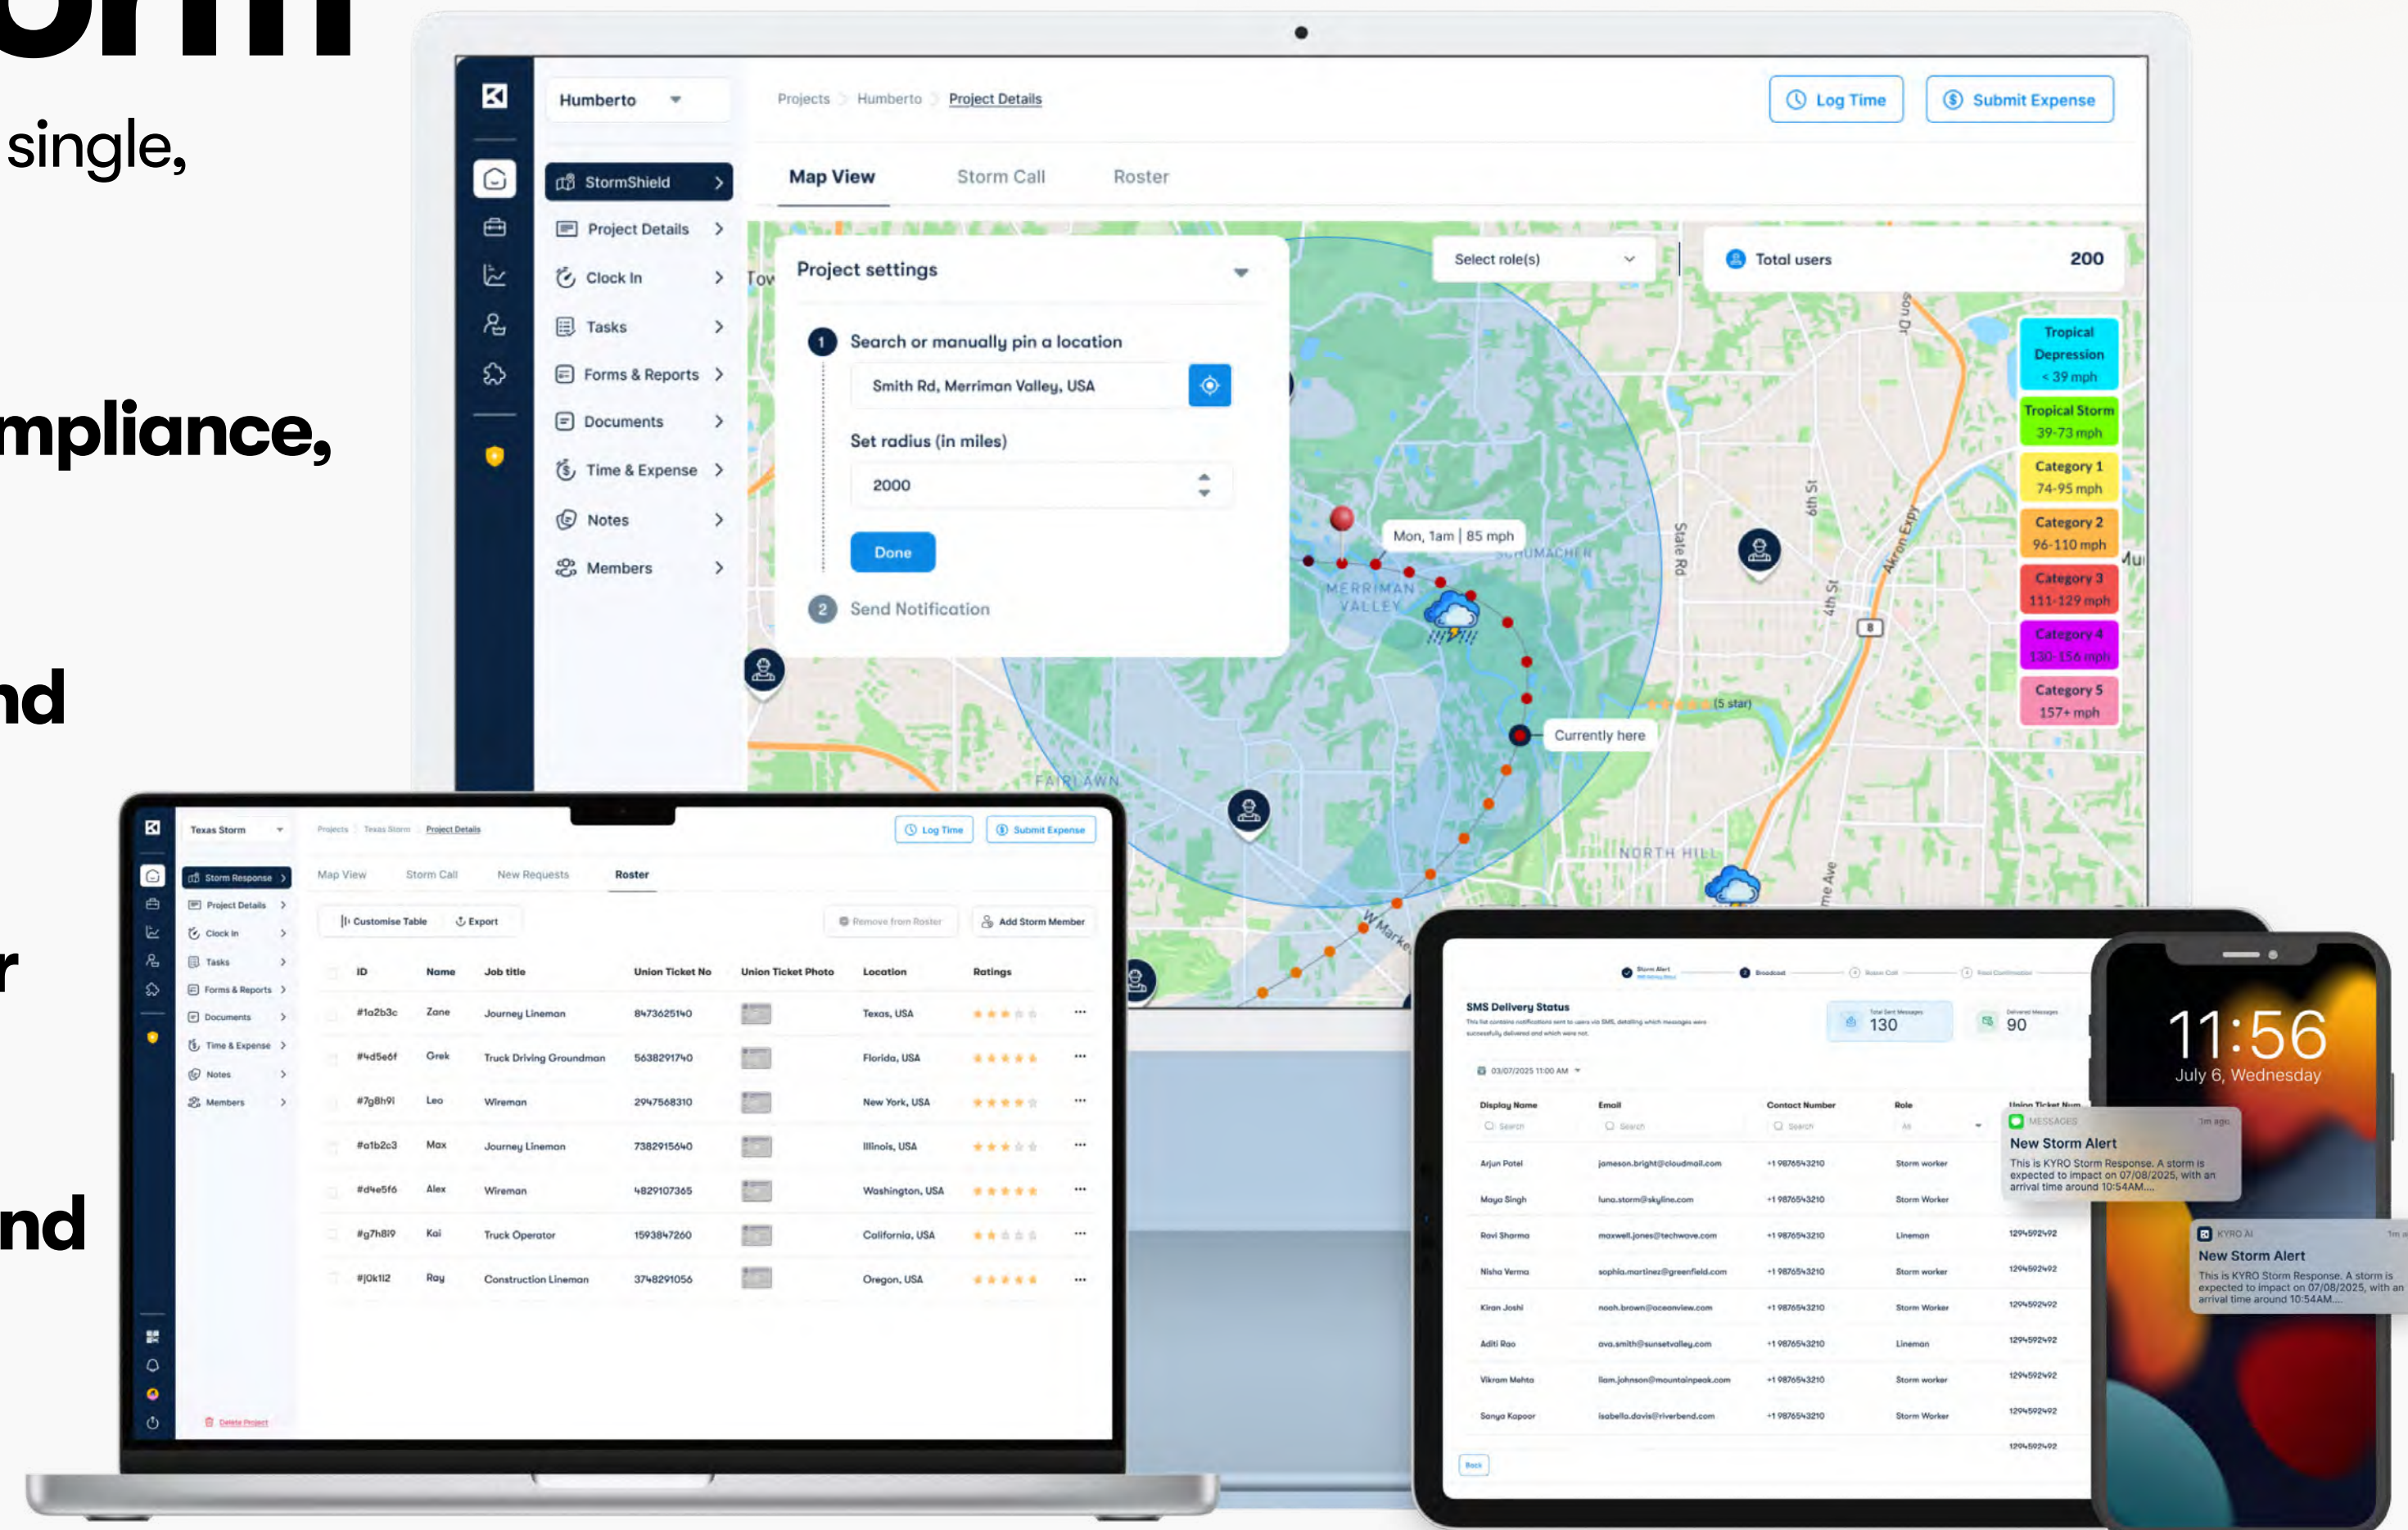

Integrated with SMS, forms, billing, and asset management systems.

Scales to contractor and utility use for weather events of all scales.

Supports future asset management and expansion modules.

Thank You!
