These results are specific to this individual only. Individual results and activity levels after surgery vary and depend on many factors including age, weight, and prior activity levels. There are risks and recovery times associated with surgery, and there are certain individuals who should not undergo surgery.

This case study is a publication of Vilex, LLC.

Post-Op

Anterior Lateral Fibula Plate

- 3.5mm Lag Screw
- 75mm Plate
- 3.5mm Cortical Screws
