

WOLFPACK SECURITY

BOUTIQUE BUILT FOR THE ENTERPRISE

SECURITY THAT KEEPS PACE WITH ENGINEERING

The Core Differentiator

Most firms are choosing between manual expertise and AI-driven scale. Wolfpack delivers both.

Senior Talent

Each engagement is led and executed by senior practitioners with real-world experience building, securing, and attacking complex systems. No handoffs to junior resources. No offshore review cycles.

Engineering Friendly

We provide clear remediation guidance, code-level recommendations and workflow integration through platforms such as Jira, reducing friction between security and development teams. Findings are delivered in a format engineers can act on immediately.

Wolfpack has become a critical partner in strengthening our global security posture through complex pentesting and continuous red team exercises.”

— CISO, Fortune 500 Technology Company

Our Core Services

Web & API Pentesting

Secure Code Review

AI/LLM Security Testing

Architecture Reviews

Cloud & IAM Assessments

M&A Security Diligence

Remediation Validation

Outcome driven Deliverables

1 Reduced Time-to Remediation:
Shorten the gap between “Found” and “Fixed”

2 Board-Ready Reporting:
High-level risk summaries for executives + deep technical data for engineers.

3 Compliance Checkbox +:
Meet SOC2/HIPAA requirements with tests that actually improve your security posture

4 Fixed-Cost Predictability:
Our credit system means no “scope creep” or hidden hourly fees.

Work with Us

- From signed agreement to active testing in as little as 10 business days
- Competitive pricing without overhead of large consultancy
- Support Revenue and Customer Trust
- Streamlined Contracts and Onboarding
