

Advanced Rebuild Center (ARC)

OEM-level rebuilds engineered for reliability, transparency, and long-term performance.

What is the Flogistix ARC?

The Flogistix Advanced Rebuild Center (ARC) is a dedicated facility for VRU and wellhead compression skid rebuilds. Created to fill a critical gap in the industry, ARC delivers:

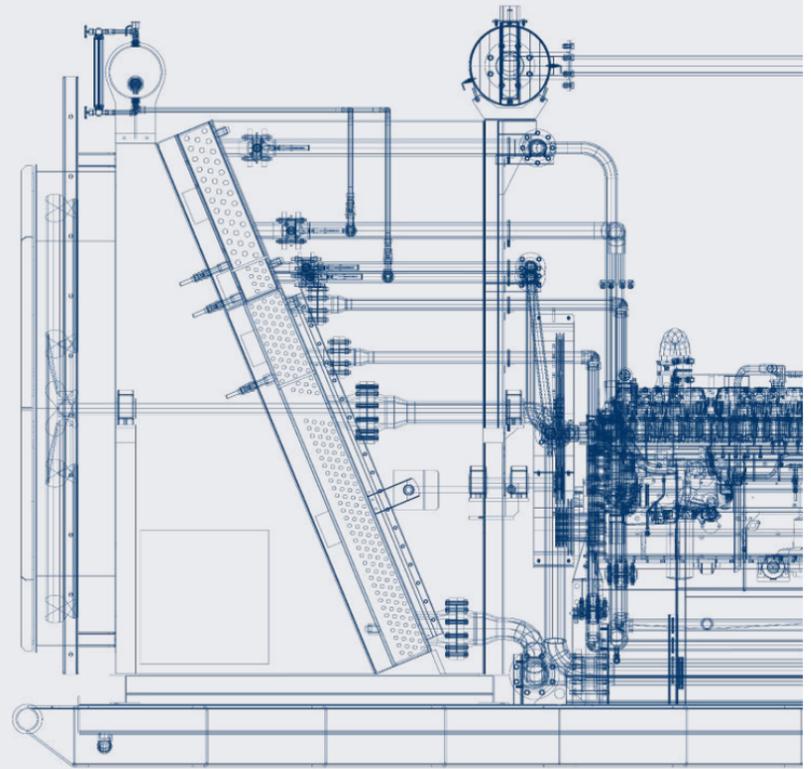

Comprehensive diagnostics and testing

Reliable fabrication and assembly

Engineering review and sign-off

Result

Equipment that is made ready, made right, and/or upgraded for lasting performance.

Put your Trust in the Flogistix ARC

When customers choose the Flogistix ARC, they gain a partner defined by:

Transparent communication at every stage

Documented scope of work and testing results

Extended warranty options tied to rebuild quality

Why ARC Matters

Operators face limited, inconsistent rebuild options. ARC fills a critical gap in the industry for responsible ownership—reusing what we have to drive cost savings and strengthen environmental stewardship. We provide a rebuild process that sets a new standard through:

Building to the highest standards—competitors can't match.

Addressing root causes, not just surface issues.

Clearly defining scope, providing proactive communication, and removing surprises.
