

ADVANCING K-12 SCHOOLS

with smarter facility solutions

Managing and maintaining school facilities can be overwhelming, especially with limited budgets and rising energy costs. GRP | WEGMAN is here to take that weight off your shoulders. With decades of expertise, we specialize in helping K-12 schools modernize their infrastructure, reduce operational costs, and create energy-efficient environments where students and teachers can thrive.

SUSTAINABILITY FOR THE FUTURE

We ensure your investment pays off in measurable energy savings, while our flexible approach allows us to design tailored solutions that meet your school district's unique needs. Whether it's **upgrading HVAC systems, improving lighting, integrating renewable energy like solar and geothermal, or managing large-scale renovations and construction projects**, we make the process seamless, cost-effective, and future-focused.

PROVEN K-12 EXPERTISE

With hundreds of successful school projects under our belt, we know how to deliver results that meet tight deadlines and budgets. Many of our clients choose us for multiple projects.
