

# ACCELERATING WATER INFRASTRUCTURE MODERNIZATION

## AMI IMPLEMENTATION WITH A PROVEN PARTNER

Your community stands at an important turning point in water infrastructure management. Your planned transition to an Advanced Metering Infrastructure (AMI) system represents a strategic investment in operational efficiency, revenue protection, and community service. However, like many municipalities, competing priorities and resource constraints have delayed implementation—all while water revenue continues to be lost. We get it - and are here to help.

## The Turnkey Solution

GRP | WEGMAN offers water leaders a proven pathway forward. As a trusted energy services partner with over 70 years of experience serving municipalities, we specialize in accelerating critical infrastructure projects through innovative financing and turnkey delivery.

We don't just design systems - we deliver them, allowing your team to focus on the dozens of other pressing city needs that demand attention

## The Meter is Running | The Cost of Waiting

You've already been replacing meters with the latest AMI technology and demonstrated the benefits. It's time to address the entire scope.

Old meters continue to incur meter reading costs, create operational inefficiencies, continue revenue loss through undetected leaks and inaccurate readings, create billing and customer service challenges, and limit city water resource planning. Your team already knows this project needs to happen. We're all ready to execute efficiently without overburdening stretched city resources.

# OUR COLLABORATIVE PROCESS | FROM CONCEPT TO COMPLETION

What sets GRP | WEGMAN apart is our combination of technical expertise, financial structuring capabilities, and commitment to municipal partnership. We've spent over seven decades working with cities, schools, and institutions that face the same challenge: critical infrastructure needs that compete with limited resources and countless priorities.

Using our partnership approach, you can accelerate this critical infrastructure upgrade while maintaining focus on other city priorities and stopping the ongoing loss of water revenue.
