BARBOURVILLE INDEPENDENT SCHOOLS BARBOURVILLE, KY

\$5 Million in Renovations

This natatorium conversion delivers lasting value to Barbourville Independent Schools by transforming an aging, underutilized pool into a modern, flexible multi-purpose facility that expands opportunities for students, staff, and the community. By replacing outdated pool infrastructure with a level, adaptable floor system, new athletic courts, turf, classrooms, and energy-efficient building systems, the renovation maximizes the use of existing space while reducing long-term operating costs. The result is a single, versatile venue that supports education, athletics, community events, and emergency shelter needs, extending the useful life of the building for years to come.
