

ABOUT US

A Brief Story
About Gulf States Roofing & Construction

For over two decades, Gulf States Roofing & Construction has been a trusted name in the roofing and construction industry. As a womanowned business, we take pride in not only delivering high-quality, reliable services but also in empowering our community through leadership and innovation. Based in the heart of the Gulf Coast, we are a certified HUBZone business, which allows us to give back by creating local jobs and supporting regional growth.

We're committed to delivering superior craftsmanship and unparalleled customer service, all while maintaining our dedication to the local families, businesses, and communities we serve across the Gulf Coast.

What started as a small, family-owned business quickly gained a reputation for excellence in both craftsmanship and customer service. Gulf States Roofing & Construction specializes in residential and commercial roofing, storm damage rehabilitation, new constructions, and renovations.

With a skilled team of experts and a focus on using only the best materials, the company has earned the trust of homeowners, businesses, and property managers alike.

Driven by a commitment to integrity, safety, and innovation, Gulf States Roofing & Construction continuously invests in cuttingedge technology and ongoing training to stay ahead of industry trends. Whether it's installing a new roof, repairing storm damage, or tackling large-scale construction projects, Gulf States has become the go-to name for those who value both quality and reliability.

Today, Gulf States Roofing & Construction is more than just a service provider—it's a partner in building stronger communities, one roof at a time.

VISION

Our vision is to be the leading provider of roofing, construction, and disaster recovery services, recognized for our innovation, reliability, and commitment to excellence. We strive to create lasting impact by delivering high-quality solutions that strengthen communities, rebuild lives, and set new standards in the industry. Through collaboration, integrity, and continuous improvement, we aim to build a future where every project enhances the safety and sustainability of the environments we serve.

MISSION

Our mission is to deliver exceptional roofing, construction, and disaster recovery services that exceed client expectations. We are committed to providing innovative solutions, high-quality craftsmanship, and reliable support to rebuild and strengthen communities.

01

High-Quality Craftsmanship

We provide top-tier roofing, construction, and disaster recovery services, ensuring every project is built with durability and attention to detail for safer, more sustainable communities.

03

Collaboration for Success

By working closely with clients, partners, and stakeholders, we ensure projects align with their needs and goals, fostering stronger communities.

02

Innovative Solutions

We embrace the latest technology and methods to solve challenges and improve efficiency, delivering smarter, longer-lasting results.

04

Integrity & Trust

We build lasting relationships through transparency, reliability, and accountability, ensuring successful outcomes for every project.

OUR CAPABILITIES

At Gulf States Roofing & Construction, we combine over 20 years of experience with a commitment to quality and community. As a woman-owned HUBZone business, we proudly serve the Gulf Coast, offering a wide range of roofing and construction services tailored to meet the needs of both residential and commercial clients.

Below are the core capabilities that set us apart as a trusted industry leader.

Project Management & Consulting

Project Management

- End-to-end project oversight
- Timeline and budget management
- Coordination of trades and contractors
- Quality assurance and inspections
- Safety compliance

Project Consulting

- Feasibility and cost assessments
- Design consultation
- Procurement and sourcing materials
- Permitting and regulatory consultation

Building Consulting

- Architectural and structural assessments
- Energy efficiency evaluations
- Safety audits
- Code compliance consulting
- FL Roofing Contractors: Specializing in highquality roofing systems for both residential and commercial sectors.
- General Contracting: Full-service general contractor for construction, renovation, and disaster recovery projects.

OUR PROCES PRE-PROJECT

01

Initial Site Visit & Report

We begin by conducting an initial site visit, preferably with the building owner or property manager, to assess the property and determine the roofing needs and potential upgrades. This helps us understand the scope of work and any specific requirements for the building.

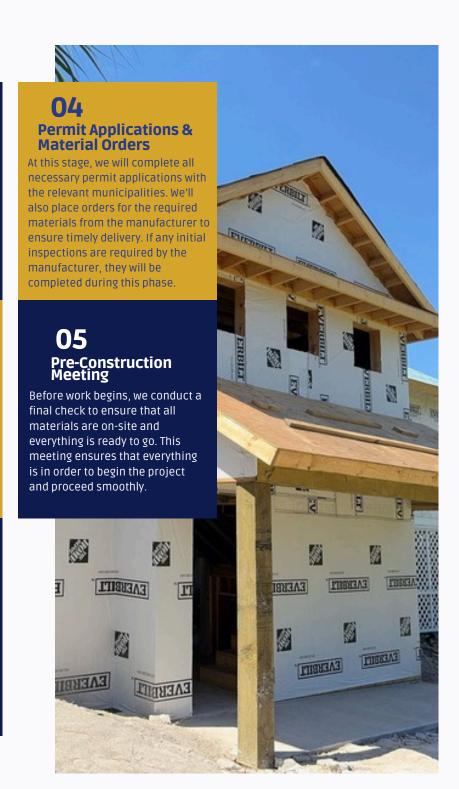

02Scope of Work & Bid Proposal

Following the site assessment, we collaborate with the owner or property manager to build a comprehensive scope of work and bid proposal. We often provide multiple options in a "Good, Better, Best" format, offering additional details for each option. This ensures you have all the information needed to make an informed decision.

03

Contract Agreement

Once you've reviewed the scope of work and bid, we are available for any questions, return visits, or clarifications you may need. When you're ready, we'll finalize and sign the contract to move forward.

OUR PROCES POST-PROJECT

01

Inspections

Upon completion of the project, we conduct inspections to ensure everything is up to standard. These inspections help identify any issues early on, providing an additional set of eyes to prevent problems before they arise. No warranty can be issued until these inspections are completed and any necessary corrections are made.

03

Signed Approval & Final Invoice

Once all inspections are complete and questions are addressed, we will request the building owner to sign a completion and satisfaction form. We will then provide the final invoice for the completed work.

02

Final Walkthrough

After inspections are complete, we will conduct a final walkthrough with the building owner or facility manager to address any remaining questions. During this walkthrough, we will also discuss maintenance options to help extend the life of your roof beyond the warranty period.

04

Warranty Issued

Following the final payment, we will issue both our company's warranty and the manufacturer's warranty for the work completed.

Case Study: \$1.5M Roofing Project for Camp for Unprivileged Kids

Project Overview

We were contracted to provide a standing seam rooffor a \$1.5 million roofing project at a camp designed to serve unprivileged children. The camp is a vital community project, and our team was brought in to ensure a durable, high-quality roofing system to withstand the elements for years to come.

Scope of Work

Our primary responsibility was to install a standing seam roof, known for its longevity and weather resistance. This roofing system was selected due to its durability and ability to handle Florida's diverse weather conditions.

Progress Update

As of the 2-month mark, the project is still awaiting the completion of other building structures on-site. While waiting for the final construction stages to be completed, we have already taken proactive steps to assist with various other aspects of the project.

In addition to roofing, our team has provided structural corrections where necessary, addressing issues that could have affected the overall integrity of the buildings. This ensured that the structures are secure and ready for the roof installation once construction is finalized.

Current Status

We are on track and fully prepared to complete the standing seam roof installation as soon as the buildings are ready for roofing. Our flexibility and commitment to quality throughout this ongoing project reflect our ability to adapt and contribute to the overall success of a complex, multi-phase build.

PROBLEM-SOLVING EXPERTISE IN GOVERNMENT AND DISASTER RECOVERY WORK

Since 2005, our company has specialized in disaster recovery and government projects, which were pivotal in shaping our expertise and getting us started. From the beginning, we've been committed to providing quick, effective solutions in response to catastrophic events. This dedication has become a cornerstone of our operations.

Key Experience

- Hurricane Katrina
- Hurricane Michael
- Hurricane Irma
- Hurricane Ian
- Hurricane Helene
- Hurricane Milton

In addition to hurricanes, we've also managed tornado damage in Oklahoma and have provided extensive recovery efforts in both Texas and Florida.

Areas of Expertise:

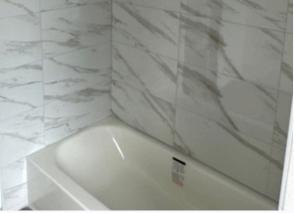

- Hurricane Disaster Recovery: Our specialty is hurricane disaster recovery, where we've consistently demonstrated our ability to respond quickly and effectively.
- Mitigation Services: We offer comprehensive mitigation solutions, particularly for government projects, to prevent further damage and ensure safety
- Recovery Work: Whether dealing with major flood damage, wind damage, or structural repairs, our team is equipped to handle a wide range of recovery challenges.

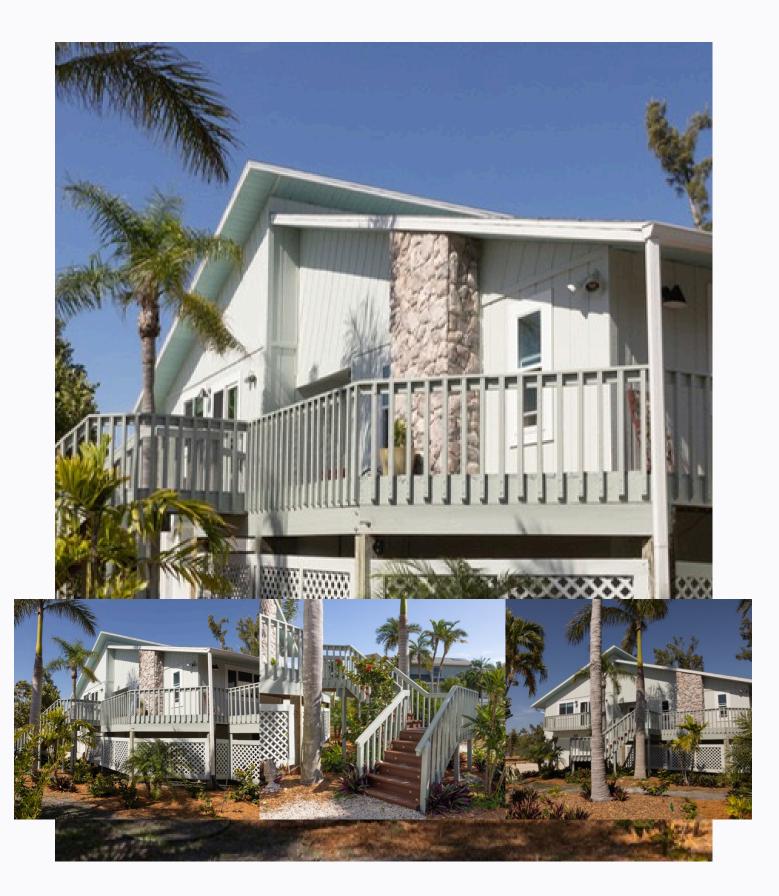

One of our most notable achievements involved responding to homes that were submerged 8 feet underwater.

Our mitigation team went in, cleared out the homes, and restored them to like-new condition, demonstrating our capability in handling severe water damage.

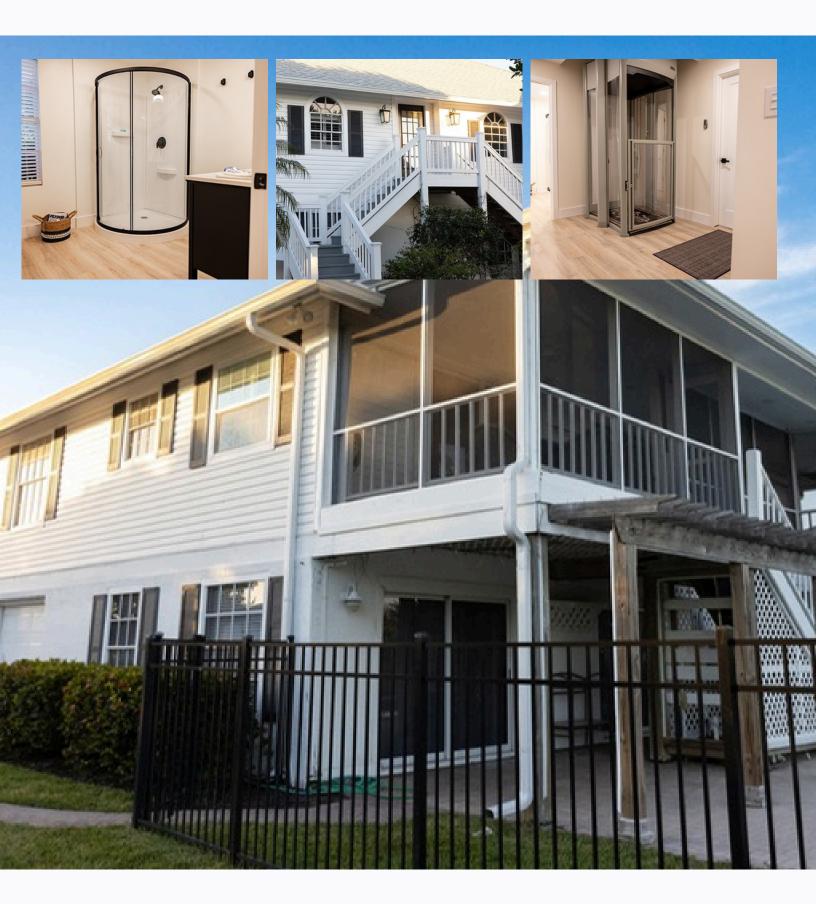

OUR TEAM

At the heart of our company are the dedicated leaders who ensure every project meets the highest standards. Together, these leaders bring vision, expertise, and a commitment to excellence, making your construction and roofing projects a seamless experience.
