

## WHEELBEARING GREASE

### Description

WHEELBEARING Grease is high-quality multi-purpose lithium based grease made from a blend of solvent refined oils and incorporates multi-functional extreme pressure additives, as well as corrosion and oxidation inhibitors. It is resistant to water and high pressure steam and is suitable for operating temperatures between -8°C and 135°C.

### Applications

WHEELBEARING GREASE is designed for use in highly loaded plain and roller bearings as well as for shock loading conditions in steel mills. It is suitable for use in the full range of bearing speeds encountered in machines, wood working tools, production equipment, textile and paper-making industry, generators and all types of vehicles.

### TYPICAL DATA

TEST	TYPICAL RESULTS
Thickening Agent	Lithium
NLGI Classification	3
Work penetration at 25°C	220 - 250
Drop point °C	>170°C
Oil viscosity at 40°C	200
Recommended temperature range	-8°C to 135°C
Water washout	5% (max)
Timken OK Load (kg)	20
