

5TH WHEEL GREASE WITH TACKYFIER

Description

5TH WHEEL GREASE WITH TACKYFIER is manufactured using a high percentage of tackyfier and incorporates lubricating solids such as the combination of graphite/Molybdenum Disulphide to provide with additional protection, and to prevent boundary lubrication conditions (metal to metal).

Applications

5TH WHEEL GREASE WITH TACKYFIER provides excellent adhesion to metal surfaces under all weather and application conditions, thereby extending the life of fifth wheel plates.

Features/Benefits

- Provides excellent tenacious metal adhesion
- Significantly provides longer component life
- Provides exceptional metal-to-metal protection
- Economical to use

TYPICAL PHYSICAL PROPERTIES

| TEST | TYPICAL RESULTS |
|----------------------|-------------------|
| NLGI Consistency | 2 |
| Rust Prevention Test | Pass |
| Appearance | Black/ Very Tacky |
| Water Sprayoff Test | <10% |
| Rust Test | Pass |
| Penetration Worked | 265-295 |
